

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PRINTED BY WILLIAM MACKENZIE, 48 LONDON STREET, GLASGOW

A UNIVERSAL ETYMOLOGICAL AND PRONOUNCING DICTIONARY OF THE ENGLISH LANGUAGE,

EMBRACING ALL THE TERMS USED IN ART, SCIENCE, AND LITERATURE.

J—JACCHUS.

J, the tenth letter of the English alphabet, has been added to it in modern days, the letter **I** being formerly used in words where **J** is now written. It seems to have had the sound of *y* in many words, as it still has in the German. The English sound of this letter may be expressed *dch*, or *edch*, a compound sound coinciding exactly with that of *g* in *genius*.

JABBER, jab'bur, *v. n.* (*gabberer*, Dan. *jaboter*, Fr.) To talk rapidly or indistinctly; to chatter; to prate;—*s.* rapid or confused talk.

JABBERER, jab'bur-ur, *s.* One who talks inarticulately or unintelligibly.

JABBERMENT, jab'bur-ment, *s.* Idle prate.—Obsolete.

JABOROSA, ja-bo-ro'sa, *s.* (*jaberose*, the Arabic name of the mandrake, to which the genus is allied.) A genus of herbaceous plants with white flowers, natives of Chili and Buenos Ayres: Order, Solanaceæ.

JABOTICABURAS, ja-bot-e-kab'u-rus, } *s.* Brazil
JABUTICABA, ja-bu-te-ka'ba, } names of
the plant *Eugenia cauliflora*, the fruit of which is highly agreeable.

JACAMAR, jak'a-mar, *s.* The French name for a genus of birds allied to the Kingfisher.—See *Galbula*.

JACAMEROPS, jak-a-me'rops, *s.* A genus of birds allied to the *Jacamar*.

JACANA, ja-ka'na, *s.* A genus of birds: Family, *Rallidæ*.

JACARANDA, ja-ka-ran'da, *s.* (the name of one of the species in Brazil.) A genus of plants, consisting of trees—natives of South America—with the habit of the fine-leaved species of *Acacia*, and having showy yellow, blue, or violaceous flowers: Order, *Bignoniaceæ*.

JACA-TREE, jak'a-tre, *s.* The tree *Artocarpus integrifolia*, one of the bread-fruit trees, a native of the East Indies.

JACCHUS, jak'kus, *s.* (*iacho*, I cry aloud, Gr.) A

JACENT—JACK.

genus of South American monkees, having thumbs only on the hind feet; all the digits of the fore feet are in the same direction, and are armed with narrow curled claw-like nails.

JACENT, ja'sent, *a.* (*jacens*, Lat.) Lying at length.

JACK, jak, *s.* A nickname or diminutive of *John*, used as a general term of contempt for any saucy or paltry fellow; the name of an instrument which supplies the place of a boy; an instrument to pull off boots; a young pike. In Mechanics, an instrument for raising great weights, of which there are several kinds. The common *kitchen jack* is a compound machine, in which weight is applied as a power to overcome the friction of the parts and of the weight with which the spit is charged, and a steady and uniform motion is obtained by means of a fly-wheel;—(*zaco*, *xaqueta*, Span.) a coat of mail; a pitcher of waxed leather;

Small *jacks* we have in many alehouses of the city and suburbs, tipt with silver.—*Heywood*.

a small bowl thrown out for a mark to the bowlers; part of a musical instrument called a *virginal*; the male of certain animals, as of the *ass*; a wooden frame on which timber is sawed. In a ship, a flag, ensign, or colours displayed from a staff at the end of a bowsprit. In Mining, a wooden wedge used to split the rocks asunder after blasting. *Jack timbers*, in Architecture, those in a row of timbers which, being intercepted by other pieces, are shorter than the rest. *Jack at all trades*, a person who can turn his hand to any kind of business. *Jack*, or *sawyer's jack*, an engine of the saw kind, much used about guns and mortars, and always carried with the artillery. *Jack in the box*, a large wooden male screw turning in a female one, which forms the upper part of a strong wooden box, shaped like the frustum of a pyramid. It is used by means of levers passing through holes in it, as in a packing-press, and for other purposes. In Botany, a name given to the plants of the genus *Hernandia*, from the

JACK-A-DANDY—JACKPUDDING.

noise which the kernel of the nut makes when shaken with the wind. *Jack of the bread-room*, among seamen, an assistant to the purser or ship's steward. *Jack block*, a block occasionally attached to the topgallant-tie, and through which the topgallant top-rope is reeved to sway up or to strike the yard. *Jack plane*, a plane of about eighteen inches long to prepare wood for the trying plane. *Jack rafters*, in Joinery, the jack timbers which are fastened to the high rafters and the wall-plates. *Jack ribs*, in Joinery, the jack timbers which are fastened to the angle ribs, and rest upon the wall-plates in groined or domed arches. *Jacksaw*, one of the provincial names for the Dundiver, a species of aquatic bird. *Jack timber*, in Joinery, a short timber fastened at the ends of two timbers which are not parallel, or to two timbers which actually meet in a point, as to the wall-plate and hip rafter of a roof, the wall-plate and hip of a groin, &c. *Jack of helkon*, a vulgar name for an æolipile. *Jack by the hedge*, or *sausage along*, the common name of the plants of the genus *Allaria*. *Jack with a lantern*, an ignis fatuus, a meteor that appears in low moist lands. *Jack of the clock house*, a little man that strikes the quarters in a clock.

Is this your *Jack of the clock house*?—
Will you strike, sir?—*Beau. & Fleet.*

JACK-A-DANDY, jak-a-dan'de, *s.* A little impertinent fellow.

JACKAL, jak'awl, *s.* (*tchakkl*, Ar. *chacal*, Fr.) The *Canis aureus* of Linnæus, a wild species of the canine tribe which hunt in packs. They rarely attack the larger quadrupeds, but are supposed to indicate their presence by the piercing cries which they set up in chorus while scenting their tracks. They feed on the remnants of the lion's prey, on dead carcases, and on the smaller animals and poultry. It is known also by the name of the lion's provider—a name which may have arisen from the notion that the yell of the pack gives notice to the lion that prey is on foot. *Jackals' kost*, or *kavimp*, the plant *Hydgora Africana*, which smells like roast-beef when roasted, and is eaten by the African savages.

JACKALENT, jak'a-lent, *s.* A sort of puppet; a sheepish fellow.

JACKANAPES, jak'an-aps, *s.* A monkey; an ape; a coxcomb; an impertinent fellow.

JACKASS, jak'as, *s.* The male of an ass.

JACK-BOOTS, jak'boots, *s.* Boots that serve as armour for the legs.

JACKDAW, jak'daw, *s.* The common name of the bird *Corvus monedula*. *Gracula guiscala*, from its colour, is called the *purple jackdaw*.

JACKET, jak'it, *s.* (*jaquette*, Fr.) A short close garment worn by males; a short coat. *Steam-jacket*, the cylinders of steam-engines, of a large size, are usually encircled with other cylinders of greater diameter; steam being introduced between them in order, that the inner cylinder may be kept warm.

JACKETED, jak'it-ed, *a.* Wearing a jacket.

JACKIA, jak'e-a, *s.* (in honour of the late William Jack, surgeon, H.E.I.C.S.) A genus of plants, natives of the East Indies: Order, *Cinchonaceæ*.

JACKPUDDING, jak-pud'ding, *s.* A merry-andrew; a buffoon; a zany.

Every *jackpudding* will be ridiculing palpable weaknesses which they ought to cover.—*L'Etranger.*

JACKSAUCE—JACQUEMONTIA.

JACKSAUCE, jak'saws, *s.* An impudent fellow; a saucy Jack.

His reputation is as arrant a villain, and a *Jacksauc*.—*Shaks.*

JACKSMITH, jak'smith, *s.* A smith who makes jacks for the chimney.

JACKSONIA, jak-so'ne-s, *s.* (in honour of George Jackson, a Scotch botanist.) A genus of Leguminous Australian shrubs, usually leafless in the adult state; flowers yellow: Suborder, *Papilionaceæ*.

JACOBÆA LILY, ja-ko-be'a lil'e, *s.* The *Amaryllis formosissima*, a native of North America.

JACOBIN, jak'o-bin, *s.* (so called from the place of meeting, which was the monastery of the monks named Jacobines.) One of a revolutionary faction which took a prominent and violent lead in the French Revolution. The Jacobins in France held secret meetings in which measures were concerted to direct the proceedings of the National Assembly—hence the name is frequently given to a person who secretly and unlawfully concocts schemes of a violent character, with a view to influence or overthrow the government.

JACOBIN, jak'o-bin, } *a.* Resembling

It coincides with the 710th year before the creation of the world, according to common chronology. *Julian calendar*, the civil calendar introduced at Rome by Julius Cæsar, and used by all the Christian countries till it was reformed by Pope Gregory XIII., in 1582. By it the year was to consist of 365½ days; and the vernal equinox, the time of which had been previously much disturbed, was again restored to the 25th of March. *Julian epoch*, in Chronology, the epoch or commencement of the Julian calendar. The first Julian year commenced with the 1st of January of the 46th year before the birth of Christ, and the 708th from the foundation of Rome. *Julian period*, in Chronology, is a period consisting of 7980 Julian years. The

number, 7980, is formed by the continual multiplication of the three numbers, 28, 19, and 15; that is the cycle of the sun, the cycle of the moon, and the cycle of indiction. The first year of the Christian era had 10 for its number in the cycle of the sun; 2 in the cycle of the moon; and 4 in the indiction. Now, the only number, less than 7980, which on being divided successively by 28, 19, and 15, leaves the respective remainders, 10, 2, and 4, is 4714; hence the first year of the Christian era corresponded with the year 4714 of the Julian period.

Jol's children *junketed* and feasted together often.—
South.

JUNO, joo'no, *s.* In Heathen Mythology, the sister and wife of Jupiter, the goddess of kingdoms and riches, and styled the Queen of Heaven. She presided over marriages, and was represented as the daughter of Saturn and Rhea. It is considered by some mythologists that the word Juno denotes the *air*, and others again that she was the Egyptian Isis, who, being represented under various figures by the Greeks and Romans, was considered as so many distinct deities. Homer describes her as riding in a chariot with wheels of ebony, adorned with precious stones, and drawn by horses. She, however, is generally represented as drawn by peacocks. Her statue at Corinth was of gold and ivory, with a crown upon its head, a pomegranate in one hand, and in the other a sceptre with a cuckoo on its top. In Astronomy, one of the five asteroids or small planets (♂) situated between the orbits of Mars and Jupiter. Its mean distance

from the sun is 253 millions of miles; its diameter, 1425 miles; rotation on its axis, 24 hours; annual revolution round the sun, 4 years 128 days.

JUNTA, jun'ta, } In Political government, a select council for taking cognizance of affairs of great importance and secrecy. In Spain and Portugal, it signifies the same as convention, assembly, or board among us.

JUPITER, ju'pe-tur, *s.* (altered probably from *Jovis pater*, or *Diu-piter*, in the same manner as *journal* is from *diurnal*.) The supreme god of the ancient heathen mythology. According to Cicero, there were three Jupiters who reigned in different countries; but the supreme god was considered as the son of Saturn, king of Crete. The heathens in general believed that there was but one supreme god; but when they considered this great being as influencing the affairs of the world, they gave him as many different names, and hence proceeded as many different nominal deities. When the god thundered, they called him Jupiter; when he calmed the ocean, Neptune; when he guided their councils, Minerva; and when he gave them strength in battle, Mars. In conformity with this idea, Jupiter is represented under different names, as the Kind, Terrible, Olympian, Pater, Pluvius, &c. The god was usually represented as seated on an ivory throne with a sceptre in his left hand, and a thunder-bolt in his right, and the eagle, "the bird of Jove," at his feet. In Astronomy, Jupiter (*J*) is the name of the largest body of the solar system, the sun excepted. Its equatorial diameter is 1086 times that of the earth, or upwards of 86000 miles. Its mass is in proportion of 1 to 1046.77 to that of the sun. Its mean distance from the sun is 490 millions of miles, round which it revolves in 4332,584 days. It revolves on its axis in 9 hours, 55 min., 49 sec. Jupiter is attended by four satellites, which revolve round it in the same manner as our moon. *Jupiter's beard*, or *silver bush*, the vulgar name of the plant *Anthyllis barba-jovis*. The name is also given, as well as Jupiter's eye, to the plant *Sempervivum*, the hen and chicken house-leek.

JURYMAN, ju're-man, } that serves on a jury.

JURY, ju're, *s.* (*juror*, I swear, Lat.) A certain number of persons sworn to inquire of and try some matter of fact, and to declare the truth upon such evidence as shall be laid before them. The jury are sworn judges upon all evidence in any matter of fact. Juries may be divided into two kinds, *common* and *special*. A *Common Jury* is such as is returned by the sheriff according to the directions of the statute 3 Geo. II., c. 25, which appoints that the sheriff's officer shall not return a separate panel for every separate cause, but one and the same panel for every cause to be tried at the same assizes, containing not less than forty-eight, nor more than seventy-two jurors; and their names being written on tickets shall be put into a box or glass, and when each cause is called, twelve of those persons whose names shall be first drawn out of the box shall be sworn upon a jury, unless absent, challenged, or excused. *Special Juries* are such as are obtained by motion made in court, and a rule granted thereupon, for the sheriff to attend the master, prothonotary, or other proper officer, with his freeholders book, and the officer takes indifferently forty-eight of the principal freeholders, in the presence of the attorneys on both sides, who are each of them to strike off twelve, and the remaining twenty-four are returned upon the panel.—4 *Bl. Com.* 349, 414, 441.

JURYMAST, ju're-mast, *s.* A temporary or occasional mast erected in a ship, in the place of one which has been lost in a storm or otherwise, and to which a smaller yard, ropes, and sails are fixed. Sometimes a *jurymast* is erected in a new ship to navigate her down a river, or to a convenient port where her proper masts may be put in order.

JUS, jus, *s.* In Law, a Latin word signifying right, as in *Jus deliberandi*, in Scottish Law, the right which an heir has of deliberating for a certain time whether he will represent his predecessor. *Jus accrescendi*, the right of survivorship between joint tenants. *Jus ad rem*, an inchoate and imperfect right, such as a parson acquires by nomination and institution to an ecclesiastical benefice. *Jus anglorum*, the laws and customs of the West Saxons in the time of the heptarchy, by which the people were for a long time governed, and which were preferred before all others. *Jus duplicatum*, is where a man has the possession as well as property of anything. *Jus gentium*, is the law by which nations in general are governed. *Jus ha-*

K.

K.

K, in the English alphabet, is the eleventh letter. It is borrowed from the Greek *kappa*, and was seldom used by the Latins except in words taken from the Greek language. It represents a close articulation, formed by pressing the root of the tongue against the upper part of the mouth, with a depression of the lower jaw and opening of the teeth. It is usually denominated a *guttural*, but is more properly a *palatal*. Before all the vowels it has one invariable sound, corresponding with that of *c* before *a*, *o*, and *u*, as in *keel*, *ken*. Formerly *k* was added to *c* in a number of words of

KAABA—KADSURA.

Latin origin, as in *publick*, *musick*, &c., but is now omitted, as being entirely superfluous. *K* is silent before *n*, as in *know*, *knife*, &c. As a numeral, *k* stands for 250; and with a stroke over it thus, *Ƒ*, for 250,000. This letter was not used by the ancient Romans, and very rarely in the later ages of their empire.

KNIGHT, nite, *s.* (cniht, cnecht, Sax. *knecht*, Germ.)

In feudal times, an appellation or title given to a youth after being admitted to the privilege of bearing arms; an honour generally conferred on youths of family and fortune, from which has sprung the honourable title of *knight* in modern usage; a pupil or follower; a champion. *Knighten-gyld*, was a *gyld* in London, consisting of nineteen knights, which King Edgar founded, giving them a portion of void ground lying without the walls of the city, now called Portsoken-ward. *Knighten-bachelors* are the most ancient, though the lowest order of knighthood amongst us; for we have an instance of King Alfred's conferring this order on his son Athelstan. *Knight banneret* are made only in the time of war, and is a high honour; and though knighthood is commonly given for some personal merit, which therefore dies with the person, yet John Coupland, for his valiant service performed against the Scots, had the honour of *banneret* conferred on him and his heirs for ever, by patent. *Knights of the bath* have their name from their bathing the night before their creation. This order was instituted by Hen. IV., and revived by King Geo. I. in the year 1725, who erected the same into a regular military order for ever, by the name and title of "The Order of the Bath," to consist of thirty-seven knights, besides the sovereign. They have each three honorary esquires; and they now wear a red ribband across their shoulders, have a prelate of the order, who is the bishop of Rochester, several heralds, and other officers. *Knights of the chamber* seem to be such knights bachelors as are made in time of peace; because usually knighted in the king's chamber, not in the fields as in time of war. *Knights' court* is a court-baron, or honour-court, held twice a year under the bishop of Hereford, at his palace there, wherein those who are lords of manors, and their tenants, holding by knight's service of the honour of that bishopric, are suitors; which court is mentioned in *Butterfield's Surv. fol. 244*. *Knight's fee*, is so much inheritance as is sufficient yearly to maintain a knight with convenient revenue. *Knights of the garter*, are an order of knights founded by Edward III., who, after he had obtained many notable victories, for furnishing this honourable order, made choice in his own realm, and all Europe, of twenty-five of the most excellent and renowned persons for virtue and honour, and ordained himself and his successors, kings of England, to be the sovereign thereof, and the rest to be fellows and brethren; bestowing this dignity on them, and giving them a blue garter, decked with gold, pearl, and precious stones, and a buckle of gold, to wear daily upon the left leg only, a kirtle, crown, cloak, chaperon, a collar, and other magnificent apparel, both of stuff and fashion, exquisite and heroical, to wear at high feasts, as to so high and princely an order was meet. *Knights hospitallers*, were an order of knights that had their name from an hospital erected at Jerusalem for the use of pilgrims coming to the Holy Land, and dedicated to St. John

KNIGHT-ERRANT—KNIGHTHOOD.

the Baptist. They were afterwards called *Knights of St. John of Jerusalem*. *Knights of St. John of Jerusalem*, were an order of knighthood that began about the year 1120. They had their denomination from John, the charitable patriarch of Alexandria, though vowed to St. John the Baptist, their patron. They had their primary abode in Jerusalem, and then in the Isle of Rhodes, until they were expelled thence by the Turks, A. D. 1523; since which time their chief seat was in the Isle of Malta. *Knight marshal*, an officer of the king's house, having jurisdiction and cognizance of transgressions within the king's house, and verge of it; as also of contracts made within the same house, whereto one of the house is a party. *Knights of St. Patrick*, an illustrious order of knighthood, instituted by his Majesty King Geo. III., Feb. 5, 1783, to consist of the sovereign, grand-master, the lord-lieutenant of Ireland for the time being, a prince of the blood royal, and thirteen knights. *Knight's service*, a tenure whereby lands were held of the king; which drew after it homage and service in war, escuage, wardships, marriage, &c., taken away by statute. *Knights of the shire*, are two knights or gentlemen of worth, chosen on the king's writ, in *pleno comitatu*, by the freeholders of every county that can dispend forty shillings a year, to represent them in the House of Commons; but now *notables armigeri* may be chosen. *Knights templars*, were a religious order of knights, instituted in the year 1119, and so called because they dwelt in part of the temple at Jerusalem, and not far from the sepulchre of Jesus Christ. They entertained Christian strangers and pilgrims, and in their armour led them through the Holy Land to view the sacred monuments of Christianity, without danger from infidels. *Knights of the thistle*, an honourable order of Scotch knighthood, the knights whereof wear a green ribbon over their shoulders, and are otherwise honourably distinguished;—*v. d.* to dub or create a knight, a ceremony performed by the king, who gives the person kneeling a blow with a sword, and says, 'Rise, Sir.'

KNIGHTHOOD, nite'hood, *s.* A military order or honour, or a mark or degree of ancient nobility, or reward of personal virtue and merit. There are four kinds of knighthood—*military, regular, honorary, and social*. *Military knighthood*, is that of the ancient knights, who acquired it by high feats of arms. They are called *milites* in ancient charters and titles, by which they were distinguished from mere bachelors, &c. These knights were girt with a sword, and had a pair of gilt spurs; whence they were called *equites aurati*. *Knight-hood* is not hereditary, but acquired. It does not come into the world with a man like nobility; nor can it be revoked. The sons of kings, and kings themselves, with all other sovereigns, heretofore

had knighthood conferred on them as a mark of honour. They were usually knighted at their baptism or marriage, at their coronation, before or after a battle, &c. *Regular knighthood*, is applied to all military orders which profess to wear some particular habit, to bear arms against the infidels, to succour and assist pilgrims in their passage to the Holy Land, and to serve in hospitals where they should be received; such were the knights templars, and such still are the knights of Malta, &c. *Honorary knighthood*, is that which princes confer on other princes, and even on their own great ministers and favourites; such are knights of the Garter, Bath, St. Patrick, Nova Scotia, Thistle, &c. *Social knighthood*, is that which is not fixed nor confirmed by any formal institution, nor regulated by any lasting statutes; of which kind there have many orders been erected on occasion of factions, of tilts and tournaments, masquerades, and the like. The abbot Bernardo Justiniani, at the beginning of his History of Knighthood, gives us a complete catalogue of the several orders: according to this computation, they are in number ninety-two.

- KRISHNA**, *krish'na*, *s.* In Hindoo Mythology, one
of the incarnations of the god Vishnu. Krishna
was a portion of Vishnu, who occupies the second
place in the trimurti, or Hindoo trinity. Vishnu
consented to be born of a woman, Devoki, the
wife of Vasudeva. Through the agency of the
demon Kanza, at his birth all young male children
were ordered to be slain; but Vasudeva gave
Krishna into the keeping of a cowherd, whose wife
had a son, also a portion of Vishnu, called Bala
Rama. Krishna distinguished himself by the de-
struction of a mighty serpent, while his brother
Rama destroyed the demon Dhenuka. He was
at last killed by a hunter; and, in the words of
the Puran'a, 'having united himself with his own
spiritual, inexhaustible, inconceivable, unborn, un-
decaying, imperishable, and universal spirit, which
is one with Vasudeva, abandoned his mortal body
and the condition of the threefold qualities.'
- KROKIDOLITE**, *krok'e-do-lite*, *s.* (*krokis*, wool, and

such animals as live in holes.
- KSHATRIYAS**, *sha-tre'yas*, *s.* One of the four
castes recognised as pure in the Hindoo writings.
Kshatriyas, male and female, sprung from the
arms of Brahma during his first creation, at the
same time that the Brahmins with the Vida
came from his mouth, the Sudras from his foot,
and the Vaisyas from his thigh. The Kshatriya,
or military class, is said by the Brahmins to have
become extinct; but the Rajpoots and the Nairs,
in the Deccan, in all probability belong to this
class, though the Brahmins assert that they are
only Sudras, the duty of whom is servile atten-
dance on the higher classes, especially the Brah-
mins.

L.

L.—LABBADIST.

L, the twelfth letter of the English alphabet, is usually denominated a semivowel, or a liquid. It is formed in the voice by intercepting the breath between the tip of the tongue and the forepart of the palate, with the mouth open. At the end of a monosyllable it is often doubled, as *shall, still, full*, but not after a diphthong or diphthong, as *foul, fool, proul, groul, foul*, &c., being written with a single *l*. In some words *l* is mute, as in *half, calf, walk, chalk*, &c. In English words, the terminating syllable *le* is unaccented; the *e* is silent, and *l* has a feeble sound, as in *able, eagle*, pronounced *abl, eagl*. As a numeral, *L* denotes 50, and with a dash, *L*, 50,000. As an abbreviation, in Latin, it stands for *Lucius*; and *L.L.S.* for a sestertium, or two libras and a half.

LAW, law, *s.* (*laga*, *lage*, *lag*, or *lah*, Sax. *lag*, Swed. *loi*, Fr. *ley*, Span.) In its most general and comprehensive sense, signifies a rule of action; and is applied indiscriminately to all kinds of action, whether animate or inanimate, rational or irrational. Thus we say, the *laws* of motion, of gravitation, of optics, of mechanics, as well as the *laws* of nature and of nations: and it is that rule of action which is prescribed by some superior, and which the inferior is bound to obey. *Municipal* or *civil law*, is the rule by which particular districts, communities, or nations are governed; being thus defined by Justinian—'*Jus civile est quod quisque sibi populus constituit.*' *Municipal law*, thus understood, is properly defined to be a rule of civil conduct prescribed by the supreme power in a state, commanding what is right, and prohibiting what is wrong. The *municipal law* of England, or the rule of civil conduct prescribed to the inhabitants of this kingdom, may with sufficient propriety, says Sir William Blackstone, be divided into two kinds—the *lex non scripta*, the unwritten or common law; and the *lex scripta*, the written or statute law. The *lex non scripta*, or unwritten law, includes not only general customs, or the common law properly so called, but also the particular customs of certain parts of the kingdom; and likewise those particular laws that are by custom observed only in certain courts and jurisdictions. The *leges scriptae*, or the written laws of the kingdom, consist of statutes, acts, or edicts, made by the king's majesty, by and with the advice and consent of the lords spiritual and temporal, and commons, in parliament assembled. *Law of arms*, is a kind of law among all nations, that in case of a solemn war, the prince that conquers gains a right of dominion, as well as property, over the things and persons he has subdued. *Law-day*, called also view of frankpledge, or court-leet, was any day in open court; and commonly used for the courts of a county or hundred. *Law of marque*, is where they that are driven to it, do take the shipping and goods of that people of whom they have received wrong, and cannot get ordinary justice in another territory, when they can take them within their own bounds and precincts. *Law merchant*, is a special law differing from the common law of England, proper to merchants, and part of the law of the realm. *Law of nations*, is a system of rules deducible by natural reason from the immutable principles of natural justice, and established by universal consent amongst the civilized inhabitants of the world, in order to decide all disputes, and to ensure the observance of justice and good faith, in that intercourse which must frequently occur between them and the individuals belonging to each; or they may depend upon mutual compacts, treaties, leagues, and agreements between the separate, free, and independent communities. *Law spiritual*, is the ecclesiastical law allowed by our laws where it is not against the common law, nor the

statutes and customs of the kingdom. *Laws of vegetation*, the principles by which plants are produced, and their growth carried on till they arrive to perfection. *Moral law*, a law which prescribes to men their religious and social duties. The moral law is summarily contained in the decalogue or ten commandments. *By-law*, a law of a city, town, or corporation. *Mosaic law*, the institutions of Moses, or the code of laws prescribed to the Jews, as distinguished from the Gospel. *Martial law*, the rules ordained for the government of an army or military force. *Marine laws*, rules for the regulation of navigation, and the commercial intercourse of nations. *Law language*, the language used in legal writings and forms, particularly the Norman dialect, or Old French, which was used in judicial proceedings from the days of William the Conqueror to the thirty-sixth year of Edward III.;—a rule of direction; a directory, as reason and natural conscience; that which governs; an established and constant mode or process; a fixed correspondence of cause and effect; the word of God; the doctrines and precepts of God, or his revealed will; a rule or axiom of science or art; settled principle; judicial process; jurisprudence.

- LEGUMINE**, leg'u-mine, *s.* (*legumen*, pulse, Lat.) The former name for Caseine,—which see.

LEGUMINOSITES—LEIPHAIMOS.

- LEGUMINOSITES**, leg-u-me-no-si'tes, *s.* (*legumen*, a pod, Lat.) A genus of fossil fruit from the Isle of Sheppy.
- LEGUMINOUS**, le-gu'me-nus, *a.* Pertaining to pulse. In Botany, having a legumen as the fruit; pertaining to the Leguminosae.
- LEHMANNIA**, le-man'ne-a, *s.* (in honour of Prof. Lehmann of Hamburg.) A genus of plants: Order, Solanaceae.
- LEHUNTITE**, le-hun'tite, *s.* (in honour of Captain Lehunt.) Compact zeolite, a mineral of a flesh-red colour, which appears to the naked eye like a lump of sugar, but, when subjected to the microscope, to be composed of small scales. Its constituents are—silica, 47.33; alumina, 24.00; soda, 13.20; lime, 1.524; water, 13.60: sp. gr. 1.953. Hardness = 3.75.
- LEIA**, le'e-a, *s.* (*leios*, smooth, or beardless, Gr.) A genus of Dipterous insects: Family, Nemocera.
- LEIACANTHUS**, le-a-kan'thus, *s.* (*leios*, smooth, and *acantha*, a spine, Gr.) A genus of fossil fishes.
- LEIMANTHIUM**, le-man'the-um, *s.* (*leimon*, a meadow, and *anthos*, a flower, Gr.) A genus of plants: Order: Melanthaceae.
- LEIODES**, le'o-des, *s.* (*leios*, smooth, Gr.) A genus of Coleopterous insects: Family, Melastoma.
- LEIODON**, le'o-don, *s.* (*leios*, smooth, and *odon*, a tooth, Gr.) A genus of fishes, having the body oblong and smooth, and the head short: Family, Ballistidae.
- LEIOLENUM**, le-o-le'mus, *s.* (*leios*, smooth, and *laimos*, the throat, Gr.) A subgenus of Saurian reptiles, allied to Tropidurus: Family, Agamidae.
- LEIOLEPIS**, le-o-le'pis, *s.* (*leios*, smooth, and *lepis*, a scale, Gr.) A genus of lizards, forming the connecting link between the Lacertidae and the Iguanidae.
- LEIOPHIS**, le'o-fis, *s.* (*leios*, smooth, and *ophis*, a serpent, Gr.) A genus of serpents: Family, Colubridae.
- LEIOPHYLLUM**, le-o-fil'lum, *s.* (*leios*, smooth, and *phyllon*, a leaf, Gr.) A genus of plants: Order, Ericaceae.
- LEIOSPERMUM**, le-o-sper'mum, *s.* (*leios*, smooth, and *sperma*, seed, Gr.) A genus of plants: Order, Canoniaceae.
- LEIOSTOMUS**, le-os'to-mus, *s.* (*leios*, smooth, and *stoma*, a mouth, Gr.) A genus of fishes, in which the body is oblong-ovate; the snout truncate, and caudal fin slightly lunate: Family, Chaetodonidae.
- LEIOTHRIX**, le'o-thriks, *s.* (*leios*, smooth, and *thrix*, hair, Gr.) A genus of birds, type of the subfamily Leiotrichinae: Family, Ampellidae.
- LEIOTRICHANÆ**, le-o-tre-ka'ne, *s.* (*leiothrix*, one of the genera.) The Silky Chatterers, a subfamily of the Ampellidae, Fruit-eaters or Chatterers, in which the legs are large, robust, and syndactyle; the hind toe longer than the outer; the wings short and rounded; the bill strong, and the gonyx ascending.
- LEIOTULUS**, le-o'tu-lus, *s.* (*leios*, smooth, and *otos*, an ear, Gr. in allusion to the smooth margin of the fruit.) A genus of Umbelliferous plants: Suborder, Campylospermae.
- LEIPATHYMIC**, le-path'e-mik, *a.* (*leipo*, I leave, and *thymos*, the soul, Gr.) Fainting; tending to swoon.
- LEIPHAIMOS**, le-fa'mos, *s.* (*leios*, smooth, and *phaios*, brown, Gr. from the plant being smooth and of a brown colour.) A genus of parasitical herbs: Order, Gentianaceae.

LEISTIS—LEMONADE.

LEISTIS, le-is'tes, *s.* A genus of birds belonging to the Agelaii, or Maizers: Family, Sturnidae.

LEISURABLE, le'zhur-a-bl, *a.* Vacant of employment; not occupied.

LEISURABLY, le'zhur-a-ble, *ad.* A leisure, without tumult or hurry.

LEISURE, le'zhure, *s.* (*loisir*, Fr.) Freedom from business or hurry; vacant time; time free from employment; convenience of time;

He sigh'd, and had no leisure more to say.—*Dryden*.

want of leisure.—Obsolete in the last sense.

The leisure and enforcement of the time
Forbids to dwell on.—*Shaks.*

LEISURELY, le'zhur-le, *a.* Not hasty; deliberate; done without hurry;—*ad.* not in a hurry; slowly; deliberately.

LEIURUS, le-n'rus, *s.* (*leios*, smooth, and *oura*, a tail, Gr.) A genus of fishes, allied to *Gasterosteus*, but having the sides smooth, and not covered in that genus with imbricated scales.

LEMAN, le'man, *s.* A sweetheart; a gallant, or a mistress.

He said he wolde

Her leman be, whether she wolde or n'olde.—*Chaucer*.

LEMANEA, le-ma'ne-a, *s.* (in honour of M. Leman, a French botanist.) A genus of Fuci: Type of the tribe Lemnidae.

LEMANIDÆ, le-man'e-de, *s.* A tribe of Fuci, in which the frond is hollow, and wholly converted into a receptacle.

LEME, leem, *s.* (*leoma*, Sax.) A ray of light; a beam;

Fire with red lemes.—*Chaucer*.

—*v. n.* to shine.—Obsolete.

LEMMA, lem'ma, *s.* (*lemma*, a thing taken or assumed, Gr.) In Mathematics, a preparatory proposition borrowed from another subject, or from another part of the same subject, and introduced at the point at which it becomes indispensable.

LEMMING, lem'ming, *s.* The Lapland Marmot, the *Georychus lemmus* of Illiger, a species of Rodents very abundant in the north of Europe, and on the shores of the Arctic seas. The Lemmings are about the size of a rat, and are furnished with black and yellow fur. They are remarkable for their occasional migrations in immense numbers, during which they march in a straight line across rivers, lakes, &c., and create much devastation.

LEMNA, lem'na, *s.* Duckweed, a genus of plants: Order, Pistiaceæ.

LEMNIAN, lem'ne-an, *a.* Pertaining to the Isle of Lemnos. *Lemnian earth*, a variety of earth which occurs in the Isle of Lemnos, formerly used in medicine under the name of *Lerra sigillata*. It has a meagre feel; soft; opaque; colour greyish-white, and falls to pieces when put into water.

LEMNISCATA, lem-nis-ka'ta, *s.* In Mathematics, a curve having the form of an 8, but with the upper and lower parts perfectly symmetrical.

LEMON, lem'on, *s.* The fruit of the lemon-tree, *Citrus medica*, a native of Persia, but now cultivated in Europe. *Essential salt of lemon*, the binosalate of potash is frequently sold under this name. It is used in removing moulds and stains from linen. *Lemon-grass*, the plant *Andropogon schenanthus*.

LEMONADE, lem-o-nade', *s.* (*limonade*, Fr.) A beverage consisting of water and lemon-juice, generally charged with carbonic acid.

LEMONIA—LENITIVES.

LEMONIA, le-mo'ne-a, *s.* (in honour of Sir C. Lemon.) A genus of West Indian plants: Order, Rutaceæ.

LEMUR, le'mur, *s.* (Latin.) A ghost or spectre. The Lemurs were male and female genii, or infernal gods, believed by the ancient Romans to haunt solitary rooms and silent places. They were propitiated by having beans cast to them. Their feast was celebrated under the name of *Lemuria*, or *Lemuralia*. Also, a genus of quadrumanous animals: Type of the family Lemuridae.

LEMURIDÆ, le-mu're-de, *s.* (*lemur*, one of the genera.) A family of quadrumanous animals, characterized by grinders 6-6 above, and 5-5 below; terminal extremities free; first finger of the hind-feet armed with recurved claws.

LEND, lend, *v. a.* (*lennan*, Sax.) *Past and past part.* Lent. To afford or supply, on condition of repayment; to suffer to be used on condition that it be restored; to afford; to furnish, in general; to permit to use for another's benefit; to let for hire or compensation.

irregularities of bone from the edge of the perforation made in the cranium by the trephine.

LENTICULARLY, len-tik'u-lar-le, *ad.* In the manner of a lens; with a curve.

LENTICULINA, len-tik-u-l'i-na, *s.* A sublenticular, multilocular, spiral univalve; a genus of fossil microscopic Foraminifera. It is distinguished from the *Nautilus* by having no siphon.

LENTICULITE, len-tik'u-lite, *s.* A fossil shell of a lenticular form.

LENTIFORM, len'te-fawrm, *a.* (*lens* and *forma*, form, Lat.) Of the form of a lens.

LENTIGINOUS, len-tij'e-nus, *a.* (*lentigo*, a freckle, Lat.) Freckly; scurfy.

LENTIGO, len-ti'go, *s.* Ephelis, freckles, or the little yellow spots on the skin, produced by exposure to the rays of the sun.

LENTISK, len'tisk, *s.* (*lentisco*, I become sticky, Lat.) The mastic tree, *Pistacia lentiscus*.

LENTITUDE, len'te-tude, *a.* Slowness; sluggishness.—Obsolete.

LENTO, len'to, *s.* (Italian, slowly.) In Music, a term equivalent to *Largo*,—which see.

LENTOR, len'tur, *s.* (Latin.) Tenacity; viscosness; slowness; delay; sluggishness; sizziness; thickness of fluids; viscosity, a term used in humoral pathology.

LENTOUS, len'tus, *a.* (*lentus*, Lat.) Viscid; viscous; tenacious.

LENZINITE, len'ze-nite, *s.* A mineral, occurring massive, with an earthy fracture, sometimes slightly conchoidal; colour white; lustre rather greasy; easily scratched by a knife; translucent; transparent on the edges. Its constituents are—silica, 37.5; alumina, 37.5; water, 25.0: sp. gr. 1.8—2.10. Hardness = 1.5.

LEO, le'o, *s.* (Latin, lion.) In Astronomy, the Lion, one of the zodiacal constellations, commemorative of the Nemean Lion killed by Hercules. It is surrounded by Ursa Major, Leo Minor, Cancer, Hydra, Sextans, Virgo, and Coma Berenices. It consists of fifty-nine stars. *Leo Minor*, a constellation of Hevelius, surrounded by Ursa Major, Lynx, Cancer, and Leo. Flamsted's catalogue gives eleven stars.

LEOCEPHALUS, le-o-sef'a-lus, *s.* (*leios*, smooth, and *kephale*, head, Gr.) A genus of Saurian reptiles, in which the head is pyramidal and short; the body depressed, with a low-pointed crest of short spines extending the whole length of the back and tail; neck smooth, with irregular folds on the sides, and an oblique fold on one of the shoulders: Family, Agamidæ.

LEOD, le'od, *s.* (Saxon.) The people; a nation or country.

LEOF, le'of, *s.* A term denoting love. *Leofwin*, a winner of love. *Leofstan*, best beloved.

LEONHARDITE, le-on'ard-ite, *s.* A mineral which occurs crystallized; primary form an oblique prism; cleavage perfect and parallel to the lateral planes; colour white, yellowish, rarely brownish; fracture uneven; lustre pearly on the fractured surface; vitreous; translucent on the edges. Its constituents are—silica, 56.128; alumina, 22.980; lime, 9.251; water and loss, 11.641: sp. gr. 2.25. Hardness = 3.0—3.5. Found in Bavaria.

LEONIA, le-o'ne-a, *s.* (in honour of Don F. Leon.) A genus of plants: Order, Theophrastaceæ.

LEONINE, le'o-nine, *a.* (*leoninus*, Lat.) Belonging to a lion, or partaking of his qualities; resembling

LEONINELY—LEPER.

a lion. *Leonine verses*, a certain species of verse which rhyme at every hemistich, the middle always chiming with the final syllable.

LEONINELY, le'-o-nine-le, *ad.* In the manner of a lion.

LEONOTES, le-o-no'tis, *s.* (*leon*, a lion, and *ous otes*, an ear, Gr. from a fancied likeness to the lion's ear in the corollas.) Lion's-ear, a genus of plants, consisting of herbs or subshrubs, with showy scarlet or yellow flowers: Order, Lamiaceae.

LEONTIASIS, le-on-ti'a-sis, *s.* (*leon*, *leontos*, a lion, Gr.) In Pathology, a species of *Lepra*, wherein the patient's face is thought to resemble that of the lion.

LEONTICA, le-on'te-ka, *s.* In Antiquity, feasts or sacrifices celebrated by the ancients in honour of the sun. The priests who officiated were called *Leontes*, because they represented the sun under the figure of a lion radiant, bearing a tiara, and gripping in his two fore-paws the horns of a bull.

LEONTICE, le-on'te-se, *s.* (an abridgment of *Leontopetalum*, its ancient name, from *leon*, a lion, and *petalon*, a petal, the Lion's-leaf, Gr.) A genus of plants, natives of North America: Order, Berberidaceae.

LEONTOPETALUM.—See *Leontice*.

LEONTOPODIUM, le-on-to-pod'e-um, *s.* (*leon*, a lion, and *pous*, a foot, Gr.) The plant Lion's-foot, *Filago leontopodium*.

LEOPARD, lep'ard, *s.* The feline animal *Felis leopardus*. 'The leopard,' as defined by Major Smith, 'when compared with the tiger and panther of naturalists, is uniformly of a paler yellowish colour, rather smaller, and the dots rose-formed, or consisting of several dots, partially united into a circular figure in some instances, and into a quadrangular, triangular, or less determined form in others. There are several isolated black spots, which more especially occur on the outside of the limbs.' *Leopard's-bane*, the plant *Senecio doronicum*.

LEOPOLDINA, le-o-pol-di'na, *s.* (in honour of the late Emperor of Brazil.) A genus of plants: Order, Palmaceae.

LEONURUS, le-o-nu'rus, *s.* (*leon*, a lion, and *oura*, a tail, Gr. from the spikes of the flowers having been compared to the end of the lion's tail.) Motherwort, a genus of plants: Order, Lamiaceae.

LEPADITES, lep'a-dit-se, *s.* (*lepas*, one of the genera.) The Goose Barnacles, a family of Cirripedes, the species of which are distinguished by a tendinous contractile, and often long tube, fixed by its base to some marine substance.—See *Barnacle*. Also, one of the many names of the supposed bivalvular opercula of ammonites, found at Solenhofen, termed *Trigonellites* by Parkinson, and *Solenites* by others.

LEPALS, le'pals, *s.* In Botany, sterile stamens.—Seldom used.

LEPANTHES, le-pan'thes, *s.* (*lepos*, bark, and *anthos*, a flower, Gr.) A genus of plants: Order, Orchidaceae.

LEPAS, le'pas, *s.* (Greek, a limpet.) The Barnacle, a genus of Cirripedes, now divided into many genera.—See *Lepadites*.

LEPECHINIA, lep-e-tsin'e-a, *s.* (in honour of John Lepechin, a Russian botanist.) A genus of herbaceous plants: Order, Lamiaceae.

LEPER, lep'ur, *s.* (*lepra*, Lat. *lepre*, Fr.) A person affected with leprosy.

LEPICENA—LEPIDOSPERMA.

LEPICENA, le-pis'e-na, *s.* In Botany, a term used by Richards to denote two empty bracts situated at the base of the locusta of a grass, usually called a *glume*.

LEPID, lep'id, *a.* (*lepidus*, Lat.) Pleasant; jocose.—Seldom used.

LEPIDAGATHIS, lep-e-dag'a-this, *s.* (*lepis*, a scale, and *agathis*, a ball, Gr.) A genus of East Indian plants: Order, Acanthaceae.

LEPIDINEÆ, lep-e-din'e-e, *s.* (plants agreeing with *Lepidium*.) A tribe of Cruciferous plants, characterized by the silicle having a very narrow dissepiment, and having keeled or very concave valves.

LEPIDION, lep-e-di'on, *s.* (*lepis*, a scale, and *dion*, noble, Gr.) A genus of fishes: Family, Gadidae.

LEPIDIUM, le-pid'e-um, *s.* (*lepis*, a scale, Gr. in allusion to the form of the pods, which resemble little scales.) A genus of plants, consisting of small Cruciferous herbs or subshrubs: Suborder, Noto-rhizae.

LEPIDODENDRON, lep-e-do-den'dron, *s.* (*lepis*, a scale, and *dendron*, a tree, Gr.) A genus of fossil plants, the stems of which, often of great size, occur in the Coal formation. The stems are dichotomous, and marked with rhomboidal areolae; the leaves linear.

LEPIDOGASTER, lep-e-do-gas'tur, *s.* (*lepis*, a scale, and *gaster*, the belly, Gr.) A genus of fishes of small size and slender bodies: Family, Cyclopteridae.

LEPIDOIDS, lep'e-doyds, *s.* (*lepis*, a scale, and *eidos*, resemblance, Gr.) A family of extinct fossil fishes, found in the Oolite series, remarkable for their large rhomboidal scales.

LEPIDOLEPRIDÆ, lep-e-do-lep're-de, *s.* (*lepidolepris*, one of the genera.) The Ribbands, a family of fishes belonging to the tribe Canthileptes, or Mailed-cheeks, in which the body is anguilliform and mailed; snout prolonged; mouth placed beneath the head, armed with spines.

LEPIDOLEPRIS, lep-e-do-lep'ris, *s.* (*lepis*, a scale, and *lepros*, rough or leprous, Gr.) A genus of fishes: Type of the family *Lepidolepridæ*.

LEPIDOPHYLLUM, lep-e-do-fil'um, *s.* (*lepis*, a scale, and *phyllon*, a leaf, Gr.) A name given by Brongniart to leaves of certain plants which occur fossil in the Coal formation.

LEPIDOPTERA, lep-e-dop'ter-a, *s.* (*lepis*, a scale, and *pteron*, a wing, Gr.) An order of insects, which are commonly named Butterflies and Moths, possessing four wings, usually of large size, and covered with a multitude of minute scales, which, to the naked eye, appear like powder.

LEPIDOPTERAL, lep-e-dop'te-ral, } *a.* Belonging to the order Lepidoptera.

LEPIDOPTEROUS, lep-e-dop'te-rus, } *a.* Belonging to the order Lepidoptera.

LEPIDOPUS, le-pid'o-pus, *s.* (*lepis*, a scale, and *pous*, a foot, Gr.) A genus of fishes: Family, Coryphænidæ.

LEPIDOSARCOMA, lep-e-do-sar'ko-ma, *s.* (*lepis*, a scale, and *sarx*, flesh, Gr.) A scaly tumour, mentioned by Severinus as occurring in the cavity of the mouth.

LEPIDOSIS, lep-e-do'sis, *s.* (*lepis*, Gr.) Scale-skin, same as *Ichthyosis*.

LEPIDOSOMA, lep-e-do-so'ma, *s.* (*lepis*, a scale, and *soma*, a body, Gr.) A genus of fishes: Family, *Lepidolepridæ*.

LEPIDOSPERMA, lep-e-do-sper'ma, *s.* (*lepis*, a scale,

LEPIDOSTEUS—LEPOSMA.

and *sperma*, a seed, Gr.) A genus of plants: Order, Cyperaceae.

LEPIDOSTEUS.—See Lepidostens.

LEPIDOSTROBUS, lep-e-dos'tro-bus, *s.* (*lepis*, a scale, and *strobos*, like a top, Gr.) A name given by Brongniart to the fossil fruits, supposed to be those of the *Lepidodendra*, which frequently occur in the Coal formation.

LEPIDOTE, lep'e-dote, } *a.* (*lepis*, a scale, Gr.)
LEPIDOTED, lep'e-dot-ed, } In Botany, covered with prominent dots.

LEPIDOTUS, lep-e-do'tus, *s.* (*lepis*, a scale, Gr.) A genus of extinct fishes, found in the Oolitic formation.

LEPIONURUS, lep-e-o-nu'rus, *s.* (*lepis*, a scale, and *oura*, a tail, Gr. in allusion to the pendulous bracteate spikes of the flowers.) A genus of plants, natives of Java: Order, Olacaceae.

LEPIPTERUS, lo-pip'tur-us, *s.* (*lepis*, a scale, and *pteryx*, a fin or wing, Gr.) A genus of fishes, in which the body is slender and fusiform, and the head scaly: Family, Chaetodonidae.

LEPISANTHES, lep-e-san'this, *s.* (*lepis*, a scale, and *anthos*, a flower, Gr. in allusion to the scales on the petals.) A genus of plants: Order, Sapindaceae.

LEPISIA, lep-ish'e-a, *s.* (*lepis*, a scale, Gr.) A genus of Coleopterous insects: Family, Lamellicornes.

LEPISMA, le-pis'ma, *s.* (*lepis*, a scale, Gr. from the body being covered with small scales.) A genus of insects, constituting the family Lepismineae: Order, Thysanouria. In Botany, a term sometimes applied to the cup-shaped disk of *Paeonia* and *Aconitum*, but seldom used.

LEPISTEUS, lep-is-os'te-us, *s.* (*lepis*, a scale, and *osteon*, a bone, Gr.) A genus of fishes, belonging to the Exocetinae, or Flying-fish, in which the head and body are mailed with plates and scales of great thickness: Family, Salmonidae.

LEPISTEMON, lep-e-ste'mon, *s.* (*lepis*, a scale, and *stemon*, a stamen, Gr.) A genus of plants: Order, Convolvulaceae.

LEPITHRIX, lep'e-trix, *s.* (*lepis*, a scale, and *thrix*, hair, Gr.) A genus of Coleopterous insects: Family, Lamellicornes.

LEPIDOLITE, lep'o-do-lite, *s.* (*lepis*, a scale, and *lithos*, a stone, Gr.) A mineral which occurs massive, and is usually composed of small flexible thin scales; fracture uneven; colour pearl-grey, peach blossom, rose and purple, red and greenish; the scales, which are sometimes hexagonal, are translucent. Its constituents are—silica, 50.35; alumina, 28.30; potash, 9.04; lithia, 4.49; oxide of manganese, 1.23; fluoric acid and water, 5.20: sp. gr. 2.85. It is found in granite, near Rosena in Moravia, at Perm in Russia, at the Isle of Uton in Sweden, and in North America.

LEPORIDÆ, le-por'e-de, *s.* (*lepus*, *leporis*, a hare, Lat.) Hares, a family of Rodents or Glires, distinguished by two cutting teeth in each jaw, or four in the upper one; lower one subulate; grinders numerous and rootless; ears generally large; clavicles none; fore-feet short; hinder ones long; tail none, or very short; fur soft.

LEPORINE, lep'o-rine, *a.* (*leporinus*, Lat.) Pertaining to a hare; having the nature or qualities of the hare.

LEPOSMA, le-pos'ma, *s.* (*lepos*, a scale, and *osme*, smell, Gr. in allusion to the smell of the bark

LEPOSTERNON—LEPTOCARPUS.

when stripped.) A genus of plants: Order, Asclepiadaceae.

LEPOSTERNON, lep-o-ster'non, *s.* (*lepos*, a scale, and *sternon*, the chest, Gr.) A genus of serpents: Family, Amphibienidae.

LEPRA, le'pra, *s.* (Greek, scabiness.) An affection of the skin, of the order Squamæ, or scaly diseases, of Willan and Bateman. It is characterized by an eruption of circular spots of inflamed skin covered with scales, varying from the size of a pin's head to that of a shilling, or even a half-crown piece, occasionally mixed with large irregular patches, formed by the coalescing of the borders of several contiguous spots. This disease must not be confounded with the leprosy of the sacred and ancient writers, a term which appears to have been used to express any loathsome affection of the skin, or, as some imagine, to have referred to the disease described under the term Elephantiasis.

LEPRARIA, lep-ra're-a, *s.* A genus of Lichens, so named because the plants upon which these substances grow have the appearance of being diseased with leprosy.

LEPRIASIS, lep-ri'a-sis, *s.* (*leprosis*, Gr.) The specific name given by Dr. Mason Good to leprosy, which he calls *Lepidosis lepriasis*.

LEPROSITY, le-pros'e-te, *s.* Squamous disease.—Seldom used.

LEPROUS, lep'rus, *a.* (*lepreux*, Fr.) Infected with leprosy; covered with white scales.

LEPROUSLY, lep'rus-le, *ad.* In an infectious degree. In Botany, *leprously white*, or *leprously silvery*, covered with white or silvery dots, scales, or scurf, resembling the leprosy. *Leprously tomentose*, covered with shaggy down; having the appearance of leprosy.

LEPROUSNESS, lep'rus-nes, *s.* State of being leprous.

LEPTA, lep'ta, *s.* (*leptos*, minute, Gr. from its small flowers.) A genus of plants, natives of Cochinchina: Order, Celastraceae.

LEPTALEUM, lep-ta'le-um, *s.* (*leptaleos*, slender, Gr. in reference to the slender and filiform leaves.) A genus of Cruciferous plants: Suborder, Noto-rhizeae.

LEPTANDRA, lep-tan'dra, *s.* (*leptos*, slender, and *aner andros*, a male, Gr. in reference to the slender stamens.) A genus of plants, allied to *Veronica*: Order, Scrophulariaceae.

LEPTARRHENA, lep-tar-re'na, *s.* (*leptos*, slender, and *arrhen*, strong, Gr. from being strong yet slender.) A genus of plants: Order, Saxifragaceae.

LEPTIDES, lep'te-des, *s.* (*leptis*, one of the genera.) A subfamily of Dipterous insects, of the family Brachystoma, distinguished by the proboscis being short and membranous.

LEPTIS, lep'tis, *s.* (*leptos*, slender, Gr.) A genus of Dipterous insects: Family, Tanyosoma.

LEPTOCALLIS, lep-to-kal'lis, *s.* (*leptos*, slender, and *kallos*, beauty, Gr.) A genus of plants, consisting of beautiful small erect herbs: Order, Convolvulaceae.

LEPTOCARPEA, lep-to-kar-pe'a, *s.* (*leptos*, slender, and *karpos*, fruit, Gr. the pods being slender.) A genus of Cruciferous plants: Suborder, Pleuro-rhizeae.

LEPTOCARPUS, lep-to-kar'pus, *s.* (*leptos*, slender, and *karpos*, fruit, Gr.) A genus of plants: Order, Restiaceae.

LEPTOCAULIS—LEPTOLOPHUS.

- LEPTOCAULIS**, lep-to-kaw'lis, *s.* (*leptos*, slender, and *kaulos*, a stem, Gr. in reference to its slender stem.) A genus of umbelliferous, herbaceous, annual plants, natives of North America: Order, Apiaceae.
- LEPTOCEPHALIDÆ**, lep-to-se-fal'e-de, } *s.* A
LEPTOCEPHALIDANS, lep-to-se-fal'e-dans, } family
 of fishes, of which *Leptocephalus* is the type.
 The species are characterized by the smallness of the head.
- LEPTOCEPHALUS**, lep-to-sef'a-lus, *s.* (*leptos*, slender, and *kephale*, the head, Gr.) A genus of fishes: Type of the family *Leptocephalidae*.
- LEPTOCERA**, lep-to-se'e-ra, *s.* (*leptos*, slender, and *keras*, a horn, Gr.) A genus of Coleopterous insects: Family, *Lamellicornes*.
- LEPTOCHARIAS**, lep-to-ka're-as, *s.* (*leptos*, slender, and *charis*, pretty, Gr.) A genus of fishes, in which the nasal valve is elongated into a cirrus; caudal fin obsolete; teeth numerous, with two or three lateral denticles on each side: Family, *Squalidae*.
- LEPTOCHLOA**, lep-to-klo'a, *s.* (*leptos*, slender, and *chloe*, grass, Gr.) A genus of plants: Order, *Gramineae*.
- LEPTOCONCHUS**, lep-to-kong'kus, *s.* (*leptos*, thin, and *konche*, a shell, Gr.) A genus of Mollusca, in which the shell is subglobular, delicate, fragile, and translucent.
- LEPTOCONNUS**, lep-to-kon'nus, *s.* (*leptos*, slender, and *connus*, the cone, Gr.) A genus of marine Mollusca, of which the shell is conic and striated; the spire elevated, acute, and concave; the basal whorl carinated, detached, sinuated above, and contracted near the suture.
- LEPTODENIA**, lep-to-do'ne-a, *s.* (*leptos*, slender, and *aden*, a gland, Gr. in reference to the slender pollen masses.) A genus of plants, consisting of twining shrubs, natives of the East Indies and Java: Order, *Asclepiadaceae*.
- LEPTODERMIS**, lep-to-der'mis, *s.* (*leptos*, slender, and *derma*, the skin, Gr. in reference to the branches being covered with separating fibrous bark.) A genus of plants: Order, *Cinchonaceae*.
- LEPTODES**, lep-to-des, *s.* (*leptos*, slender, Gr.) A genus of fishes, in which the head is large, obtuse, truncate, and the body lean and very slender: Family, *Gadidae*.
- LEPTOGLOSSUS**, lep-to-glos'sus, *s.* (*leptos*, slender, and *glossa*, a tongue, Gr.) A genus of birds: Family, *Meliphagidae*.
- LEPTOGNATHUS**, lep-to-na'thus, *s.* (*leptos*, slender, and *gnathos*, a jaw, Gr.) A genus of fishes, in which the jaws are greatly prolonged, attenuated, and pointed: Family, *Muridae*.
- LEPTOLENA**, lep-to-le'na, *s.* (*leptos*, slender, and *chlaina*, a cloak, Gr. in allusion to the narrow fleshy involucre.) A genus of plants, natives of Madagascar: Order, *Chlenaceae*.
- LEPTOLIMNEA**, lep-to-lim'ne-a, *s.* (*leptos*, slender, Gr. and *limnea*, a genus of testaceous mollusca.) A genus of fresh-water Mollusca, in which the shell is nearly cylindrical; the spire thick, lengthened, longer than the aperture, which is small: Subfamily, *Limnæinae*: Family, *Helicidae*.
- LEPTOLOGUS**, lep-to-lo'je, *s.* (*leptos*, slender, and *logos*, a discourse, Gr.) A minute and tedious description of trifling things.
- LEPTOLOPHUS**, lep-to-lo'fus, *s.* (*leptos*, slender, and *lophos*, a crest, Gr.) A genus of birds, belonging

LIBELLULA, li-bel'lu-la, *s.* (*libellulus*, Lat.) The Dragon-fly, a genus of Neuropterous insects, characterized as remarkable for their beauty, extraordinary power of flight, and ferocious habits: Type of the family Libellulidæ.

LIBELLULIDÆ, li-bel'lu-le-de, *s.* (*libellula*, one of the genera.) A family of Neuropterous insects, of which Libellula, the Dragon-fly, is the type. It consists of two subfamilies, the Libellulines and the Agrionides in the classification of Westwood.

LIBELLULINES, li-bel'lu-lin-se, *s.* The Dragon-flies.—See Libellula.

LIBER, li'ber, *s.* The inner bark of a plant, consisting of a layer of woody tissue, the cellular substance and vessels of the latex forming a compact zone immediately applied to the wood. *Liber Regis*, another term for the *Valor Ecclesiasticus* of the 26th Henry VIII., the book containing an account of the valuation of the whole ecclesiastical property of England and Wales, in the state in

- which it stood on the eve of the Reformation.—In Mythology, one of the names of Bacchus.
- LIBERA**, lib'er-a, *s.* In Mythology, the name of the goddess whom Cicero, in his book *De Natura Deorum*, represents as the daughter of Jupiter and Ceres. Ovid, in his *Fasti*, says that the name was given by Bacchus to Ariadne. She is represented on medals as a kind of female Bacchus, crowned with vine leaves.
- LIBERAL**, lib'er-al, *a.* (French, from *liberalis*, Lat.) Of a free, open, and generous heart; ready to give or bestow; not close or contracted; munificent; bounteous; giving largely; ample; large; not narrow or selfish; catholic; extensive; embracing literature and the sciences generally; candid; profuse; not literal or strict; not mean or gripping; not low in birth or mind; free to excess; licentious. *Liberal arts*, those arts which depend more on intellectual exertion and refined taste, as distinguished from those which require great manual labour, as the mechanical arts.
- LIBERAL-HEARTED**, lib'er-al-hart'ed, *a.* Having a generous heart.
- LIBERALIA**, lib'er-al'le-a, *s.* In Antiquity, feasts celebrated by the ancient Romans in honour of Liber, or Bacchus.
- LIBERALISM**, lib'er-al-izm, *s.* Liberal principles.
- LIBERALIST**, lib'er-al-ist, *s.* One who favours liberal opinions; an advocate of liberal sentiments.
- LIBERALITY**, lib'er-al'e-te, *s.* (*liberalitas*, Lat.) Munificence; bounty; a particular act of generosity; a donation; a gratuity; largeness of mind; catholicism; candour; impartiality.
- LIBERALIZE**, lib'er-al-ize, *v. a.* To render liberal or catholic; to enlarge; to free from narrow views or prejudices.
- LIBERALLY**, lib'er-al-le, *ad.* Bountifully; freely; largely; with munificence; magnanimously; with enlarged views; without selfishness or meanness; not strictly or literally.
- LIBERATE**, lib'er-ate, *v. a.* (*libero*, Lat.) To free; to release from restraint or bondage; to set at liberty; to manumit.
- LIBERATION**, lib'er-a'shun, *s.* (*liberatio*, Lat.) The act of setting free; deliverance.
- LIBERATOR**, lib'er-ay-tur, *s.* One who liberates or sets free.
- LIBERTARIAN**, lib'er-ta're-an, *a.* (from *liber*, free, Lat.) Pertaining to liberty, or to the doctrine of free-will, as opposed to the doctrine of necessity; —*s.* one who maintains the doctrine of the liberty of the will, in opposition to that of necessity.
- LIBERTARIANISM**, lib'er-ta're-an-izm, *s.* The principles or doctrines of Libertarians.
- LIBERTAS**, li-ber'tas, *s.* In Mythology, the goddess of Liberty. She was represented as a woman holding in one hand a cap, the symbol of liberty, and two poniards in the other.
- LIBERTICIDE**, li-ber'te-side, *s.* Destruction of liberty; —*a.* having a tendency to destroy liberty.
- LIBERTINAGE**. Same as Libertinism,—which see.
- LIBERTINE**, lib'er-tin, *s.* (*libertinus*, Lat.) In ancient Rome, a name given to a freedman, or one rescued from legal servitude; one unconfined; one free from restraint; a man who exercises no control on his animal passions, and gives unrestrained indulgence to lust and licentiousness; a rake; a debauchee; —*a.* licentious; dissolute; not under the restraint of law or religion. In Ecclesiastical History, the Libertines, or Libertini, formed a religious sect, which rose in the year 1525. Their principal tenet was, that the Deity was the sole operating cause in the mind of man, and the immediate author of all human actions; and consequently, the distinctions of good and evil which had been established with regard to these actions were false and groundless, and that men could not, properly speaking, commit sin. The Libertines of Genoa were a cabal of rakes rather than of fanatics, for they had no pretence to any religious system, but pleaded only for the liberty of voluptuous and immoral lives.
- LIBERTINISM**, lib'er-tin-izm, *s.* Licentiousness of opinion and practice; an unrestrained indulgence of lust; debauchery; lewdness; state of a freedman.—Seldom used in the last two senses.
- LIBERTY**, lib'er-te, *s.* (*libertas*, Lat.) Freedom, as opposed to slavery; exemption from tyranny, or inordinate government; freedom, as opposed to necessity; privilege; exemption; leave; permission; immunity; to take the liberty, to do or say anything; to use freedom not specially granted; to set at liberty, to deliver from confinement; to release from restraint.
- LIBETHENITE**, li-be'the-nite, *s.* (named from its occurring at Libethen, in Hungary.) The phosphate of copper, a mineral of a dark-green colour, occurring in small octahedral crystals and radiated masses. Its constituents are—phosphoric acid, 28.7; oxide of copper, 63.9; water, 7.4: sp. gr. 3.6. Hardness = 4.0.
- LIBIDINIST**, le-bid'e-nist, *s.* One given to lewdness.
- LIBIDINOUS**, le-bid'e-nus, *a.* (*libidinosis*, Lat.) Lewd; lustful.
- LIBIDINOUSLY**, le-bid'e-nus-le, *ad.* Lustfully; lewdly.
- LIBIDINOUSNESS**, le-bid'e-nus-nes, *s.* The state or quality of being lustful; inordinate appetite for venereal indulgence.
- LIBINA**, le-bi'na, *s.* A name given by Dr. Leach to a genus of Brachyurous Crustaceans, and placed by Mr. Bell under the family Moida.
- LIBINIA**, le-bin'e-a, *s.* A genus of Decapod Crustaceans: Family, Brachyura.
- LIBITINA**, le-be-ti'na, *s.* In Mythology, an Italian goddess, the patroness of funerals and undertakers, synonymous with Venus Infera of the Greeks. At her temple in Rome, a small coin, called *libitina ratio*, was deposited for every person who died.
- LIBRA**, li'bra, *s.* (Latin, a balance.) In Astronomy, the Balance (♎), a constellation of the zodiac surrounded by Scorpius, Ophiuchus, Virgo, Centaurus, and Lupus. The constellation is so named because the sun is in this sign at the autumnal equinox, when the days and nights are equal. In Antiquity, the Roman pound, equal to 5040 grains troy; also, a Roman coin equal to 20 denarii—hence our abbreviation £ for pound sterling, and lb for pound weight.
- LIBRAL**, li'bral, *a.* (*libralis*, Lat.) Of a pound weight.
- LIBRARIAN**, li-bra're-an, *s.* (*librarius*, Lat.) One who has the care of a library; one who transcribes or copies books.—Obsolete in the last sense.
- LIBRARIANSHIP**, li-bra're-an-ship, *s.* The office of a librarian.
- LIBRARY**, li'bra-re, *s.* (*librarium*, Lat.) A collection of books, either the property of a private

LIGHT-HEADED—LIGNINE.

LIGHT-HEADED, *lite'hed-ed, a.* Unsteady; loose; thoughtless; weak; disordered in the head; dizzy; delirious.

LIGHT-HEADEDNESS, *lite'hed-ed-ness, s.* Deliriousness; disorder of the head; dizziness.

LIGHT-HEARTED, *lite'hart-ed, a.* Gay; merry; cheerful; free from grief.

LIGHT-HEARTEDLY, *lite'hart-ed-le, ad.* With a light heart; cheerfully.

LIGHT-HEARTEDNESS, *lite'hart-ed-ness, s.* The state of being free from care or grief; cheerfulness.

LIGHT-HEELED, *lite'heeld, a.* Lively or active in walking; brisk.

LIGHT-HORSE, *lite'hawrs, s.* Light-armed cavalry.

LIGHTHOUSE, *lite'how, s.* A tower or building erected on a rock or point of land, with a light or number of lamps on the top, intended to direct seamen in navigating ships at night; a pharos.

LIGHT-LEGGED, *lite'legd, a.* Nimble; swift.

LIGHTLESS, *lite'les, a.* Wanting light; dark.

LIGHTLY, *lite'le, ad.* With little weight; without deep impression; easily; readily; without difficulty; of course; without reason; without dejection; cheerfully; not chastely; wantonly; nimbly; with agility; not heavily or tardily; gayly; airily; with levity; without heed or care.

LIGHT-MINDED, *lite'minde-ed, a.* Unsettled; unsteady; volatile.

LIGHTNESS, *lite'nes, s.* Want of weight; inconstancy; unsteadiness; unchastity; lewdness; wantonness; agility; nimbleness.

LIGHTNING, *lite'ning, s.* An electric phenomenon produced by the passage of electricity between one cloud and another, or between a cloud and the earth;—abatement; mitigation; alleviation.

LIGHT-ROOM, *lite'room, s.* In a ship of war, a small apartment having double-glass windows towards the magazine, and containing lights, by which the gunner fills cartridges.

LIGHTS, *lites, s. plur.* The lungs; the organs of breathing in animals, said to be so called from their lightness in proportion to their bulk.

LIGHTSOME, *lite'sum, a.* Luminous; not dark or obscure; gay; airy; cheering; exhilarating.

LIGHTSOMENESS, *lite'sum-ness, s.* Luminousness; the quality of being light; cheerfulness; merriment; levity.

LIGHT-SPIRITED, *lite-spir'it-ed, a.* Of a cheerful, sportive nature.

LIGIA, *li'je-a, s. (ligans, binding, Lat.?)* A genus of Crustaceans: Order, Isapoda.

LIGNEOUS, *lig'ne-us, a. (lignus, Lat.)* Wooden; made of wood; consisting of wood; resembling wood. In Entomology, applied to a part when it is composed of a hard inelastic substance like wood.

LIGNIFICATION, *lig-ne-fe-ka'shun, s.* The process of converting into wood, or the hard substance of a vegetable.

LIGNIFORM, *lig'ne-fawrm, a. (lignum, wood, and form, Lat.)* Like wood; resembling wood.

LIGNIFY, *lig'ne-fi, v. a. (lignum, wood, and facio, I make, Lat.)* To convert into wood;—*v. n.* to become wood.

LIGNINE, *lig'nine, s.* In Chemistry, woody fibre, or fibrous matter which forms the basis of wood, and of the stems and leaves of herbaceous plants. Formula, C₁₂H₈O₈. It forms about 95 per cent. of baked wood, and is the chief ingredient of linen, paper, and cotton.

LIGNIPEROUS—LIKE.

LIGNIPEROUS, *lig-ne-per'dus, a. (lignum, wood, and perdo, I destroy, Lat.)* Wood-destroying.

LIGNITE, *lig'nite, s. (lignum, wood, Lat.)* Fossil wood carbonized to a certain degree, but retaining its woody texture.

LIGNOUS.—See Ligneous.

LIGNUM, *lig'num, s.* The Latin word for wood. *Lignum colubrinum*, or *Snake-wood*, the wood of the tree *Strychnos colubrina*, so named from the roots being used in curing the bite of venomous snakes.

LIGNUMVITÆ, *lig-num-ve'te, s.* The wood of the plant *Guaiacum officinale*, a native of the West Indies, remarkable for the direction of its fibres, each layer of which crosses the preceding diagonally.

LIGUAS, *lig'u-as, s.* A name given by De Montfort for a genus of terrestrial testaceous Molluscs, belonging to the family Helicidae.

LIGULA, *lig'u-la, s. (Latin, a tie.)* In Botany, a membranous appendage at the apex of the sheathing petiole of grasses. The term is also applied to certain bodies proceeding from the base, and alternate with the horns, of the organ called *orbiculus* in plants, belonging to the order Asclepiadaceæ. In Entomology, the word has been applied by Latreille to the lower lip of insects, or labrum of English entomologists;—a measure of ten scruples; also, the name of a genus of Entozoa, forming the family Cestodea of Cuvier.

LIGULATE, *lig'u-late, a.* Like a bandage or strap. In Botany, *ligulate flowers* are such as have a monopetalous slit on one side, and opened flat, as in the Dandelion lilac.

LIGURITE, *lig'u-rite, s. (Liguria, the ancient name of a region in Italy.)* A mineral of a yellowish-green, or apple-green colour; the primitive form of the crystal, an oblique rhombic prism. It occurs in a talcose rock on the banks of the Strura, in the Apennines, and is said to form a gem superior to chrysolite in colour, transparency, and hardness. Its constituents are—silica, 57.45; alumina, 7.36; lime, 25.30; magnesia, 2.56; oxide of iron, 3.00; oxide of manganese, 0.5: sp. gr. 3.47. Hardness = 5.0—6.0.

LIGUSTICUM, *le-gus'te-kum, s. (so named from some of the species growing abundantly in Liguria.)* A genus of Umbelliferous herbaceous plants: Suborder, Orthospermae.

LIGUSTRUM, *le-gus'trum, s. (Latin name.)* The Privet, a genus of plants, consisting of shrubs or low trees, natives of Europe and Asia: Order, Jasminaceæ.

LIKE, *like, a. (lic, Sax. lit, Swed. leika, Goth.)* Equal in quantity, quality, or degree; similar; resembling; having resemblance; probable; likely; giving reason to expect or believe;—*s.* elliptically, for *like thing*, *like person*, some person or thing resembling another; an equal; *had like*, in the phrase, 'he had like to be defeated,' is authorised by good usage, but seems a corruption;—*ad.* in the same manner; in a manner becoming; likely; probably;—*v. a. (lican, lician, Sax. leikan, Goth.)* to choose with some degree of preference; to approve; to view with approbation; to please; to be agreeable to;—(obsolete in the last two senses;)
The music *likes* you not.—*Shaks.*
—*v. n.* to be pleased; to choose, as 'he may go or stay as he *likes*;' *to like of*, to be pleased.—Obsolete in the last sense.

LIKELIHOOD—LIMA.

LIMACELLA—LIMBER.

LIKELIHOOD, like'le-hôd, *s.* Probability; verisimilitude; appearance of truth or reality; appearance; show; resemblance.—Obsolete in the last three senses.

There is no likelihood between pure light and black darkness.—*Raleigh*.

LIKELINESS, like'le-nas, *s.* Probability; the qualities that please.

LIKELY, like'le, *a.* Such as may have taken place; probable; such as is more reasonable than the contrary; such as may be liked; pleasing;—*ad.* probably; as may reasonably be thought.

LIKEMINDED, like minde-ed, *a.* Having a like disposition or purpose.

LIKEN, li'kn, *v. a.* (*liken*, Swed.) To represent, as having resemblance; to compare.

LIKENESS, like'nes, *s.* Representation; resemblance; similitude; form; appearance; a copy; a counterpart; a picture; image or statue, resembling a person or thing.

LIKEWISE, like'wize, *ad.* In like manner; also; moreover; too.

LIKING, li'king, *a.* Plump; full; of a good appearance;—(obsolete as an adjective);—*s.* a good state of body; healthful appearance; plumpness; inclination; pleasure; delight in; state of trial.—Obsolete in the last sense.

Forc'd with regret to leave her native sphere,
Came but a while on liking here.—*Dryden*.

LILAC, li'lak, *s.* The common name of the plants belonging to the genus *Syringa*.

LILACINE, li'l-a-sine, *s.* A principle discovered by Meillet in the lilac.

LILIACIOUS, li-l'e-a'shi-us, *a.* Resembling a lily; belonging to the order Liliaceæ; applied likewise by Link to a corolla, the petals of which have their unguis gradually dilating into a limb, and standing side by side—but it is seldom used in this sense.

LILIED, li'l'id, *a.* Embellished with lilies.

LILIUM, li'l'e-um, *s.* (Latin name.) A genus of plants: Type of the natural order Liliaceæ.

LILL.—See LOLL.

LILT, lilt, *v. a.* To sing or dance cheerfully and with vivacity; to do anything with dexterity or quickness.—Local in the last sense.

LILY, li'l'e, *s.* The common name of plants of the genus *Lilium*. *Lily encrinure*, the fossil zoophyte, *Encrinurus molliformis*, one of the most beautiful of the Crinoidean family, found in the Muschelkalk. It is so termed from the resemblance it bears to the head of a lily when the arms are folded. *Lily pink*, the plant *Aphyllanthes monspeliensis*. *Lily of the valley*, the beautiful plant *Convallaria*. *Lily thorn*, the name of the plants *Catesbea spinosa* and *Catesbea parviflora*.

LILY-HANDED, li'l'e-hand-ed, *a.* Having white delicate hands.

The lily-handed Långoro
Did feel his pulse.—*Spenser*.

LILY-LIVERED, li'l'e-liv-ard, *a.* White-livered; cowardly.—Seldom used.

A base, lily-livered, action-taking knave.—*Shaks*.

LIMA, li'ma, *s.* (*lima*, a file, Lat.) A genus of Mollusca, placed by Cuvier in the family Ostrea, and by Lamarck in that of Pectenides. The *Lima* differ from the *Pecten* in the greater length of the shell, in a direction perpendicular to the hinge; they have a wide opening for the passage of a

bysus, to which they are attached; the shell is a longitudinal, nearly equivalved, bivalve, with the beaks separated by a cavity; the hinge toothless, and the hinge pit, which receives the ligament, partly internal and partly external.

LIMACELLA, lim-a-sel'la, *s.* A genus of slugs, furnished with an internal rudimentary shell, or calcareous concretions in the thickness of the cuticle.

LIMACIANS, li-ma'she-ans, *s.* (*limaciens*, Fr.) A name under which Lamarck comprehends the slugs belonging to the genera *Onchidium*, *Parma*, *Limax*, *Testacella*, and *Vitrina*.

LIMACIDÆ, lim-a-se'de, *s.* (*limax*, one of the genera.) A family of Gasteropodous Mollusca, equivalent to that of the Limaciens of Lamarck,—which see.

LIMACINA, lim-a-se'na, *s.* A genus of Pteropodous Mollusca, the shell of which is very delicate, vitreous, spiral, not carinated, turning rather obliquely on itself, with a circular aperture and simple borders: Family, Hyalidæ.

LIMACINEÆ, lim-a-sin'e-a, *s.* (*limax*, a snail, Lat.) Blainville's name for a family of Pulmonobranchiate Mollusca, the animals of which are terrestrial snails; they all feed on vegetable substances, and have two pair of retractile tentacula; the shell variable, rarely subampullaceous; often normal, oval, or globular; sometimes turriculated, papaceous, or discoid; the aperture round, semilunar over, or angular, but never notched. It contains the genera *Succinea*, *Bulimus*, *Achintina*, *Clausilia*, *Pupa*, *Anastoma*, *Hilex*, *Helicolimax*, *Testacella*, *Parma*, *Limacella*, *Limax*, and *Onchidium*.

LIMACODES, lim-ak'o-dis, *s.* A genus of Lepidopterous insects, belonging to the family Nocturnæ of Cuvier.

LIMATION, li-ma'shun, *s.* (from *limo*, I file, Lat.) The act of filing or polishing.

LIMATURE, li'ma-ture, *s.* A filing; filings; particles rubbed off by filing.

LIMAX, li'maks, *s.* (Latin, a snail.) A genus of air-breathing, naked Mollusca, generally known under the name of snails or slugs.

LIMB, lim, *s.* (*lim*, Sax. *lem*, Dan. and Swed. *limbus*, Lat.) Edge or border. In Astronomy, the edge of a planet is called its *limb*; as also the edge of any circle which forms any part of an astronomical instrument;—*v. a.* to supply with limbs; to dismember; to tear off the limbs.

LIMBAT, lim'bat, *s.* The name given to a cooling periodical wind in Cyprus.

LIMBATE, lim'bate, *a.* In Botany, having a dilated surface.

LIMBEC, lim'bek, *s.* (contracted from *alembic*.) A still;

Her cheeks, on which this streaming nectar fell,
Still'd through the limbec of her diamond eyes.—*Fairfax*.

—*v. a.* to strain as through a still.—Obsolete.

The greater do nothing but limbec their brains in the art of alchemy.—*Sandys*.

LIMBED, limd, *a.* Formed with regard to limbs.

LIMBER, lim'bur, *a.* Flexible; easily bent; pliant; yielding;

You may put me off with limber vows.—*Shaks*.

In a ship, a square hole cut through the lower part of the floor timbers, forming a channel for

LIMBERNESS—LIMESTONE

water, and communicating with the pump-well.
Limber-boards, short pieces of plank, forming a part of a ship's floor, immediately above the limbers. *Limber-kentledge*, pigs of iron or lead, cast to fit in between the floor timbers, or in the limbers. *Limber-rope*, a long rope retained in the limber-holes of a ship, for the purpose of clearing them from any obstructions occasioned by mud or other matter, by which they may be choked.
LIMBERNESS, lim'bur-nēs, *s.* The quality of being easily bent; flexibility; pliancy.
LIMBERS, lim'burz, *s.* In Artillery, a sort of advanced train, to which the carriage of a cannon is attached in a march. It is composed of two shafts, wide enough apart to admit a horse between them, joined by two bars of wood, and mounted on a pair of wheels;—thills; shafts of a carriage.—Local in the last two senses.
LIMBILITE, lim'be-lite, *s.* (from its being found in the volcanic hill of Limbourg, in Swabia.) A mineral which occurs in irregular grains; structure compact; scratches glass; colour, a honey yellow; melts into a black enamel. It is supposed to be a decomposed olivine.
LIMBLESS, lim'les, *a.* Destitute of limbs.
LIMBMEAL, lim'meel, *ad.* Piecemeal.
 O! that I had her here to tear her limbmeal.—*Shaks.*
LIMBO, lim'bo, } *s.* (*limbus*, a hem or edge, Lat.)
LIMBUS, lim'bus, } The purgatory of the Roman Catholic Church, supposed to lie on the edge or neighbourhood of hell;
 O what a sympathy of woe is this!
 As far from help as limbo is from bliss.—*Shaks.*
 any place of misery and restraint.
 Friar, thou art come off thyself, but poor I am left in limbo.—*Dryden.*
LIMBUS, lim'bus, *s.* That portion of the petal of a flower which is supported by the unguis. It constitutes the broad thin coloured part which renders many flowers so beautiful.
LIME, lime, *s.* (*lim*, Sax. and Dan.) The oxide of calcium, consisting of calcium, 72.00 (its metallic base), and oxygen, 28.00. Lime does not exist in nature in a pure state. Its strong affinity for carbonic acid causes it to absorb it instantaneously from the atmosphere, and to be converted into the carbonate of lime, constituting the different kinds of limestone, marble, and chalk, and forming no small portion of the strata of the earth. Lime is a white or grey earth, fusible only by the heat of a galvanic battery or a gas blow-pipe. It is exceedingly caustic, and when water is cast on it great heat is produced. The water unites with lime, and forms a hydrate. *Lime-tree*, the *Tilia Europæa*; or otherwise called the Linden-tree. *Lime-water*, an aqueous solution of lime. Lime is very soluble in water, and less so in hot than in cold water. *Lime*, in Botany, the Citrus limetta;—*v. a.* (*geliman*, Sax.) to smear with a viscous substance; to entangle; to ensnare; to manure with lime; to cement.
LIMEBURNER, lime'bur-nur, *s.* One who burns stones to lime.
LIMEHOUND, lime'hownd, *s.* A name given to the bloodhound.
LIMEKILN, lime'kil, *s.* A furnace in which stones or shells are subjected to a strong heat, and reduced to lime.
LIMESTONE, lime'stone, *s.* A genus of minerals, of

LIMETWIG—LIMITEDLY.

which there are many species. When pure, it is composed of lime, or oxide of calcium, 57.00; and carbonic acid, 43.00; but many limestones are intermixed with magnesia, clay, silica, or iron. The specific gravity varies from 2.50 to 2.80. All limestones may be scratched with a knife, and effervesce with the acids.
LIMETWIG, lime'twig, *s.* A twig smeared with lime.
LIMETWIGGED, lime'twigd, *a.* Smeared with lime; prepared to entangle.
LIMEUM, li'me-um, *s.* (*loimos*, pestilence, Gr. from its poisonous qualities.) A genus of plants, natives of the Cape of Good Hope: Order, Portulacæ.
LIMICULA.—See *Limosa*.
LIMIT, lim'it, *s.* (*limes*, Lat. *limites*, Fr.) Bounded; border; utmost extent; the part or thing which terminates; restraint. In the plural, the extent of the liberties of a prison;—*v. a.* to confine within certain limits; to circumscribe; to restrain; to restrain from a lax or general signification. In Mathematics, the word *limit* implies a fixed magnitude, to which a variable and fixed limit may be made as nearly equal as we please; it being impossible, however, that the variable magnitude can absolutely attain, or be equal to, the fixed magnitude. *Method of limits*, the same with the method of prime and ultimate ratios; a peculiar method of analysis, employed by Newton in the *Principia*, equivalent to fluxions, or the differential calculus, but preserving the form of the ancient geometry.
LIMITABLE, lim'it-a-bl, *a.* That may be limited, bounded, restrained, or circumscribed.
LIMITANEOUS, lim-e-ta'ne-us, *a.* Pertaining to bounds.
LIMITARIAN, lim-e-ta're-an, *s.* One who limits; one who maintains the doctrine, that only a part of the human race are to be saved;—*a.* that limits or circumscribes.
LIMITARY, lim'it-ar-e, *a.* Placed at the limit, as a guard.
LIMITATION, lim-e-ta'shun, *s.* (*limitatio*, Lat.) The act of circumscribing or bounding; restriction; restraint; circumscription; confinement from a lax, indeterminate import; a certain precinct, within which friars were allowed to beg or exercise their functions.
 Some pulpits have not had foure sermons these fiftene or sixtene yeares, since friars left their limitations.—*Bp. Gilling.*
Limitation of actions at law, the period beyond which personal actions of trespass, or debt on simple contract, must, by stat. 21 James I. c. 16, be commenced within six years after the cause of action, with the exception of actions of assault, menace, and imprisonment, which are limited to four. Penal actions for forfeitures, made by statute, must, according to the terms of the statutes, be commenced within one or two years. By stat. 3 and 4 Wm. IV. c. 27, all processes for the recovery of land by entry and distress, or by action, must be commenced within twenty years after the right of action accrues.
LIMITED, lim'it-ed, *a.* Narrow; circumscribed. *Limited problem*, in Geometry, a problem that has but one solution, or which can be solved but in one way.
LIMITEDLY, lim'it-ed-le, *ad.* With limitation.

LIMITEDNESS—LIMONA.

LIMITEDNESS, lim'it-ed-nes, *s.* State of being limited.

LIMITEE, lim'it-ur, *s.* He or that which limits or confines; a friar who was licensed to beg, or exercise his functions, within certain defined boundaries.

LIMITLESS, lim'it-less, *a.* Unbounded; having no limits.

LIMMA, lim'ma, *s.* (*limma*, a remainder, Gr.) In ancient Greek Music, that which remains of the greater tone when the apotome is taken from it. The greater tone, as for instance C D, is divisible into nine commas; of these, five constitute the apotome, four remaining for the limma; and for all practical purposes it may be considered as the minor semitone of the modern scale.

LIMMER, lim'mur, *s.* See Limebound;—a thill or shaft.—Local. See Limber;—a thill horse.

LIMM, lim, *v. a.* (*enluminer*, Fr.) To draw or paint; to paint in water-colours.

LIMNADIA, lim-na'de-a, *s.* (*limne*, a marsh, or lake, Gr.) A genus of Entomostracans: Order, Branchiopoda.

LIMNÆA, lim-ne'a, *s.* (*limne*, a marsh, pool, or lake, Gr.) A genus of fresh-water Mollusca, in which the shell is delicate, fragile, and of an oval oblong shape, with a spire more or less sharp or elongated, and an aperture longer than it is wide; oval, sometimes very large, with a sharp edge; not continuous, on account of the convexity of the preceding whorl; an oblique plait on the columella.

LIMNÆIDÆ, lim-ne'e-de, *s.* (*limnæa*, one of the genera.) The Limnæans, or Limnææ of Lamarck, &c.) A family of fresh-water testaceous Molluscs, consisting of the genera limnæa, planorbis, and physa.

LIMNANTHES, lim-nan'thes, *s.* (*limne*, a lake, and *anthos*, a flower, Gr.) A genus of plants: Order, Tropæaceæ.

LIMNERIUS, lim-ne'be-us, *s.* (*limne*, a marsh, and *bios*, life, Gr.) A genus of Coleopterous insects: Family, Palpicornes.

LIMNER, lim'nur, *s.* (*enluminer*, Fr.) A painter; one who decorates books with initial pictures.

LIMNEUS.—See Limnæa.

LIMNICHUS, lim-nik'e-us, *s.* (meaning not given.) A genus of Coleopterous insects, belonging to the tribe Dermistini, and family Clavicornes of Cuvier.

LIMNING, lim'ning, *s.* The act or art of drawing or painting in water-colours.

LIMNORIA, lim-no'be-a, *s.* (*limne*, a marsh, and *bios*, life, Gr.) A genus of Dipterous insects: Family, Nemocera.

LIMNOCHARIS, lim-nok'a-ris, *s.* (*limne*, a marsh, and *charis*, dear, Gr.) A genus of Arachnides, belonging to the tribe Acarides, and family Hyletra of Cuvier.

LIMNOCHARIS, lim-nok'a-ris, *s.* (*limne*, a marsh, and *charis*, dear, Gr.) A genus of marsh plants: Order, Hydrocharidaceæ.

LIMNOPHILA, lim-nof'e-la, *s.* (*limne*, a lake, and *phileo*, I love, Gr. in reference to the plants loving water.) A genus of plants, consisting of erect marsh or aquatic plants: Order, Scrophulariaceæ.

LIMNORIA, lim-no're-a, *s.* (*limne*, a marsh, and *oros*, a boundary, Gr.) A genus of Crustaceans: Order, Isopoda.

LIMONA, le-mo'na, *s.* The specific name of the lemon, *Citrus limona*.

LIMONIA—LINARITE.

LIMONIA, le-mo'ne-a, *s.* (*lymoun*, the Arabic name of the Citron, so called from the fruit of the species having the appearance, as well as the acidity, of the Citron.) A genus of plants, including a heterogeneous mass of species: Order, Aurantaceæ.

LIMOSA, lim-o'sa, *s.* (*limus*, mud, Lat.) The Godwits, a genus of birds of the Snipe kind: Family, Scolopaciæ.

LIMOSELLA, lim-o-sel'la, *s.* (dim. of *limus*, mud, Lat. in reference to the plants growing in muddy places.) A genus of plants, consisting of small creeping marsh shrubs or herbs: Order, Scrophulariaceæ.

LIMOUS, li'mus, *a.* (*limosus*, Lat.) Muddy; alimy; thick.

LIMP, limp, *v. n.* (from *lemp*-healt, lame, Sax.) To halt; to walk lamely;—*s.* a halt; act of limping;—*a.* vapid; weak.—Obsolete as an adjective.

LIMPER, limp'ur, *s.* One who limps in his walking.

LIMPID, lim'pid, *a.* (*limpidus*, Lat.) Clear; pure; transparent.

LIMPIDNESS, lim'pid-nes, *s.* Clearness; purity.

LIMPINGLY, limp'ing-le, *ad.* Lamely; in a halting manner.

LIMULUS, lim'u-lus, *s.* (*limus*, mud, Lat.) A genus of Entomostraca, furnished with six pairs of feet, beset with small spines, and are so closely approximated about the mouth as to serve the office of jaws. The Limuli are commonly known under the names of King Crabs, Shoe or Mollucca Crabs. The tail is long, straight, sharp-pointed, and of sufficient strength and size to be used as a spear-head or arrow-point by savages.

LIMY, li'me, *a.* Viscous; glutinous; containing lime; resembling lime.

LIN, lin, *v. n.* (*linna*, Icel.) To yield or cease; Set a beggar on horseback, he'll never sit till he be a gallop.—Ben Jonson.

—*s.* (Celtic,) a pool or mere.—Obsolete.

LINACE, le-na'se, } *s.* (*linum*, one of the genera.)

LINÆA, le-ne'e, } A natural order of Exogenous plants, composed of herbs or subshrubs, bearing yellow, blue, or white fugaceous petals, with entire extipulate leaves, and having the flowers always disposed in racemose corymbs or panicles; calyx usually with five sepals; the petals equal in number, and alternating with the sepals, hypogynous and unguiculate at the base; stamens five; anthers ovate, inserted by the base, two-celled, and birimose; ovary subglobose; capsule globose; seeds ovate; compressed, shining, inverted.

LINANTHUS, lin-an'thus, *s.* (*linon*, flax, and *anthos*, a flower, Gr. from the resemblance of the flowers to several species of *Linum*.) A genus of plants, natives of California: Order, Polemoniaceæ.

LINARIA, li-na're-a, *s.* (*linon*, flax, Gr. owing to a similarity in the leaves to the *Linum*.) Toad-flax, a genus of plants: Order, Scrophulariaceæ. Also, the name given by Ray and other ornithologists to a genus of birds, comprehending certain species of the *Fringilla* of Linnaeus, the Linnets.

LINARITE, lin'a-rite, *s.* (so named from occurring at Linares, in Spain.) The cupreous sulphate of lead, a mineral of a deep azure-blue colour, with a vitreous or adamantine lustre; primitive form of the crystal, a right rhombic prism; transparent; translucent; consists of sulphate of lead, 74.4; oxide of copper, 18.0; water, 4.7: sp. gr. 7.9.

5.3—5.4. Hardness = 2.5—3.0. Found also at Leadhills, in Scotland.

LINCANIA, lin-ka'ne-a, *s.* (an anagram of *Caligni*, the Guiana name of one of the species.) A genus of plants, consisting of small trees, natives of Guiana and Brazil: Order, Chrysobalanaceæ.

LINCH, linsh, *s.* A rectangular projection; a ledge.

LINCHPIN, linsh'pin, *s.* (*lynis*, Sax.) A pin used to prevent the wheel of a carriage from sliding off the axle-tree.

LINCOLNGREEN, ling-kon-green', *s.* The colour of stuff or cloth formerly made at Lincoln.

LINCONIA, ling-ko'ne-a, *s.* (supposed to be in honour of some botanist of the name of Lincoln.) A genus of plants, consisting of heathlike shrubs, natives of the Cape of Good Hope: Order, Bruniceæ.

LINDERNIA, lin-der'ne-a, *s.* (in honour of Belthasar a Lindern, physician at Strasburg.) A genus of slender herbaceous plants: Order, Scrophulariaceæ.

LINDLEYA, lind-le'a, *s.* (in honour of John Lindley, F.R.S., Professor of Botany, London University.) A genus of plants, consisting of a tree from twenty to thirty feet high, with white bracteate flowers, a native of Mexico: Order, Rosaceæ.

LINE, line, *s.* (*linea*, Lat.) Longitudinal extension; a slender string; a thread, string, or cord, extended to direct any operation; lineament; a mark on the hand or face; delineation; sketch; contour; outline; exterior limit of a figure. In Writing, Printing, and Engraving, the words and letters which stand on a level in one row, between one margin and another; a short letter; a note; method; disposition; extension; limit; border; a straight extended mark; a straight or parallel direction; occupation; employment; department or course of business; course; direction; lint or flax;—(seldom used in the last sense.)

Nor any weaver, which his worke doth boast
In diaper, in damaske, or in *line*.—*Spenser*.

In a Scriptural sense, a cord for measuring; also, instruction or doctrine. In Geometry, a quantity extended in length only. It is sometimes considered as generated by the flux or motion of a point, and sometimes as the limit and termination of a superficies, without, however, forming any part of the superficies itself. *Lines* are generally distinguished into right and curve lines. *Right lines*, considered with regard to their position, are perpendicular, oblique, or parallel. *Curve lines*, or *curves*, are distinguished into geometrical and mechanical. *Line of measures*, that line in which falls the diameter of any circle that is to be projected. *Line of numbers*, a line usually placed on carpenters' and other rules, which, running parallel with them, shows the logarithms; it is also called *Gunter's line*, because he was the inventor of it. In Astronomy, *line of the apsides*, or *of the apses*, the line joining the two apses, or the longer axis of a planet. *Fiducial line*, the index line, or edge of the ruler, which passes through the middle of an astrolabe or other instrument, on which the sights are fitted, and the divisions marked. *Line of the nodes*, that which joins the nodes of the orbit of a planet, being the common section of the plane of the orbit with the plane of the ecliptic. In Fortification, that which is drawn on the ground of the field from one point to another. This may be either a trench with a parapet, or a row of gabions, &c., to cover the men from the fire, &c.

Lines are most commonly made to shut up an avenue or entrance to some place, and are distinguished into *lines of approach*, *of defence*, *of communication*, *contravallation*, &c. In Perspective, *geometrical line*, a right line drawn in any manner on the geometrical plane. *Ground* or *fundamental line*, is the common intersection of the geometrical plane, and the plane of the picture. *Line of the front*, any line parallel to the ground line. *Horizontal line*, the common section of the horizontal plane, and that of the representation or draught. *Vertical line*, the intersection of a vertical plane with the picture passing along the station line. *Visual line*, the line or ray conceived to pass from the object to the eye. *Objective line*, any line drawn on the geometrical plane, whose representation is sought for in the draught or picture. *Lines of light and shade*, those in which the light and shade of a body are separated. Thus, on a curved surface, it is the line determined by a tangent to the surface in the direction of the rays of light. In Military affairs, *line* is used in different senses in application to the army—as, 1. The regular troops, in distinction from other establishments of a military nature. All numbered and marching regiments are called the *line*, in distinction from the militia, volunteers, fencibles, yeomanry, marines, &c. The guards, however, form an exception to this rule, not being reckoned of the line. 2. *Line*, or *line of battle*, the disposition of an army. European armies are commonly drawn up in three lines, which were formerly distinguished by the names of the *van*, or *advance guards*, the *main body*, and the *rear guard*. The term is applied in this sense in many phrases—as, 'the *line* is well-dressed,' when no part is out of the straight alignment; *to form the line*, to arrange the men in the order of battle; *to break the line*, to change the direction from that of a straight line, in order to obtain a cross fire; also, to destroy the enemy's order of battle, and to put them into confusion; 'the *line* turns out,' when the men are drawn out in a line. *Lines of support*, the lines of attack which are formed to support one another. *Lines of march*, signify either the tactical succession of the component parts of an army that is put in motion, or the bodies of armed men. *Line of march* signifies also any distance of ground over which armed bodies move in regular succession. *Line of operation*, that line which corresponds with the line of communication, and proceeds from the base point. *Retiring line*, a body of armed men that has advanced against an opposing enemy in order of battle, withdrawing itself with regularity from the immediate scene of action. *Line-firings* are executed separately and independently by each battalion. *Line of demarcation*, a line which is drawn by the consent of the parties to ascertain the limits of certain lands and territories belonging to different powers. In Navigation, *line* is used in different senses and applications at sea, denoting—1. The arrangement or order in which a fleet of ships of war are disposed to engage an enemy. 2. A general name for the small ropes used in a ship, formed of two or more strands of fine thread; as the *deep-sea line*, a long line marked at every five fathoms with small strands of line knotted; it is used with the deep-sea lead; *white line*, that which has not been tarred, in distinction from the

tarred line, &c. In Conchology, *lines of growth* are those concentric markings or lines in a shell, formed by successive layers of a shelly matter, which mark its growth. The external layer is always the most recent. In Botany, those concentric annual layers observable in the cross section of the stem of an exogenous plant. In Genealogy, a series or succession of relations in various degrees, all descending from the same common father. In Geography and Astronomy, *horizontal line*, a line drawn parallel to the horizon on any part of the earth. In Geography, *equinoctial line*, a great circle on the earth's surface, exactly at the distance of ninety degrees from each of the poles, and consequently bisecting in that part. *Meridian line*, an imaginary circle drawn through the two poles of the earth and any part of its surface. In Geology, *line of dip*, the declivity of strata from a horizontal line. Strata almost always decline or dip from some point of the horizon, and of course rise towards the opposite point. A line drawn through these points is called their *line of dip*; a line drawn at right angles to the line of dip is called the *line of bearing*, or *level*. In Heraldry, *lines* are the figures used in armorial bearings to divide the shield into different parts, and to compose different figures. In Mechanics, *line of centres*, a line drawn from the centre of one wheel to the centre of another, when their circumferences touch each other. *Line of direction*, the line in which motion is communicated. In Music, *lines* are five parallel lines forming, together with the intermediate spaces, the staff on which the notes and other characters are placed. *A ship of the line*, a ship of war large enough to have a place in the line of battle; a ship carrying seventy-four guns or more;—*v. a.* to cover on the inside; to put in the inside; to place along by the side of anything for guarding; to strengthen by additional works or men; to cover; to add a covering; to strengthen with anything added; to impregnate, applied to irrational animals.

LINEA, lin'e-a, *s.* (Latin, a line.) *Linea alba*, a white line, formed by the meeting of the tendons of the abdominal muscles; it extends from the ensiform cartilage to the pubes. *Linea semicircularis*, a semicircular line, formed by the abrupt termination of the fibres of the abdominal muscles, and extending from the pubes to the ribs, nearly parallel with the former. *Linea transversales*, transverse tendinous lines, passing from the linea semicircularis to the linea alba. *Linea innominata* (an unnamed line), an elevated line, forming a part of the brim of the pelvis.

LINEAGE, lin'e-ajc, *s.* (*lignage*, Fr.) Race; progeny; family, ascending or descending.

LINEAL, lin'e-al, *a.* Composed of lines; delineated; descending in a direct line from an ancestor; hereditary; derived from ancestors; allied by direct descent; in the direction of a line.

LINEALITY, lin'e-al'e-te, *s.* The state of being in the form of a line.

LINEALLY, lin'e-al-le, *ad.* In a direct line.

LINEAMENT, lin'e-a-meent, *s.* (French.) Feature; form; make; the outline or exterior of a body or figure, particularly of the face.

LINEAR, lin'e-ar, *a.* (*linearis*, Lat.) Pertaining to a line; consisting of lines; in a straight direction. In Botany, applied to narrow leaves when they are of equal breadth throughout, the two edges being

VOL. II.

straight and equidistant from each other. In Entomology, a figure having the lateral margins very close together and parallel throughout. In Conchology, composed of lines; marked with lines. *Linear equations*, in the integral calculus, are those in which the unknown quantity is only of the first degree. *Linear numbers*, in Mathematics, such as have relation to length only, like a number which represents one side of a plane figure. If the plane figure be a square linear figure it is called a *root*. *Linear perspective*, is that which regards only the positions, magnitudes, and forms of objects. *Linear problem*, that which is solved geometrically by the intersection of two right lines. This is called a *simple problem*, and is capable of one solution only.

LINEAR-SHAPED, lin'e-ar-shaypt, *a.* In the form of a line.

LINEATE, lin'e-ate, *a.* In Botany, marked longitudinally with depressed parallel lines.

LINEATION, lin'e-a-shun, *s.* Draught; delineation.

LINEN, lin'in, *s.* (*linum*, Lat.) Cloth made from the fibres of the flax plant, though the term is now applied to all kinds of hempen cloth; an under garment;—*a.* (*lineus*, Lat.) made of flax; resembling linen cloth; white; pale.

LINENDRAPER, lin'in-dray-pur, *s.* A person who deals in linens.

LINO, ling, *s.* (*leng*, Dut.) In Ichthyology, the *Gadus molva* of Linnaeus, and *Lota molva* of Yarrel. It is a large fish, and forms an important article of commerce. In Botany, a species of bent grass, the *Scirpus cespitosus* of Linnaeus is so called. *Ling heather*, or common heath, the plant *Calluna vulgaris*, the *Erica vulgaris* of Linnaeus: Order, *Ericaceae*.—A Saxon termination, as in *darling*, *firstling*, &c., denoting, in its primary signification, state, condition, or subject. In some words it also denotes the young of an animal, or a small one.

LINGER, ling'gur, *v. n.* (*leng*, Sax.) To delay; to loiter; to remain or wait long; to be slow; to hesitate; to be slow in deciding; to remain long in any state;—*v. a.* to protract.—Seldom used as an active verb.

She lingers my desires.—Shaks.

LINGERER, ling'gur-ur, *s.* One who procrastinates or delays.

LINGERING, ling'gur-ing, *a.* Remaining long; protracted;—*s.* tardiness; protraction.

LINGERINGLY, ling'gur-ing-le, *ad.* With delay; slowly; tediously.

LINGET, ling'get, *s.* (*lingot*, Fr.) A small mass of metal.

LINGLE, ling'gl, *s.* (*lignoul*, Fr.) Shoemakers' thread.—Obsolete.

His aule and lingle in a thong.

His tare-box on his broad belt hong.—

Drayton.

LINGO, ling'go, *s.* (*lingua*, the tongue, Lat.) Language; speech.—Vulgar.

LINGUA, ling'gwa, *s.* (Latin, a tongue.) In Entomology, the organ situated within the labium, or emerging from it, by which insects, in many instances, collect their food, and pass it down the pharynx, which is situated above its root.

LINGUACIOUS, ling-gwa'shus, *a.* Full of tongue; loquacious; talkative.

LINGUADENTAL, ling-gwa-den'tal, *a.* Formed or

51

LINGUAFORM—LINKBOY.

uttered by the joint use of the tongue and teeth, as the letters *d* and *t*;—*s.* an articulation formed by the tongue and teeth.

LINGUAFORM, ling'gwa-fawrm, *a.* Having the form or shape of the tongue.

LINGUA FRANCA, ling'gwa frang'ka, *s.* A species of corrupt Italian, spoken chiefly on the coasts of the Mediterranean.

LINGUAL, ling'gwal, *a.* Pertaining to the tongue. In Anatomy, used to designate divers organs and blood-vessels which constitute the apparatus of the tongue.

LINGUELLA, ling-gu-el'la, *s.* (*lingua*, a tongue, Lat. from the shape of the animal.) A genus of Inferobranchiate Gasteropods, considered by Rang as identical with the Diphylidia of Cuvier, which name is retained.

LINGUIST, ling'gwist, *s.* A person skilled in languages.

LINGULA, ling'gu-la, *s.* A genus of bivalvular Mollusca, in the shells of which the two valves are nearly equal, and truncated anteriorly; the hinge without teeth; the beak of the valves pointed, and united to a tendinous tube, serving for a ligament. It is the only recent bivalve which is pedunculated. It abounds in the fossil state.

LINGULATE, ling'gu-late, *a.* Shaped like the tongue or a strap.

LINGULINA, ling-gu-li'na, *s.* (dim. of *lingula*.) A genus of microscopic Foraminifera, belonging to the family Styostegua of M. D. Orbigny.

LINGY, lin'je, *a.* Limber; tall; flexible; active; strong; able to bear fatigue.

LINIMENT, lin'e-ment, *s.* In Pharmacy, a remedy for external use by means of friction, ordinarily composed of oil, soap, or camphor and ammonia.

LINIMENTUM, lin-e-men'tum, *s.* A liniment, or embrocation; an external application, having the consistence of an oil or balsam.

LINING, li'ning, *s.* The inner covering of anything, as of a garment or a box; that which is within. In Architecture, any covering for an interior surface. *Linings of boxes*, for window shutters, are pieces of framework, into which the window shutters are folded back. *Linings of a door*, those of the sides of apertures of doors called the jambs, or jamb-linings; that which covers the head being called the soffit. *Lining out stuff*, the drawing lines on a piece of board or plank, so as to cut it into thinner pieces.

LINK, link, *s.* (*gelenk*, Germ. *lenke*, Dan.) A single ring or division of a chain; anything doubled and closed like a link; a chain; anything connecting; any single constituent part of a connected series; a series; a chain; (*lynchus*, Lat.) a torch made of tow or hards, &c., and pitch;

One that bore a link.
On a sudden clapp'd his flaming cudgel.—
Butler.

the rein or thong with which a cavalry soldier links horses together, that they may not disperse. A *link*, in Gunter's scale, extends to a hundred links, each measuring 7.92 inches, the entire length being 66 feet, or 4 poles;—*v. a.* to complicate, as the links of a chain; to unite; to conjoin in concord; to join; to connect;—*v. n.* to be connected.

LINKBOY, link'boy, } *s.* A boy or man that carries a link or torch to light passengers.
LINKMAN, link'man, }

LINNÆA—LIORRHYNCHUS.

LINNÆA, lin-ne'a, *s.* (this little neglected plant Linnæus selected to transmit his own name to posterity.) A genus of plants, consisting of an elegant trailing shrub, a native of the north of Europe. It occurs in an old fir-wood at Inglemiedie, on the borders of Nairnshire, and has been discovered in several similar situations in the Scottish highlands: Order, Caprifoliaceæ.

LINNÆAN, lin-ne'an, *a.* Pertaining or according to the classification of the celebrated naturalist, Linnæus.

LINNET, lin'net, *s.* (*linote*, Fr.) A name given to birds of the genus *Linaria*, forming a portion of the genus *Fringilla* of Linnæus. The linnets are well-known British birds, and much esteemed for the sweetness of their song.

LINOCIERA, le-no-se-e'ra, *s.* (in honour of Geoffrey Linocier, physician at Tournon, in the Vivaraes.) A genus of plants, consisting of evergreen trees, with white or yellow flowers: Order, Oleaceæ.

LINSEED, lin'seed, } *s.* (*leinsaat*, Germ.) The
LINTSEED, lint'seed, } seed of the flax plant *Linum usitatissimum*.

LINSEYWOOLSEY, lin'se-wool'se, *s.* A kind of flannel, of which the wool only is composed of wool, the warp being thread;—*a.* made of linen and wool mixed; vile; mean; of different and unsuitable parts.

Peel'd, patch'd, and piebald, *linseywoolsey* brothers—
Grave mummies! sleeveless some, and shirtless others.
—Pope.

LINSTOCK, lin'stok, *s.* A pointed staff, with a kind of fork at one end to hold a lighted match, used by gunners in firing cannon.

LINT, lint, *s.* (*linet*, Sax. *linterum*, Lat.) The dressed fibres of the flax plant *Linum usitatissimum*. In Surgery, the scrapings of linen cloth, used in dressing wounds, ulcers, &c.

LINTEL, lin'tel, *s.* (*linceau*, Fr. *lintel*, Span.) In Architecture, a horizontal piece of stone or timber over a door, window, or other opening, to discharge the superincumbent weight.

LINYPHIA, lin-ife-a, *s.* A name given by Latreille to a subgenus of Arachnides.

LION, li'on, *s.* (*leo*, *leonis*, Lat.) The common name of *Felis leonis*. The true Lions belong to the old world exclusively, and they were formerly widely and plentifully diffused, but at present they are confined to Asia and Africa, and are every day becoming more and more scarce. Fossil remains of the extinct lion, *Felis spelæa*, and other cats, some as large as lions, occur in the tertiary formations of Europe. *Lion of England*, in Heraldry, a lion passant, regardant. *Lion's tail*, the plant *Leonotis leonurus*. *Lion-tailed monkey* or *baboon*, the *Limia silenus* of Illiger, and *Cercopithecus silenus* of Linnæus. *American lion*,—see *Puma*.

LIONCEL, li'on-sel, *s.* In Heraldry, a small lion.

LIONESS, li'un-es, *s.* The female of the lion kind.

LION-HEARTED, li'un-hart-ed, *a.* Bold; daring; courageous; brave.

LIONLIKE, li'un-like, } *a.* Resembling a lion in
LIONLY, li'un-le, } courage or fierceness.

LION-METTLED, li'un-met-tld, *a.* Having the indomitable spirit or bravery of a lion.

LION'S-EAR.—See *Leonotis*.

LION'S-LEAF.—See *Leontice*.

LIORRHYNCHUS, li-o-ring'kus, *s.* (*lis*, a lion, and *rhynchus*, a snout, Gr.?) A genus of Entozoa: Family, Nematodea.

LIP-LIQUATE.

LIP, lip, *s.* (Dutch, *lippe*, Sax. *lippe*, Germ. and Dan.) The edge or border of the mouth; the edge of anything. In Botany, applied to the two divisions of a monopetalous corolla, where one portion takes a direction upwards and the other downwards. In Conchology, the two sides of the aperture are termed the *lips*; that which joins and frequently folds over the columella is called the *inner*, while the opposite is termed the *outer lip*. To make a *lip*, to drop the under lip in sullessness and contempt;—*v. a.* to kiss.—Obsolete as a verb.

A hand, that kings
Have *lips*, and trembled kissing.—*Shaks.*

LIPARIA, li-pa'-re-a, *s.* (*liparos*, brilliant, Gr. in allusion to the surface of the leaves.) A genus of Leguminous plants: Suborder, Papilionaceæ.

LIPARIS, li-pa'-ris, *s.* (*liparos*, shining with oil, fat, Gr.) The Sea-snail, a genus of fishes, the species of which resemble the gobies in form, and are found under stones at low water-mark. They are furnished with a single sucker, formed by the united ventrals and pectorals: Family, Discobuli.

LIPAROCLELE, li-pa-ro-se'-le, *s.* (*lipos*, and *kele*, a hernial tumour, Gr.) A fatty tumour of the scrotum.

LIPARUS, lip'a'-rus, *s.* (*liparos*, brilliant, Gr.) A genus of Coleopterous insects: Family, Rhynco-phora.

LIP-DEVOTION, lip-de-vo'shun, *s.* Devotion uttered by the lips merely, without touching or emanating from the heart.

LIP-GOOD, lip'gôd, *s.* Good in profession, without reality or practice.

LIP-LABOUR, lip'lay-bur, *s.* Action of the lips without the concurrence of the mind; words without sentiments.

LIPLESS, lip'les, *a.* Without lips.

LIPLET, lip'let, *s.* A little lip.

LIPOGRAM, lip'o'-gram, *s.* (*leipo*, I leave, and *gramma*, a letter, Gr.) A writing in which a single letter is wholly omitted.

LIPOGRAMMATIC, lip-o'-gram-mat'ik, *a.* Relating to lipogram.

LIPOGRAMMATIST, lip-o'-gram-ma-tist, *s.* One who writes anything, dropping a single letter.

LIPOSTOMA, lip-os'to-ma, *s.* (*leipo*, I fall from, and *stoma*, a mouth, Gr.) A genus of plants, formed of the *Hedyotis campanuliflora* of Hooker: Order, Cinchonaceæ.

LIPOTENA, li-pot'e-na, *s.* (meaning not given.) A genus of Dipterous insects: Family, Pupipara.

LIPOTHYMOUS, li-poth'e-mus, *a.* Swooning; fainting.

LIPPED, lipp, *a.* Having lips. In Botany, labiate.

LIPPIA, lip'pe-a, *s.* (in honour of Augustine Lippi, a French physician, born in Paris of an Italian family.) A genus of plants, natives of Mexico: Order, Verbenaceæ.

LIPURA, lip-u'-ra, *s.* (*lipouros*, without a tail, Gr.) A name given by Illiger to the tailless Marmot of Pennant.

LIPURUS, lip'u'-rus, *s.* (*lipouros*, tailless, Gr.) A generic name, given by Goldfuss to a species of *Wombats*, marked as doubtful by Dr. Fischer.

LIP-WISDOM, lip'wis-dum, *s.* Wise sayings uttered without being reduced to practice, or supported by experience.

LIQUABLE, lik'kwa-bl, *a.* That may be melted.

LIQUATE, lik'kwate, *v. n.* (*liquo*, Lat.) To melt; to liquefy; to be dissolved.—Seldom used.

LIQUATION—LIRA.

LIQUATION, li-kwa'shun, *s.* The act or operation of melting; the capacity of being melted.

LIQUEFACTION, lik-kwe-fak'shun, *s.* (*liquefactio*, Lat.) The act of melting; the conversion of a solid into a liquid by the sole agency of heat or caloric; the state of being melted.

LIQUEFIABLE, lik-kwe-fi'a-bl, *a.* That may be melted or changed from a solid to a liquid state.

LIQUEFIER, lik-kwe-fi-ur, *s.* That which melts any solid substance.

LIQUEFY, lik'kwe-fi, *v. a.* (*liquefier*, Fr.) To melt; to dissolve; to convert from a solid form to that of a liquid;—*v. n.* to be melted; to become liquid.

LIQUESCENTY, li-kwes'sen-se, *s.* (*liquescentia*, Lat.) Aptness to melt.

LIQUESCENT, li-kwes'sent, *a.* Melting; becoming fluid.

LIQUEUR, le-kure', *s.* (French.) A spirituous cordial.

LIQUID, lik'kwid, *a.* (*liquidus*, Lat.) Fluid; flowing or capable of flowing; not solid; not forming one continuous substance; soft; clear; pronounced without any jar or harshness; smooth; dissolved, so as not to be attainable by law;—(obsolete in the last sense;)—a fluid or flowing substance; a substance whose parts change their relative position on the slightest pressure, and which flows on an inclined plane. In Grammar, a letter which has a smooth flowing sound, or which flows smoothly after a mute, as *l* and *r* in *bla*, *bra*; *m* and *n* are also termed liquids. *Liquid*, or *Saxon blue*, a solution of the sulphate of indigo.

LIQUIDAMBER, lik-kwid-am'bur, *s.* A genus of plants, so named from the amberlike resin called *Storax*, yielded by several of the species. It is the *Alingia* of Noronha, and constitutes the order *Balsamaceæ* or *Balsamiflæ*, the *Alingiacæ* of Lindley.—See *Balsamaceæ*.

LIQUIDATE, lik'kwe-date, *v. a.* (*liquido*, Lat.) To clear from all obscurity; to adjust; to settle; to ascertain to precision in amount; to pay, as a debt.

LIQUIDATION, lik-kwe-da'shun, *s.* The act of settling and adjusting debts, or ascertaining their amount.

LIQUIDATOR, lik'kwe-day-tur, *s.* He or that which liquidates or settles.

- MACROPYGIA**, mak-ro-pij'e-a, *s.* (*makros*, long, and *pygchos*, a snout, Gr.) A genus of birds: Family, Columbidae.
- MACROSCELIDES**, mak-ro-sel'e-des, *s.* (*makros*, long, and *skelos*, the leg and foot, Gr.) An insectivorous mammal, which inhabits the rocky mountains of the western part of the district of Algiers.
- MACROSCOPTIS**, mak-ro-sep'tis, *s.* (*makros*, long, and *skepos*, I cover, Gr. in reference to the calyx being larger than the corolla.) A genus of plants: Order, Asclepiadaceæ.
- MACROSEMIUS**, mak-ro-se'me-us, *s.* (*makros*, long, and *sema*, a mark, Gr.) A genus of fossil fishes found in the Oolite formation.
- MACROSPIRA**, mak-ro-spi'ra, *s.* (*makros*, long, Gr. *spira*, a spire, Lat.) A genus of Gasteropod Mollusca, the shell of which has the spire excessively long and subcylindrical; the body whorl largest; outer lip thin; the aperture oval: nearly allied to *Achatina*: Family, Helicidæ.
- MACROSPIS**, mak-ro-s'pis, *s.* (*makros*, long, and *opsis*, a shield, Gr.) A genus of Coleopterous insects: Family, Scarabæidæ.
- MACROSTYLIS**, mak-ro-s'te-lis, *s.* (*makros*, long, and *stylos*, a style, Gr.) A genus of plants, consisting of small shrubs with reddish flowers: Order, Rutaceæ.
- MACROTRACHIA**, mak-ro-trak'e-a, *s.* In Malacology, a tribe of the order Dythra, or bivalve shells, comprising such as have the animal furnished with two long respiratory siphons, either distinct or united; the margins often furnished with little teeth. It comprehends the families Pholidæ, Myadæ, Tellinidæ, Chamidæ, and Saxicavidæ.
- MACROTROPIS**, ma-krot'ro-pis, *s.* (*makros*, long, and *tropis*, a keel, Gr. from the keel of the flower being long.) A genus of Leguminous plants: Suborder, Papilionaceæ.

MACROTYS, ma-kro'tis, *s.* (*makros*, long, and *ous* otes, an ear, Gr. in reference to the nature of the capsule.) A genus of plants: Order, Ranunculaceæ.

MACROURA, mak-row'ra, } *s.* (*makros*, long, and *oura*, a tail, Gr.) The Long-tailed Crustaceans, a family of the Decapoda of Cuvier. It includes the lobsters, and all such as have the end of the tail provided with appendages, and is as long at least as the body.

MACTATION, mak-ta'shun, *s.* (*macto*, I kill, Lat.) In Antiquity, the act of killing a victim for sacrifice.

MACTRA, mak'tra, *s.* (Greek, a kneading-trough.) A genus of Mollusca, in which the shell is equi-valve; the valves gaping on one side; ligament external and internal; the cardinal teeth complicated: Family, Myadæ.

MACULÆ, mak'u-le, *s.* (Latin, spots.) Dark spots on the surfaces of the sun, moon, and on some of the planets. In Pathology, any spotted discolorations on the surface of the body. *Sing.* Macula.

MACULATE, mak'u-late, *v. a.* To stain; to spot. They would not maculate the honour of their people with such a reproach.—*Sir T. Elyot.*

MACULATE, mak'u-late, } *a.* Spotted; stained.

MACULATED, mak'u-lay-ted, } *a.* Spotted; stained.

MACULATION, mak-u-la'shun, *s.* Stain; spot; taint.

MAD, mad, *a.* (*gemaad*, Sax. *matto*, Ital.) Disordered in the mind; distracted; delirious; expressing disorder of mind, or proceeding from it; enraged; furious; inflamed to excess with desire; distracted with anxiety or trouble; extremely perplexed; infatuated; proceeding from folly. *Mad-apple*, or *Jew's-apple*, names of the egg-plant *Solanum melongena*;—*v. a.* to make mad; to make furious; to enrage;—*v. n.* to be mad or furious.

Many of them seiden, he hath a devel, and maddeth.—*Wickliffe, St. John x.*

MAD, mad, } *s.* (*matha*, Sax. and Goth.) An earthworm.—*Local.*

MADAM, mad'um, *s.* (*ma*, my, and *dame*, Fr.) A complimentary term of address, generally applied to married and elderly ladies.

MADAROSIS, mad-a-ro'sis, *s.* (Greek.) Falling off of the hair, especially of the eyelashes.

MADBRAIN, mad'brane, } *a.* Disordered in mind; ungovernable; hotheaded; rash.

MADCAP, mad'kap, *s.* (*mad*, and *caput*, the head.) An impetuous, hotheaded fellow; a rash, violent person; a madman.

MADDEN, mad'dn, *v. a.* To make mad;—*v. n.* to become mad; to act as if mad.

MADDER, mad'der, *s.* The common name of plants of the genus *Rubia*. The roots of *Rubia tinctorum* is used as a stuff for dyeing red.

MADE. *Past* and *past part.* of Make.

MADEFACTION, mad-e-fak'shun, *s.* (*madefacio*, I moisten, Lat.) The act of making wet.

MADEFY, mad'e-fi, *v. a.* To moisten; to make wet.—Seldom used.

MADEIRA, ma-de'ra, *s.* A rich wine made on the isle of Madeira.

MADMOISELLE, mad-mwa-zel', *s.* (French.) In France, a title given to young women, equivalent to Miss.

MADHEADED, mad'hed-ed, *a.* Hotheaded; full of rash, idle fancies.

MADHOUSE, mad'hows, *s.* A house where persons of disordered intellect are put for safety and cure; a lunatic asylum; a bedlam.

MADID, mad'id, *a.* Wet; moist; dropping.—*Obsolete.*

MADLY, mad'le, *ad.* In the manner of an insane person; rashly; wildly.

MADMAN, mad'man, *s.* A man outrageously disposed, arising from a diseased mind; a man without understanding; one inflamed with extravagant passion, and acting without the restraints of reason.

MADNESS, mad'nes, *s.* Distraction; loss of reason or understanding; headstrong passion and rashness, in opposition to the dictates of reason; fury; rage; raving asseveration.

MADONA, ma-do'na, } *s.* (*madona*, Span. *madonna*, ma-don'na, } *donna*, Ital.) A name given to pictorial representations of the Virgin Mary; a complimentary term, equivalent to Madam.

Two faults, *madona*, that drink and good counsel will amend.—*Shaks.*

MADONNINA, ma-do-nin'a, *s.* A silver coin of Genoa, worth about 8d. sterling.

MADRASTREA, mad-ras-tre'a, *s.* (*madré*, spotted, Fr. and *aster*, a star, Lat.) A name given by De Blainville to a subsection of the Madrepheylia, including the genera *Astræa*, *Echinastrea*, *Oculina*, and *Branchastrea*.

MADREPHYLLÆA, ma-dre-fil-li'e-a, *s.* (*madré*, Fr. and *phyllon*, a leaf, Gr.) Blainville's first section of the stony Zoantharia; the other section he calls *Madreporeæ*. The species are nearly all included in the ill-arranged genus *Madrepore* of Linnæus.

MADREPORA, mad-re-po'ra, } *s.* (*madré*, spotted, Fr. and *pore*, a pore, Lat.) A general name for corals, with lamellate, star-shaped cavities.

MADREPORITE, mad're-po-rite, *s.* A columnar carbonate of lime, found in Norway and Greenland.

MADRIER, mad're-er, *s.* (French.) A flat beam of wood placed at the bottom of a moat to support a wall; also, a thick plank used for the platform of batteries, and to support the earth in the galleries and chambers of mines; likewise, a plank of wood covered with some incombustible material as a defence against fire.

MADRIGAL, mad're-gal, *s.* (Spanish and French.) A little amorous poem of a certain number of unequal verses, not confined to the strict regularity of a sonnet, or the subtilty of an epigram. It is sometimes called a *pastoral* poem;—a vocal composition in five or six parts.

MÆMACTERIA, me-mak-te're-a, *s.* In Antiquity, sacrifices offered to Jupiter at Athens in the month Mæmacterion, when the god, surnamed Mæmactes, was entreated to send mild and temperate weather, as he presided over the seasons, and was the god of the air.

MÆNURA, me-nu'ra, *s.* The Lyre Tails, a genus of singular birds, placed by Vigors in the family Craciidæ.

MÆONIDÆ, me-on'e-de, *s.* One of the names given to the Muses, because Homer, their greatest and worthiest favourite, was supposed to be a native of Mæoni, on which account he was called Mæonides.

MÆRA, me'ra, *s.* A genus of Crustaceans: Family, Amphipoda.

MERE—MAGI.

MERE, mere, *ad.* An affix derived from the Saxon *mer*, famous, great, noted; *almere* is all-famous; *ethelmere*, famous for nobility.

MERU, me'ru, *s.* (the Arabic name of *M. uniflora*.) A genus of downy shrubs: Order, Capparidaceæ.

MESA, me'sa, *s.* (the Arabic name of one of the species.) A genus of plants, natives of Java: Order, Myrtaceæ.

MAESTOSO, ma-es-to'zo, *s.* An Italian musical term denoting majestic, and directing the part to be played with grandeur and strength.

MAESTRICH BEDS, ma'strikt bedz, *s.* In Geology, the uppermost group of the Cretaceous or Chalk formation, as they occur near Maestricht, a town in the Netherlands.

MAFFLE, maf'fl, *v. n.* To stammer.—Obsolete. He so stammered, or *maffled* in his talks, that he was not able to bring forth a readable word.—Barret.

MAFFLER, maf'fl-ur, *s.* A stammerer.—Obsolete.

MAGADA, ma-ga'da, *s.* In Mythology, a title under which Venus was known and worshipped in Lower Saxony, where she had a temple.

MAGADIS, ma-ga'dis, } *s.* (from *magadicein*, to sing
or play in unison, Gr.) The
name of a musical instrument in use among the
ancients, of which there were two kinds: one a
stringed instrument formed of twenty chords ar-
ranged in pairs; the other a kind of flute which
at the same time yielded very high and very low
notes.

MAGAZINE, mag-a-zeen', *s.* (*magazin*, Fr. *magaz-
zino*, Ital.) A storehouse for the reception of
ammunition, arms, or provisions, or the building
in which they are kept. In a ship of war, a close
room in the hold where the gunpowder is kept; a
pamphlet periodically published, containing mis-
cellaneous papers or compositions.

MAGAZINER, mag-a-zeen'ur, *s.* One who writes
for a magazine.—A bad word.

MAGBOTE, mag'bote, *s.* (*mag*, a kinsman, and *bote*,
a compensation, Sax.) In Law, a compensation
anciently made in money for killing a kinsman.

MAGDALLANA, mag-da-la'na, *s.* (in honour of the
celebrated circumnavigator, F. Magellan, or Ma-
gallanes, in Portugal.) A genus of plants: Or-
der, Tropæolaceæ.

MAGE, maje, *s.* A magician.—Obsolete.

MAGELLANIC, mag-gel-lan'ik, *a.* Pertaining to or
discovered by Magellan. *Magellanic clouds*, in
Astronomy, three nebulae in the southern hemi-
sphere; two of them about 12 or 13 degrees from
the south pole, and the third more distant.

MAGGIORE, mad-je-o're, *a.* (Italian.) In Music,
greater.

MAGGOT, mag'gut, *s.* The common name of the
larva of flies and bees; a whim; an odd fancy.

MAGGOTINESS, mag'gut-e-nes, *s.* The state of
abounding with maggots; full of strange conceits.

MAGGOTT, mag'gut-e, *a.* Full of maggots; capri-
cious; whimsical.

MAGGOTT-HEADED, mag'gut-e-hed'ed, *a.* Having
a head full of strange fancies.

MAGI, maj'i, *s.* An ancient religious sect in Persia
and other eastern countries, who maintained that
there were two principles—one the cause of all
good, and the other the cause of all evil, and,
abominating the adoration of images, they wor-
shipped God only by fire, which they regarded as
the brightest and most glorious symbol of Oro-
mazes, or the good principle, as darkness was

MAGIAN—MAGISTRAL.

the emblem of the evil one, Ahrimanea. The
priests of the magi were the most skilful mathe-
maticians and philosophers of their day; so much
so, that a learned man and a magician became
equivalent terms.

MAGIAN, ma'je-an, *a.* (*magus*, Lat. *magos*, Gr.)
Relating to the magi or philosophers of the east;
—*s.* one of the sect of the magi.

MAGIANISM, ma'je-an-izm, *s.* The philosophy or
doctrines of the magi.

MAGIC, maj'ik, *s.* (*magia*, Lat.) The science of
producing wonderful effects through the supposed
agency of supernatural beings; sorcery; enchant-
ment. *Magic lantern*, an optical instrument, by
means of which small figures, painted with trans-
parent varnish on slides of glass, are represented
on a wall or screen greatly magnified. *Magic
square*, a term used to denote a series of numbers
in arithmetical progression, arranged in the equal
cells of a square in such a manner that the verti-
cal, horizontal, and diagonal columns give the
same sum.

MAGIC, maj'ik, } *a.* Acting or performing by
MAGICAL, maj'e-kal, } secret and invisible agency;
relating to magic; used in magic.

MAGICALLY, maj'e-kal-le, *ad.* According to the
rites of magic; by enchantment; by the arts of
magic.

MAGICIAN, ma-jish'an, *s.* One skilled in magic;
one who practises the so-called black art, or pro-
duces startling effects, by supposed supernatural
agency; a necromancer; an enchanter; a sor-
cerer.

MAGILAS, maj'e-lus, *s.* (meaning not explained.)
A genus of Tubulibranchiate Gasteropods, the
shell of which is a longitudinal carinated tube,
which is at first regularly spiral, and then extends
itself in a line more or less straight.

MAGILE, mag'ilp, *s.* A name given to a gelatinous
composition, produced when linseed oil and mastic
varnish are mixed together. It is used by artists.

MAGISTER, maj'e-stur, *s.* An appellation given in
the middle ages to those persons who had obtained
some degree of literary or scientific eminence:
contracted to Mister or Mr. *Magister equitum*,
an officer among the Romans, subordinate to the
dictator, by whom he was usually elected.

MAGISTERIAL, maj-is-te're-al, *a.* Relating to or
such as suits a master; lofty; authoritative;
proud; imperious; domineering. In Chemistry,
relating to magistry,—which see.

MAGISTERIALLY, maj-is-te're-al-le, *ad.* Arro-
gantly; with an air of authority.

MAGISTERIALNESS, maj-is-te're-al-nes, *s.* Haugh-
tiness; imperiousness; the air and manner of a
master.

MAGISTERY, maj'is-ter-e, *s.* (*magister*, a master,
Lat.) A term used by the old chemists to sig-
nify a peculiar method of preparing any medicine
as it were by a mastery process. The term was
also long applied to all precipitates.

MAGISTRACY, maj'is-tra-se, *s.* The office or dig-
nity of a magistrate; the body of magistrates.

MAGISTRAL, maj'is-tral, *a.* Authoritative; suiting
a magistrate or master; artificial; cunning; skil-
ful;—(obsolete.)

Magistral syrups.—Ben Jonson.
—*s.* a sovereign medicine or remedy.—Obsolete.
A cure and *magistral* against melancholy beyond the
syrup.—Whitlock.

MAGISTRALITY, maj-is-tral'e-te, *s.* Despotic authority in opinion.—*Obsolete.*

Those who seek truths, and not magistrality.—*Bacon.*

MAGISTRALLY, maj-is-tral-le, *ad.* Despotically; authoritatively.—*Obsolete.*

MAGISTRATE, maj-is-trate, *s.* (*magistratus*, Lat.) A man publicly invested with authority; a civil officer judicially empowered to execute the law.

MAGISTRATIC, maj-is-trat'ik, *a.* Having the authority of a magistrate.

MAGISTRATURE.—See Magistracy.

MAGMA, mag'ma, *s.* (*massa*, I blend together, Gr.) A thick ointment or confection.

MAGNA CHARTA, mag'na kār'ta, *s.* (Latin, great charter.) The great charter, so called, obtained by the English barons from King John, A.D. 1215; a fundamental constitution which guarantees rights and privileges.

MAGNALITY, mag-nal'e-te, *s.* (*magnalia*, Lat.) A great thing; something above the common rate.—*Obsolete.*

Too greedy of magnalities, we make but favourable experiment concerning welcome truths.—*Brown.*

MAGNANIMITY, mag-nan'im'e-te, *s.* (*magnus*, great, and *animus*, the mind, Lat.) Greatness of mind; high-toned bravery; elevation of soul which encounters hardships or danger with composure and firmness.

MAGNANIMOUS, mag-nan'e-mus, *a.* Great of mind; elevated in sentiment; honourable; brave; disinterested; dictated by noble feeling.

MAGNANIMOUSLY, mag-nan'e-mus-le, *ad.* Bravely; with disinterested devotion; with greatness of mind.

MAGNATE, mag'nate, *s.* (*magnatus*, Lat.) A person of rank; a distinguished person.

MAGNESIA, mag-ne'zha, *s.* (*magnesie*, Fr.) A white, tasteless, earthy substance, usually obtained by exposing its hydrated carbonate to a red heat. It consists of magnesium, 61.21; and oxygen, 38.79. *Magnesia alba*, a mineral of a snow-white colour and shining lustre, found at Cape Verd in Southern Africa, where it covers the floor of a grotto to the depth of six inches. It occurs both compact and fibrous, and consists of sulphate of alumina, 38.39; sulphate of magnesia, 10.82; sulphate of manganese, 4.59; chloride of potassium, 0.205; water, 45.739.

MAGNESIAN, mag-ne'zhan, *a.* Relating to magnesia. *Magnesian limestone*, in Geology, a series of beds occurring in some places above the coal measures. *Magnesian pharmacolite*, a mineral of a dirty white or honey-yellow colour, and waxy lustre: occurs massive, and is brittle. It consists of arsenic acid, 58.52; lime, 23.22; magnesia, 15.68; protoxide of manganese, 3.13; iron, a trace; loss, 0.30: sp. gr. 2.52. $H = 6-7$.

MAGNESITE, mag-ne'site, *s.* Native magnesia.

MAGNESIUM, mag-ne'zhe-um, *s.* The metallic base of magnesia.

MAGNET, mag'net, *s.* (Latin.) A substance endowed with the property of attracting iron, and also of pointing itself in a certain direction. These properties it is capable of communicating to iron and steel bars. Magnets are of two kinds: *natural*, and *artificial*. The latter are, according to their shape, known as bar magnets and horse-shoe magnets. To preserve them, it is necessary to connect together the ends or poles with a piece of

smooth iron, which is called the armature. If of a single bar, it is a *single magnet*; if of several joined together, a *compound magnet*; and if they be cased in brass, it is said to be *armed*. Two points at or near the ends are called the *poles*, and the whole power of the magnet seems concentrated in these points; one is called the *north pole*, and the other the *south pole*. The line which joins the poles is called the *axis*.

MAGNETIC, mag-net'ik, } *a.* Relating to the
MAGNETICAL, mag-net'e-kal, } magnet; having powers corresponding with the properties of the magnet; attractive. *Magnetic amplitude*, an arc of the horizon intercepted between the sun in his rising or setting, and the east and west points of the compass. *Magnetic azimuth*, an arc of the horizon intercepted between the magnetical meridian and the sun's azimuth circle. *Magnetic compensator*, a contrivance devised by Mr. Barlow for eliminating the influence of a ship's guns and other irons in deranging the bearings of the compass. *Magnetic pyrites*, the black sulphuret of iron. *Magnetic alarum*, or more properly *electromagnetic alarum*, a curious and simple instrument, used to strike an alarum at a great distance, so as to give notice of a telegraph working, starting of a railway train, &c. *Magnetic battery*, the same as compound magnet, or a series of simple magnets so united together as to act in concert. *Magnetic curves*, the position in which iron filings arrange themselves from the one pole to the other of a powerful bar magnet over which they are sprinkled. *Magnetic declination*, synonymous with the variation of the compass, which indicates the deviation of the magnetic needle from the true geographical meridian, pointing not to the north and south poles of the earth, but to points some degrees from them. The amount of this variation is according to the place on the earth's surface where the magnetic needle is situated. *Magnetic dip*, a property of the magnetic needle of inclining one of its poles towards the earth. It differs in different latitudes. The dip at London is about $69^{\circ} 12'$; over the magnetic poles the dip is 90° ; at a line around the earth, forming an equator to these poles, there is no dip. *Magnetic equator*, a line around the earth, everywhere equally distant from both magnetic poles; here the magnetic needle does not dip, but stands horizontal, being equally attracted to both the terrestrial magnetic poles. *Magnetic electricity*, a science compound in character as in name, being the explanation of certain effects produced by the action of a magnet, which so resemble those of electricity as to induce philosophers to believe that magnetism is but electricity in another form, and that the magnetic and electrical fluids are identical. *Magnetic fluid*, the property or the fluid which produces those attractive, directive, and other effects, commonly known as magnetic. Some philosophers suppose it to be a fluid distinct from all others, yet produced naturally by the same causes as those which occasion the development of the electric fluid; others, with apparently more reason, imagine it to be identical with the electric fluid itself; and modern discoveries show that many properties are common to both. The magnetic fluid will, when concentrated and properly conducted, give a shock and a spark similar to those which are electrical,

and also produce chemical decompositions. *Magnetic induction*, the power which a magnet has of communicating the qualities which it possesses to bars of iron or steel placed near it, although not in contact. When two magnets are so placed as to affect the same piece of iron, it is called *complex induction*, whether they, by their relative position, conspire to heighten the effect of the single magnet or to counteract it. *Magnetic meridian*, a vertical circle in the heavens intersecting the horizon in the magnetic poles. *Magnetic needle*, a small artificial magnet, balanced on its centre so that it may direct itself as influenced by terrestrial magnetism. *Terrestrial magnetic poles*, two points of the earth to which the poles of an artificial magnet always tend; that in the northern hemisphere is called the *north pole*; and the antipode to this is called the *south pole*. The north pole is situated in the north-eastern part of Hudson's Bay, at about 80° west longitude and 60° north latitude. From the great irregularity of the needle in the high northern latitudes, it is inferred that there is a second north magnetic pole, situated at 102° east longitude, with the same latitude as the other pole. If this be proved to exist, there will be a second south magnetic pole also. *Magnetic susceptibility and retentiveness*, the power which some kinds of iron, and more especially steel, has of receiving and retaining magnetic properties.

MAGNETICALLY, mag-net'e-kal-le, *ad.* By the power of attraction; by means of the magnet.

MAGNETICALNESS, mag-net'e-kal-nes, } *s.* The quality of being magnetic or attractive.

MAGNETICNESS, mag-net'ik-nes, } *s.* The science of magnetism.

MAGNETICS, mag-net'iks, *s.* The science of magnetism.

MAGNETIFEROUS, mag-ne-tif'er-us, *a.* Producing or conducting magnetism.

MAGNETISER, mag-net-ize-ur, *s.* One who practices animal magnetism.

MAGNETISM, mag-net-izm, *s.* The science which investigates the phenomena presented by natural and artificial magnets, and the laws by which they are connected. *Animal magnetism*, a special principle, hypothetically admitted, to explain certain obscure and ill-defined phenomena, which are supposed to reside particularly in the nervous system, and to be susceptible of transmission from one living body to another, by contact, mere approach, or even an effort of volition.—See Mesmerism. *Terrestrial magnetism*, that property of the earth from which the magnetism of the ordinary magnets, the direction of the magnetic needle, and other phenomena are derived, and upon which they necessarily depend.

MAGNETIZATION, mag-ne-te-za'shun, *s.* The process by which the magnetic principle is imparted.

MAGNETIZE, mag-ne-tize, *v. a.* To communicate the magnetic principle to anything;—*v. n.* to acquire magnetic properties; to become magnetic.

MAGNETO-ELECTRICITY, mag-net'to-e-lek-tris'e-te, *s.* Electricity produced by magnetism.

MAGNETOMETER, mag-net-om'o-tur, *s.* A voltaic series of two or more large plates, which, producing a great quantity of electricity of low tension, is well adapted to the exhibition of electro-magnetic phenomena.

MAGNIFIABLE, mag-ne-fi-a-bl, *a.* Worthy of being magnified or extolled; that may be magnified.

MAGNIFIC, mag-nif'ik, } *a.* (*magnificus*, Lat.)

MAGNIFICAL, mag-nif'e-kal, } Grand; great; noble; splendid.—Seldom used.

O parent! these are thy *magnific* deeds;

Thy trophies.—Milton.

MAGNIFICALLY, mag-nif'e-kal-le, *ad.* In a great or splendid manner.

MAGNIFICATE, mag-nif'e-kate, *v. a.* To praise or commend highly.—Obsolete.

I cannot with swain lines *magnificate*
Mine own poor worth.—Marston.

MAGNIFICENCE, mag-nif'e-sens, *s.* Grandeur of appearance; splendour.

MAGNIFICENT, mag-nif'e-sent, *a.* Grand in appearance; exhibiting grandeur; splendid; pompous.

MAGNIFICENTLY, mag-nif'e-sent-le, *ad.* Pompously; splendidly; with exalted sentiments.

MAGNIFICO, mag-nif'e-ko, *s.* A grandee of Venice.

If the Venetians have their senate and *magnificos*, they (the bees) have the same.—*Parthenela Saora*.

MAGNIFIER, mag-ne-fi-ur, *s.* One who enlarges or increases; one who extols or exalts in praises; a glass that magnifies; a convex lens which increases the apparent magnitude of objects.

MAGNIFY, mag-ne-fi, *v. a.* (*magnifico*, Lat.) To praise greatly; to extol highly; to make great; to exaggerate; to amplify; to exalt; to elevate; to raise in estimation; to increase the apparent dimensions of any object to the eye.

MAGNILOQUENCE, mag-nil'o-kwens, *s.* (*magnus*, great, and *loquens*, speaking, Lat.) A lofty, flatulent mode of speaking; pompous, tumid style, or words.

MAGNILOQUENT, mag-nil'o-kwent, *a.* Flatulent; pompous.

MAGNITUDE, mag-ne-tude, *s.* (*magnitudo*, Lat.) Comparative bulk or size; extent of dimensions; greatness; grandeur; importance.

MAGNOLIA, mag-no'le-a, *s.* (in honour of Professor Magnol of Montpellier.) A genus of plants, consisting of highly ornamental trees: Type of the order Magnoliaceæ.

MAGNOLIACEÆ, mag-no-li-a'se-e, *s.* (*magnolia*, one of the genera.) A natural order of Exogenous plants, consisting of elegant trees and shrubs, remarkable for the beauty and fragrance of their flowers; calyx of three or six sepals; petals three to twenty-seven, disposed in a ternary order; stamens free and indefinite; anthers adnate and elongated; ovaries numerous.

MAGNUM BONUM, mag-num bo-num, *s.* (Latin.) A particular kind of pear. *Magnum os*, the third bone of the lower row of the carpal, reckoning from the thumb towards the little finger.

MAGONÆA, ma-go'ne-a, *s.* (name of some botanist known to St. Hilaire.) A genus of plants: Order, Sapindaceæ.

MAGPIE, mag'pi, *s.* A bird of the crow kind; the *Corvus pica* of Selby, and forming the genus *Pica* of Brisson.

MAGUS, ma'gus, *s.* (*magos*, a teat, from the little protuberances on the mouth of the corolla.) A genus of plants: Order, Scrophulariaceæ.

MAGYDARIS, maj-e-da'ris, *s.* (the Latin name of the herb Lacertwort.) A genus of Umbelliferous perennial herbs: Suborder, Campylosperma.

MAHABHARATAM, ma-ha-baw'ra-tam, } *s.* (Hindoo)
BHARATAM, ba-raw'tam, } doostance, belonging to Bharata and his descendants.) The

most celebrated epic poem of Hindus after Rhamayana, said to contain 100,000 distichs or slokas, but this is an exaggeration.

MAHADEVA, ma-haw'de-va, *s.* One of the names of Siva,—which see.

MAHERIA, ma-her'ne-a, *s.* (an anagram of Hermannia, to which it is allied.) A genus of plants: Order, Byttneriaceae.

MAHOGANY, ma-hog'a-ne, *s.* (*mahogoni*, the American name of the tree.) The wood of the mahogany-tree; Swietenia mahogoni of De Candolle, the Cedrus mahogoni of Miller, a native of South America, Cuba, Jamaica, St. Domingo, but particularly of the Bay of Honduras, from which it is chiefly exported to this country: Order, Cedraleaceae.

MAHOMETAN.—See Mohammedan.

MAHONIA, ma-ho'ne-a, *s.* (in honour of Bernard Macmahon of Philadelphia.) A genus of plants, natives of India and America, consisting of elegant shrubs with yellow flowers: Order, Berberaceae.

MAHOUND, ma'hownd, *s.* A contemptuous name formerly used for Mohammed, and the devil, and sometimes for any savage character.

Like Mahound in a play,
No man dare him withsay.—*Shelton*.

MAIA, ma'ya, *s.* A genus of Decapod Crustaceans: Family, Brachyura. In Mythology, the daughter of Atlas and Pleione; and mother of Mercury by Jupiter. She was one of the Pleiades, the most luminous of the seven sisters. Also, a surname of Cybele.

MAIADE, ma'a-de, } *s.* (*maia*, one of the genera.)
MAIANS, ma'e-ans, } The second tribe of the family Oxynrhynchi of M. Milne Edwards, composed of Brachyurous Decapod Crustaceans, whose carapace is always very spiny, and is with some exceptions much larger than it is wide.

MAID, made, } *s.* (*magd*, Germ. *magth*, Sax.)

MAN, man, *s.* (Dutch, Danish, German, Swedish, Sanscrit, *mann*, Icel. *man*, *mann*, Sax. *mann*, Goth.) *Plur.* Men. The character of this species given by Blumenbach, and generally received, are:—'Erect, two-handed, unarmed, rational, endowed with speech; a prominent chin; four incisor teeth above and below; all the teeth equally approximated; the canine teeth of the same length as the others; the lower incisors erect.' The same author divides the species into five varieties, whose characters are:—1. The Caucasian variety: a white skin, either with a fair rosy tint, or inclining to brown; red cheeks; hair black, or of the various lighter colours, copious, soft, and generally curved or waving. Irides dark in those with brown skin; light in the fair or rosy complexioned. Large cranium with small face; the upper and anterior regions of the former particularly developed, and the latter falling perpendicularly under them. Face oval and straight, with distinct features; expanded forehead, narrow and rather aquiline nose, and small mouth; front teeth of both jaws perpendicular; lips, particularly the lower, gently turned out; chin full and rounded. Moral feelings and intellectual powers most energetic, and susceptible of the highest development and culture. This variety includes all the ancient and modern Europeans except the Finns; the former and

present inhabitants of Western Asia, as far as the River Oby, the Caspian Sea, and the Ganges (that is, the Assyrians, Medes, and Chaldeans; the Sarmatians, Scythians, and Parthians; the Philistines, Phœnicians, Jews, and the inhabitants of Syria generally; the Tartars, properly so called; the tribes actually occupying the chain of Caucasus; the Georgians, Circassians, Mingrelians, and Armenians; the Turks, Persians, Arabians, Afghans, and Hindoos of high castes;) and the northern Africans, the Egyptians, Abyssinians, and Guanches. 2. The Mongolian variety:—characterised by olive colour, which in many cases is very light, and black eyes; black, straight, strong, and thin hair; little or no beard; head of a square form, with small and low forehead; broad and flattened face, with the features running together; the glabella flat and very broad; nose small and flat; rounded cheeks, projecting externally; narrow and linear aperture of the eye-lids; eyes placed very obliquely; slight projection of the chin; large ears; thick lips; stature, particularly in the countries near the north pole, inferior to that of Europeans. It includes the tribes of Central and Northern Asia, as the Mongols, Calmucks, and Buriats; the Mantchoos, Da-urians, Tungusoes, and Coreans; the Samoides, Yukagers, Koriacs, Tschuktschi, and Kamtchadales; the Chinese and Japanese, the inhabitants of Tibet and Bootan, of Tonquin, Cochinchina, Ava, Pegu, Cambodia, Laos, and Siam; the Finnish races of Northern Europe, as the Laplanders and the tribes of Esquimaux. 3. The Ethiopian variety:—skin and eyes black; hair black and woolly; skull compressed laterally, and elongated towards the front; forehead low, narrow, and slanting; cheek-bones prominent; jaws narrow and projecting; upper front teeth oblique; chin receding. The eyes prominent; the nose broad, thick, flat, and confused with the extended jaw; the lips, and particularly the upper one, thick. All the natives of Africa, not included in the first variety, belong to this. 4. The American variety:—skin dark, and more or less of a red tint; black, straight, and strong hair; small beard; and a countenance and skull very similar to the Mongolian. The forehead low, the eyes deep, the face broad, particularly across the cheeks, but not so flattened as in the Mongols. Mouth large; and lips rather thick. This variety includes all the native Americans except the Esquimaux. 5. The Malay variety:—brown colour, from a light tawny to a deep brown. Hair black, more or less curled, and abundant; head rather narrow; bones of the face large and prominent; nose full, and broad towards the apex; mouth large. In this are included the inhabitants of Malacca, Sumatra, Java, Borneo, Celebes, and the adjacent Asiatic Islands; of the Molucca, Ladrone, Philippine, Marian, and Caroline groups; of New Holland, Van Diemen's Land, New Guinea, New Zealand, and of all the islands of the South Sea. Cuvier distinguishes only three principal divisions—the Caucasian, the Mongolian, and the Ethiopian; remaining doubtful as to the Malay and American varieties. Dr. Prichard, on the other hand, (and his authority should have the greatest weight in everything relating to the subject,) divides the species into seven principal varieties:—1. The Iranians, who

- MANICHEANS**, man-e-ke'ana, *s.* (*Mani*, supposed to have been a native of Persia.) A Christian sect who, like the Magi, believed in two eternal principles of good and evil: that our first parents were created by the God of darkness, but that their souls formed part of that light which was subject to the God of light. They believed that the great object of the God of light was to deliver the captive souls of men from their corporeal prisons, and that with this view he created two sublime beings, Christ and the Holy Ghost, clothed with a shadowy form, to teach mortals how to deliver the rational soul from the corrupt body, and to overcome the power of malignant matter. Mani gave himself out as 'the Comforter' promised to be sent into the world by Christ after his death. The Manichæans do not appear to have existed before the end of the third century.

In Law, such a killing of a man as happens either on a sudden quarrel or in the commission of an unlawful act, without any deliberate intention of doing any mischief at all. There is no difference between *murder* and *manslaughter*, but that *murder* is upon malice forethought, and *manslaughter* upon a sudden occasion. As if two meet together, and striving for the wall, the one kills the other, this is *manslaughter* and felony. And so it is, if they had upon that sudden occasion gone into the field and fought, and the one had killed the other, this had been but *manslaughter* and no *murder*; because all that followed was but a continuance of the first sudden occasion, and the blood was never cooled till the blow was given.

MANSLAYER, man'slay-ur, *s.* One who has slain a human being.

MANSTEALER—MANU.

MANSTEALER, man'ste-lur, *s.* One who steals or carries off human beings; a trafficker in the slave trade.

MAST, mast, *s.* (*mast*, Sax.) In Navigation, the upright timber on the deck, to which yards, sails, &c. are made fast; hence the phrase 'to spend a mast,' to break a mast in foul weather. There are three principal masts in a ship, namely—the *mainmast*, the largest mast in a ship, standing nearly in midships, between the stem and stern; the *foremast*, the next in size to the mainmast, which stands near the stem of a ship, and carries the foresail and foretop-sail-yard; the *mizzenmast*, the smallest mast, which stands about halfway between the mainmast and the stern. A mast, in respect to the length, is either formed of one piece called a *polemast*, or it is composed of several pieces joined together, which have each the name of mast, according to their situation; as the *lowermast*, which is the lowest part of the mast. *Topmast*, that which is raised at the head, or top of the lowermast, through a cap, and supported by tressle-trees. It is composed of two strong

bars of timber, supported by two prominences, which are as shoulders, on the opposite sides of the mast; athwart these bars are fixed the cross-trees, upon which the frame of the top is supported. *Topgallantmast*, a smaller mast than the preceding, to which it is raised and secured as the other. *Topgallantroyalmast*, a still smaller mast, that is sometimes elevated through irons at the head of the topgallantmast. Masts are moreover distinguished into *armed-mast*, a mast made of more than one tree; *jurymast*, a yard set up instead of a mast which has been broken down by a storm; *mademast*, a mast composed of several united pieces of the soundest trees, in contradistinction from one that consists of a single tree, or piece; *roughmast*, a spar that is fit for making a mast; *mast-carlings*, large carlings at the side of the mast-rooms; *mast-cloth*, the lining in the middle of the aft-side of the topsails, to prevent the sail being chafed by the mast; *mast-coats*, coverings made of well-tarred canvas, to prevent the water from going down the mast-hole. *To mast a ship*, to hoist her masts into her by means of a sheer-hulk.

others, formed according to any assigned law of succession; the *arithmetical mean*, is formed by dividing all the quantities by their number; the *geometrical mean*, or a *mean proportional*, is the middle term of a duplicate ratio, or continued proportion, and three terms; the *harmonic mean*, is a number such, that the first and third terms being given, the first is to the third as the difference of the first and second is to the difference of the second and third;—*v. a.* (*maenan*, *menan*, Sax.) *Past* and *past part.* Meant; to have in the mind, view, or contemplation; to purpose; to intend; to design; to hint covertly; to signify; to indicate;—*v. n.* to think; to have the power of thought.

MEANDER, me-an'dur, *s.* (the name of a winding river in Phrygia.) A maze or labyrinth; serpentine winding; a winding course; perplexity;—*v. a.* to wind; to turn round; to make flexuous;—*v. n.* to run with a serpentine course; to be winding or intricate.

MEANDERING, me-an'dur-ing, *a.* Winding in a course, passage, or current.

MEANDRIAN, me-an'dre-an, *a.* Winding; flexuous.

MEANDRINA, me-an'dre-na, *s.* Brain coral, a genus of hemispherical Lamelliferous corals: so named from the labyrinthine form of the cavities and ridges, which resemble the convolutions of the brain.

MEANDRY, me-an'dre, } *a.* Having many wind-
MEANDROUS, me-an'drus, } ings.—Obsolete.

MEANING, me'ning, *s.* Purpose; intention; that which exists in the mind; aim, with reference to a future act; signification; the sense; the thing understood; sense; power of thinking.—Obsolete in the last two senses.

MEANINGLESS, me'ning-les, *a.* Without definite meaning.

MEANLY, meen'le, *ad.* Moderately; not in a great degree; without dignity; poorly; without greatness of mind; ungenerously; without honour; with a low mind or narrow views; without respect.

MEANNESS, meen'nes, *s.* Want of excellence; want of dignity; low rank; poverty; lowness of mind; sordidness; niggardliness; want of spirit or honour.

MEAN-SPIRITED, meen'spir-it-ed, *a.* Disposed to perform mean actions.

MEANT.—*Past* and *past part.* of Mean.

MEASE, mees, *s.* The quantity of 500, as a *mease* of herrings.

MEASLE, me'zl, *s.* A leper.—Obsolete.

Rase ye dede men, cleanse ye measles.—
Wicliffe, St. Matt. x.

MEASLED, me'zld, *a.* Infected or spotted with measles.

MEASLES, me'zls, *s.* The disease Rubeola, known by inflammatory fever, hoarseness, dry-cough, during the first three days, when an eruption of red spots, discernible by the touch, appears and terminates in mealy disquamation.

MEASLY, me'zle, *a.* Infected with measles or eruptions.

MEASURABLE, mezh'ur-a-bl, *a.* That may be measured; that admits of mensuration or computation; moderate; in small quantity or extent.

MEASURABLENESS, mezh'ur-a-bl-nes, *s.* The quality of admitting mensuration.

MEASURABLY—MEAT.

MEASURABLY, mezh'ur-a-ble, *ad.* Moderately; in a limited degree.

MEASURE, mezh'ure, *s.* (*mesure*, Fr.) That by which anything is measured; the entire extent or dimensions of a thing, including length, breadth, and thickness; the rule by which any thing is adjusted or proportioned; a limited or definite quantity; determined extent or length; limit; sufficient quantity; proportion; quantity settled; extent of power or office; portion allotted; extent of ability; degree; quantity indefinite; means to an end; an act, step, or proceeding towards the accomplishment of an object. Any determinate quantity, used as a standard, with which others may be compared in space, time, quantity, velocity, &c. The *measure of an angle* is the number of degrees, minutes, &c. contained in the arc of a circle comprised between the two legs which form the angle, the angular point being the centre. *Common measure*, in vulgar fractions, is any number that will divide both terms of the fraction without a remainder. The *measure of a line* is its length compared with some determinate line, such as a mile, foot, inch, &c. The *measure of a surface* is the number of square miles, feet, inches, &c. contained on it. The *measure of a solid* is the number of cubic inches, feet, &c. it contains. *Measures*, in commerce, are of certain denominations; those chiefly used in this country are long, land, or square, and cubic or solid measure. One for liquids, called wine measure; dry measure for dry goods; that of time; and one for angular measurement, in degrees, minutes, &c. *Measure of velocity*, space uniformly passed over by a moving body in a given time. *Without measure*, without limits; very largely or copiously. *To have hard measure*, to be harshly treated;—*v. a.* to compute the extent or quantity of anything by some settled rule; to ascertain the degree of anything; to pass through or over; to judge of quantity or extent; to adjust or proportion; to mark out in stated quantities; to allot or distribute by measure;—*v. n.* to be of a certain extent, or to have a certain length, breadth, or thickness.

MEASURELESS, mezh'ur-less, *a.* Immeasurable; unlimited; without measure.

MEASUREMENT, mezh'ur-ment, *s.* The act of measuring; mensuration.

MEASURER, mezh'ur-ur, *s.* One whose occupation or duty is to measure commodities; one who measures.

MEASURING, mezh'ur-ing, *a.* Applied to a cast not to be distinguished in its length from another, but by measuring; the art of finding the exact quantity, or extent of anything. *Measuring-glass*, a glass vessel used to measure small quantities of liquid, less than the usual commercial measures can ascertain. *Measuring-tape*, a piece of tape, of from 10 to 100 feet in length, marked on one side with feet and inches, and on the other with links and rods. It is rolled up in a box for the convenience of carriage. Used in land and house measuring. *Measuring-wheel*,—see Perambulator.

MEAT, meet, *s.* (*mato*, *meto*, Sax.) Food in general; anything eaten for nourishment, either by man or beast; the flesh of animals used as food. In a Scriptural sense, spiritual food is that which sustains purity and holiness; spiritual comfort;

MEATED—MECHANICALNESS.

that which delights the soul. *To sit at meat*, to sit or recline at the table.

MEATED, me'ted, *a.* Fed; fattened.—Obsolete.

MEATHE, methē, *s.* (*meth*, hydromel, Germ.) Liquor or drink in which honey is mixed.—Obsolete.

Meathe made of honey, or liquorice sodden in water.—*Robinson*.

MEAT-OFFERING, meet'of-far-ing, *s.* An offering consisting of meat or food.

MEATUS, me-a'tus, *s.* (*meo*, I flow, Lat.) In Anatomy, a passage, as that leading to the ear, called the *meatus auditorium*.

MEATY, me'te, *a.* Fleishy, but not fat.—Local.

MEAZLING.—See Mistle.

MECARDONIA, me-kár-do-ne-a, *s.* (in honour of Antonio Meca y Cardona, a Spanish botanist.) A genus of plants, natives of Brazil: Order Scrophulariaceae.

MECHANIC, me-kan'ik, } *a.* (*mechanicus*, Lat.
MECHANICAL, me-kan'e-kal, } *mechanique*, Fr.)

Relating to machines, or to the art of constructing them; pertaining to the art of making instruments, furniture, wares, &c.; constructed or performed by the laws or rules of mechanics; skilled in the art of making machines; bred to manual labour; pertaining to artisans or mechanics; vulgar; pertaining to the principles of mechanics in philosophy; acting by physical power. *Mechanical powers*, or *elementary machines*, are the lever, the wheel and axle, the pulley, the inclined plane, the wedge, and the screw: to which some writers have added the rope-machine and the balance. All these, however, may be reduced to three—the lever, the inclined plane, and the funicular or rope-machine; the pulley, and wheel and axle, being obviously an assemblage of levers. The balance, a lever with equal arms; the screw, either a wedge or an inclined plane wrapped round a cylinder. *Mechanical carpentry*, that part of the art of construction in timber, which treats of the proper disposition of framing, so as to enable it to resist its own weight, or any additional load or pressure that may be laid upon it. *Mechanical curve*, a curve of such a nature that the relation between the abscissa and ordinate cannot be expressed by an algebraic equation: such curves are now generally called transcendental curves. *Mechanical force*, the power of any machine or mechanical contrivance. It may be said to be the measure of all other force, as it bears reference to the effect produced: thus steam, water, man, and horse-power are all represented by the amount of mechanical force they can exert. *Mechanical philosophy*, the science of mechanics; applied to physical inquiries, or, on the other hand, the application of the laws of general science to the improvement and construction of machinery.

MECHANIC, me-kan'ik, *s.* One who follows some mechanical occupation or art, as the construction of machines, furniture, instruments, wares, &c.; one skilled in mechanics.

MECHANICALLY, me-kan'e-kal-le, *ad.* According to the laws of mechanism; by physical force or power; acting by the laws of motion, without intelligence or design; impelled by the force of habit.

MECHANICALIZE, me-kan'e-kal-ize, *v. a.* To render mean or low.—Seldom used.

MECHANICALNESS, me-kan'e-kal-nes, *s.* The

- state of being agreeable to, or governed by, the laws of mechanism.
- MECHANICIAN**, mek-a-nish'an, *s.* One who constructs machines; one versed in mechanics.
- MECHANICS**, me-kan'iks, *s.* (*mechané*, machine, Gr.) That science in natural philosophy which treats of forces and powers, and their actions on bodies, either directly, or by the intervention of machinery. The term *mechanics* was originally applied to the doctrine of equilibrium. It has been, by some late writers, extended to the motion and equilibrium of all bodies, whether solid, fluid, or æriform; and has been employed to comprehend the sciences of hydrodynamics and pneumatics.
- MECHANISM**, mek'a-nizm, *s.* The construction and adaptation of the several parts of a machine, so as to produce uniform action and impelling power, according to the laws of mechanics.
- MECHANIST**, mek'a-nist, *s.* The maker of machines, or one skilled in mechanics.
- MECHANOGRAPHIST**, mek-a-nog'ra-fist, *s.* An artist who multiplies copies of any work of art by mechanical agencies.
- MECHANOGRAPHY**, mek-a-nog'ra-phe, *s.* (*mechané*, a machine, and *grapho*, I write, Gr.) The art of multiplying copies of a writing, or any work of art, by mechanical agency.
- MECHLIN**, mek'lin, *s.* A kind of lace, manufactured at Mechlin.
- MECHLOIC ACID**, me-klo'ik as'id, *s.* An acid formed along with a resinous matter, when chlorine gas is made to act on fused meconine. Formula, $C_{14}H_7O_{10}$.
- MECONATES**, me'ko-nayts, *s.* A genus of salts, in which the meconic acid is combined with salifiable basis.
- MECONIC ACID**, me-kon'ik as'id, *s.* A substance found in opium, in which it exists with the alkali morphia. Formula, H_2O_7 ; equiv. = 100.
- MECONINE**, mek'o-nine, *s.* A neutral principle existing in opium. Formula, $H_4C_{24}O_4$; equiv. = 90.
- MECONIUM**, me-ko'ne-um, *s.* (*mekon*, a poppy, Gr.) Opium; also, the excrements of the lower part of the foetal intestine.
- MECONOPSIS**, me-ko-nop'sis, *s.* (*mekon*, a poppy, and *opsis*, resemblance, Gr.) A genus of plants: Order, Papaveraceæ.
- MEDAL**, med'al, *s.* (*medaille*, Fr.) An ancient coin; a piece of metal stamped in honour of some distinguished person, or to commemorate some remarkable event.
- MEDALLIC**, me-dal'lik, *a.* Pertaining to a medal or to medals.
- MEDALLION**, me-dal'yun, *s.* (French.) A large antique stamp or medal; an embossed representation on a circular tablet. In Architecture, any circular oval tablet, bearing on it objects represented in relief, in figures, heads, animals, flowers, &c.
- MEDALLIST**, med'al-ist, *s.* A person who is skilled in medals.
- MEDALLURGY**, med'al-ur-je, *s.* (*medal*, and *ergon*, work, Gr.) The art of striking medals and other coins.
- MEDDLE**, med'dl, *v. n.* (*middelen*, Dut.) To have to do; to interpose and act in the concerns of others, or in affairs where our interference is not wanted; to act officiously and without concurrence;—*v. a.* to mix; to mingle.—Obsolete as an active verb.
- MEDDLER**, med'dl-ur, *s.* One who busies himself with things in which he has no concern; an officious person; a busy-body.
- MEDDLESOME**, med'dl-sum, *a.* Intermeddling; officiously intrusive.
- MEDDLESOMENESS**, med'dl-sum-ness, *s.* Forwardness; officious interference with other people's affairs.
- MEDDLING**, med'dl-ing, *a.* Officious and impertinent interposition.
- MEDETERUS**, med-e-te'rus, *s.* A genus of Dipterous insects: Family, Tanyosoma.
- MEDLÆ**, me'de-e, *s.* (*medai*, middle, Gr.) The three letters, *b, g, d*, (beta, gamma, delta, of the Greek alphabet,) are so termed, as holding respectively a middle place between their several tenues, *p, k, t*, (*pi, kappa, tau*), and aspirates, *ph, ch, th*, (*phi, chi, theta*).
- MEDLEVAL**, me-de-e'val, *a.* (*medius*, the middle, and *ævum*, an age, Lat.) Relating to the middle ages.
- MEDIAL**, me'de-al, *a.* (*medius*, Lat.) Mean; noting a mean or average.
- MEDIAN**, me'de-an, *a.* Intermediate. *Median cetron*, the *Cetrus medica*.
- MEDIAN**, me'de-aut, *s.* (*medius*, Lat.) In Music, the chord which is a major or minor third higher than the key-note, according as the note is major or minor.
- MEDIASTINUM**, me-de-as'tin-um, *s.* (Latin.) In Anatomy, the duplicature of the pleura, which divides the cavity of the thorax into two parts.
- MEDIASTIZATION**, me-de-as-te-za'shun, *s.* In Politics, the annexation of the smaller German sovereignties to larger contiguous states, which took place on a large scale after the dissolution of the German empire in 1806.
- MEDIATE**, me'de-ate, *a.* (*mediat*, Fr.) Interposed; intervening; middle; between two extremes; acting by an intervening agent;—*v. n.* to interpose as an equal friend to both parties; to act indifferently between contending parties; to intercede: to be between two;—(seldom used in the last sense);—*v. a.* to effect by mediation; to limit by something in the middle.—Obsolete in the last sense.
- MEDIATELY**, me'de-ate-le, *ad.* By a secondary cause; acting between the first cause and the effect.
- MEDIATION**, me-de-a'shun, *s.* (French.) Interposition; intervention; friendly interference between two contending parties, with a view to reconciliation; agency interposed; intervenient power; intercession; entreaty for another.
- MEDIATOR**, me-de-a'tur, *s.* (*mediator*, Fr.) One that intervenes between two parties; an intercessor; one who interposes between parties at variance, with a view to their reconciliation; the office undertaken by Christ on behalf of mankind.
- MEDIATORIAL**, me-de-a-to're-al, *a.* Belonging to a mediator.
- MEDIATORSHIP**, me-de-a'tur-ship, *s.* The office of a mediator.
- MEDIATORY**, me'de-a-tur-e, *a.* Relating to mediation.
- MEDIATRESS**, me-de-a'tres, *s.* A female mediator.
- MEDIATRIX**, me-de-a'triks, *s.* A female mediator.

MEDICABLE, med'e-ka-bl, *a.* That may be healed or cured.

MEDICAGO, med-e-ka'go, *s.* (from *medike*, a name given by Dioscorides to a median grass.) Medik, or Lucern, a genus of Leguminous plants, consisting of herbs or shrubs, with yellow flowers: Suborder, Papilionaceæ.

MEDICAL, med'e-kal, *a.* Relating to the art of healing diseases; medicinal; tending to cure; containing that which heals.

MEDICALLY, med'e-kal-le, *ad.* According to the rules of the healing art, or for the purpose of healing; in relation to the administration of medicine.

MEDICAMENT, me-dik'a-ment, *s.* (French, from *medicamentum*, Lat.) Anything used in healing disease; a healing application.

MEDICAMENTAL, med-e-ka-ment'al, *a.* Relating to healing applications; having the qualities of medicaments.

MEDICAMENTALLY, med-e-ka-ment'al-le, *ad.* After the manner of medicine; with the power of medicine.

MEDICASTER, med-e-kas'tur, *s.* A quack.

MEDICATE, med'e-kate, *v. a.* (*medico*, Lat.) To tincture or impregnate with anything medicinal; to apply medicine; to heal.

MEDICATION, med-e-ka'shun, *s.* The act of tincturing or impregnating with medicinal ingredients; the use of medicine.

MEDICATIVE, med'e-kay-tiv, *a.* Curing; tending to cure.

MEDICINABLE, me-dis'in-a-bl, *a.* Having the properties of medicine; salutary.

MEDICINAL, me-dis'e-nal, *a.* (*medicinalis*, Lat.) Having the power of healing; adapted to cure disease, or alleviate bodily disorders; pertaining to medicine.

MEDICINALLY, me-dis'e-nal-le, *ad.* With medicinal qualities; with a view to healing.

MEDICINE, med'e-sin, *s.* (*medicina*, Lat.) Any substance, liquid or solid, that has the property of curing or mitigating disease in animals, or is used for that purpose. The science of the preservation of health, and the cure of diseases. It is divided into practical, theoretical, and forensic. *Practical medicine* is divided into four branches—surgery, physic, midwifery, and therapeutics. *Theoretical medicine* is divided into anatomy, pathology, and physiology. *Forensic medicine*, or *medical jurisprudence*, (called 'state medicine' in Italy, and 'legal medicine' in France,) the connection between medicine and legislation, as founded on the relations which ought to subsist between human nature and social institutions, and consisting in the application of the principles of medical science to the administration of justice and the preservation of the public health. It has been divided into two great branches:—The first, *forensic medicine*, evolving questions affecting civil rights and the social duties of individuals—injuries to property, and injuries to the person. The second, *medical police*, embracing questions affecting the preservation of individuals, and what relates to the health of men collected into communities;—a physician;—(obsolete in the last sense;)—*v. a.* to restore or cure by medicine; to apply medicine to.—Obsolete as a verb.

- MELANIANÆ**, mel-an-e-a'ne, *s.* (*melania*, one of the genera.) The Black Snails, the name given by Swainson to a subfamily of the Turbidae, or Turbos, in which the shells are spiral; the spire as long, and generally much longer, than the aperture; and the body whorl small.
- MELANIANS**, mel-a'ne-ans, *s.* A family of Mollusca, including the genera *Melania*, *Melanopsis*, &c.
- MELANITE**, mel'an-ite, *s.* A velvet-black opaque variety of the garnet, occurring in dodecahedrons with truncated edges. Its constituents are—silica, 85.5; lime, 82.5; oxide of iron, 25.5; alumina, 6.0; oxide of manganese, 0.4: sp. gr. 3.73.
- MELANITHES**, mel-a-ni'this, *s.* A genus of the Melaniana, in which the shell is formed like *Melania*, but the spire is obtuse, and the suture prominent: Family, Turbidae.
- MELANITIC**, mel-a-nit'ik, *a.* Relating to melanite.
- MELANNELLA**, mel-an-nel'la, *s.* (*melas*, black, Gr.) A genus of Mollusca, belonging to the Melaniana; the shell of which is ovate, and the spire scarcely longer than the aperture, which is entire; the inner lip much thickened through its whole extent.
- MELANOCHROITE**, mel-lan-ok'ro-ite, *s.* (*melanochros*, of a dark colour, Gr.) A Siberian mineral of a hyacinthine or orange-red colour, nearly opaque, with a resinous lustre. It consists of oxide of lead, 47.69; chromic acid, 23.31: sp. gr. 5.75.
- MELANOPSIDIUM**, mel-an-op-sid'e-um, *s.* (*melas*, black, and *psidium*, the guava, Gr.) A genus of plants: Order, Cinchonaceae.
- MELANOPSIS**, mel-a-nop'sis, *s.* (*melania*, and *opsis*, resemblance, Gr.) A genus of the Melaniana, in which the shell has the general form of *Melania*, but the spire shorter, and the base of the aperture notched: Family, Turbidae.
- MELANORRHÆA**, mel-an-or-re'a, *s.* (*melas*, black, and *rheo*, I flow, Gr. in reference to the black juice which flows from the tree when wounded.) A genus of plants: Order, Terebinthaceae.
- MELANOSIS**, mel-an-o'sis, *s.* A disease distinguished by the deposition of a peculiar soft-morbid substance, of a deep brown or black colour. The deposition of melanotic matter takes place successively in numerous parts of the body, producing all the injurious effects of compression and irritation, till it proves fatal, either by its direct influence on some important organ, or by the exhaustion which it gradually produces.
- MELANOSTICTA**, mel-lan-o-stik'ta, *s.* (*melas*, black, and *stiktos*, marked, Gr. in reference to the leaves and calyces being beset with black glands, which have the appearance of black dots or marks.) A genus of Leguminous plants: Suborder, Casalpinien.

MELANOTIC—MELATROPHY.

- MELANOTIC**, mel-an-ot'ik, *a.* Pertaining to, or affected by Melanosis.
- MELANOXYLON**, me-lan-oks'e-lon, *s.* (*melas*, black, and *xylon*, wood, Gr.) A genus of Leguminous plants, natives of Brazil: Suborder, Cæsalpinieæ.
- MELANSELINUM**, me-lan-sel-i-num, *s.* (*melas*, black, and *selinon*, parsley, Gr.) Black Parsley, a genus of Umbelliferous plants: Suborder, Orthospermeæ.
- MELANTERITE**, mel-an'ter-ite, *s.* One of the names of the native sulphate of iron, or green vitriol.
- MELANTHACEÆ**, me-lan-tha'se-e, } *s.* An order of
MELANTHÆ, me-lan'tha-e, } liliaceous En-
dogens, the plants of which have in some cases the appearance of crocuses, in others that of small lilies; calyx and corolla both alike, free, petaloid, in six pieces, or, in consequence of the cohesion of the claws, tubular; stamens six; ovary three-celled and many-seeded; style three-parted; capsule generally divided into three pieces.
- MELANTHACEOUS**, mel-an-tha'shus, *a.* Pertaining to the order Melanthaceæ.
- MELANTHERA**, me-lan-the'ra, *s.* (*melas*, black, and *anthera*, an anther, Gr.) A genus of Composite plants: Suborder, Tubulifloræ.
- MELANTHETUM**, mel-an'the-um, *s.* (*Melantheon*, the Greek name of the *Nigella* of the Latins.) A genus of plants, type of the order Melanthaceæ.
- MELANTOMA**, mel-an'to-ma, *s.* A genus of the Melanizans, in which the shell is fusiform, longitudinally ribbed; a deep sinus at the top of the outer lip; base contracted; channel wide: Family, Turbidæ.
- MELASIS**, mel-as'is, *s.* (*melas*, black, Gr.) A genus of Coleopterous insects: Family, Serri-cornes.
- MELASMA**, mel-as'ma, *s.* (*melas*, black, Gr.) A genus of plants: Order, Scrophulariaceæ. Also, a disease of aged persons, in which a black spot appears on the skin, which soon passes into a foul ulcer.
- MELASOMA**, me-la-so'ma, *s.* (*melas*, black, and *soma*, a body, Gr.) The name given by Cuvier to a family of Heteromorous Coleoptera, consisting of black or cinerous-coloured beetles, mostly apterous, and frequently with soldered elytra. Also, a genus of birds, belonging to the Dicurine, or Drongo Shrikes: Family, Laniadæ.
- MELASPHERULA**, mel-as-fe'ru-la, *s.* (*melas*, black, and *sphaïra*, a globe, Gr. in allusion to the colour and figure of the bulbets.) A genus of plants: Order, Iridaceæ.
- MELASTOMA**, mel-as'to-ma, *s.* (*melas*, black, and *stoma*, a mouth, Gr. from the black berries of some of the species.) A genus of plants: Order, Melastomaceæ.
- MELASTOMACEÆ**, mel-as-to-ma'se-e, *s.* (*melastoma*, one of the genera.) A natural order of Exogenous plants, consisting of trees, shrubs, or herbs, with opposite leaves and terminal flowers; calyx divided into four, five, or six lobes; petals equal in number to the segments of the calyx; stamens usually twice as many; one style; stigma simple; seeds innumerable and minute.
- MELASTOMACEOUS**, mel-a-sto-ma'shus, *a.* Belonging to the natural order Melastomaceæ.
- MELATROPHY**, mel'a-trof-e, *s.* (*melos*, a member, and *atrophia*, wasting, Gr.) Atrophy of the limbs.

MELCHISEDICIANS—MELICOCCA

- MELCHISEDICIANS**, mel-kiz-e-de'shans, *s.* A name given to certain sects, in the early stages of the church, who regarded Melchisedec as a divine personage.

MESNE, meen, *a.* (old French.) In Law, middle; intervening, as a *mesne* lord—that is, a lord who holds land of a superior, but grants part of it to another person. *Mesne process*, is generally used in contradistinction to *final* process, and signifies any writ or process issued between the commencement of the action, and the suing out *final* process or execution in such action; and includes also the writ of summons, notwithstanding this is the process by which personal actions are commenced, and therefore cannot be regarded now as *mesne* or intermediate process. *Mesne profits*, are intermediate profits; that is, profits which have been accruing between two given periods. Thus, after a party has recovered the land itself in an action of ejectment, he frequently brings another action for the purpose of recovering the profits which have been accruing or arising out of the land, between the periods of his title to the possession, and his recovery in the action of ejectment; and such an action is thence termed an action for *mesne profits*. *Writ of mesne*, (*de medio*), a writ in the nature of a writ of right, which lay when, upon a subinfeudation, the mesne or middle lord suffered his under tenant, or tenant paravail, to be distrained upon by the lord paramount for the rent due to him by the mesne lord.

MESOCEPHELMUM, mes-o-sef'e-lum, *s.* (*mesos*, middle, and *cephale*, the head, Gr.) A name given by Chaussier to the tuber annulare, as situated in the middle of the head.

MESOCONDRIAC, mes-o-kon'dro-ak, *a.* (*mesos*, middle, and *chondros*, cartilage, Gr.) An epithet applied by Boerhaave to the fasciculi of muscular fibres which connect the cartilaginous rings of the trachea.

MESOCHORUS, mes-o-ko'rus, *s.* In Antiquity, the name given to the person who, in public assemblies, gives the signal for acclamation.

MESOCOLON, mes-o-ko'lon, *s.* (*mesos*, the middle, and *kolon*, the colon, Gr.) The mesentery of the colon, being an extensive duplicature of the peritoneum.

MESOGASTRIC, mes-o-gas'trik, *a.* (*mesos*, the middle, and *gaster*, the belly, Gr.) Occupying the umbilical region, or middle of the belly.

MESOGLOIA, mes-o-glo'e-a, *s.* (*mesos*, the middle, and *gloia*, viscid.) A genus of Algae: Order, Confervaceae.

MESOLABE, mes'o-labe, *s.* (*mesos*, middle, and *lambano*, I take, Gr.) An instrument which was used by the ancients for finding two mean pro-

portionals between two given lines, required in the duplication of the cube.

MESOLE, me'sole, *s.* Flabelliform kouphone spar, a mineral occurring in globules of a flat, columnar, or lamellar structure, radiating from the centre; of a greyish-white or yellow colour, and silky or pearly lustre. It consists of soda, 5 to 10 per cent; silica, 42; alumina, 27 to 28; lime, 9 to 11; water, 10 to 12.

MESOLITE, mes'o-lite, *s.* (*mesos*, middle, and *lithos*, a stone, Gr.) Needlestone, a mineral which occurs massive, and also in long slender prisms, terminated by quadrilateral pyramids, which are translucent or transparent, and colourless, or of a greyish colour: sp. gr. 2.26. H = 5.0—5.5.

MESOLOBE, mes'o-lobe, *s.* (*mesos*, between, and *lobos*, a lobe, Gr.) A term applied by Chaussier to the corpus colosum, as situated between the lobes of the brain.

MESOLOGARITHM, mes-o-log'a-rithm, *s.* (*mesos*, Gr. and *logarithm*.) A logarithm of the co-sines and co-tangents.

MESONA, me-so'na, *s.* (*mesos*, middle, because the genus was supposed, by the author of the term, to be intermediate between *ocynum* and *scutellaria*.) A genus of plants: Order, Lamiaceae.

MESOPHYLLUM, mes-o-fil'm, *s.* (*mesos*, middle, and *phyllon*, a leaf, Gr.) In Botany, the parenchymatous tissue which forms the fleshy part of a leaf between the lower and the upper integuments.

MESOPRION, mes-o-prion, *s.* (*mesos*, middle, and *prion*, a saw, Gr.) A genus of fishes: Family, Percidae.

MESORECTUM, mes-o-rek'tum, *s.* (*mesos*, middle, Gr. and *rectum*, Lat.) The transverse fold of the peritoneum, which connects the posterior surface of the rectum with the anterior of the sacrum.

MESOSA, me-so'sa, *s.* (*mesos*, middle, Gr.) A genus of Coleopterous insects: Family, Longicornes.

MESOSCELOCELE, mes-o-sel-o-se'le, *s.* (*mesos*, middle, *skelos*, the thigh, and *cele*, hernia, Gr.) Hernia of the peritoneum.

MESOSCELOPHYMA, mes-o-sel-of'e-ma, *s.* (*mesos*, middle, *skelos*, thigh, and *phyma*, an abscess, Gr.) An abscess in the peritoneal region.

MESOTHORAX, mes-o-tho'raks, *s.* (*mesos*, middle, and *thorax*, chest, Gr.) In Entomology, that part of the body of an insect which gives origin to the second pair of legs, and also to the first pair of wings; or to the elytra or wing-covers.

MESOTYPE, mes'o-tipe, *s.* (*mesos*, middle, and *typos*, form, Gr.) Prismatic zeolite, a simple mineral, occurring in trap rocks. It is of a white, red, yellow, or yellowish-brown colour, and is regularly crystallised in fine needles. It consists of silica, 54.40; alumina, 19.75; soda, 15.05; lime, 1.60; water, 9.80: sp. gr. 3.2.

MESPILUS, mes'pe-lus, *s.* (*mesos*, half, and *pilos*, a bullet, Gr. in reference to the shape of the fruit.) Medlar, a genus of plants: Order, Rosaceae.

MESPRIZE, mes-prize', *s.* Contempt; scorn.—Obsolete.

And eke reward the wretch for his *mesprize*.—Spenser.

MESS, mes, *s.* (*mes*, Goth.) A dish; a quantity of food prepared and set on the table at one time; a mixed mass; a quantity; as much provender or grain as is given to a beast at once. Among seamen and soldiers, a number of persons who eat together;—*v. n.* to eat; to feed; to associate

MESSAGE—METACETONE.

- at the same table; to eat in company, as seamen; —*v. a.* to supply with a mess.
- MESSAGE, mes'saje, *s.* (French.) An errand; anything committed to another to be told to a third; an official (written or verbal) communication from one branch of a legislature to the other.
- MESSENGER, mes'sen-jur, *s.* (messenger, Fr.) One who bears a message; one who brings an account of anything; a harbinger; a forerunner.
- MESSERSCHMIDTIA, mes-ser-smid'she-a, *s.* (in honour of Daniel Gottlieb Messerschmidt, a traveller in Siberia.) A genus of plants: Order, Boraginaceae.
- MESSIAH, mes-si'a, *s.* (Hebrew.) The anointed; applied by the Jews to the prophets, kings, and priests, and, by way of eminence, by Christians, to Jesus Christ, as the anointed of his Father, and king of his church.
- MESSIAHSHIP, mes-si'a-ship, *s.* The character, state, or office of the Saviour.
- MESSEURS, mes'yerz, *s.* (French, *plu.* of *Monsieur*, my lord.) Sirs; gentlemen.
- MESSMATE, mes'mate, *s.* An associate in eating.
- MESSUAGE, mes'saje, *s.* (*messuagium*, modern Lat.) In Law, a dwelling-house with a small portion of land adjacent, or the site of the manor; a dwelling-house with land attached to it.
- METINA, mes-te'na, *s.* In Spanish America, the name given to the child of a Spaniard or Creole, and a native Indian.
- MESUA, me-su'a, *s.* (In honour of Mesua, father and son, physicians at Damascus, who flourished in the eighth and ninth centuries.) A genus of plants: Order, Cistaceae.
- MET, met, *s.* *Past* and *past part.* of Meet.
- META, me'ta, *s.* In Antiquity, a pile of stones of a pyramidal form, extended on the boundary of the stadium or chariot course. When it was passed seven times, the race was concluded.
- METABASIS, me-tab'a-sis, *s.* (Greek.) In Rhetoric, transition; a passing from one thing to another.
- METABOLA, me-tab'o-la, *s.* (from *metabole*, change, Gr.) In Medicine, a change of air, time, or disease.—Seldom used.
- METABOLISMS, met-a-bo'le-ans, *s.* (*metabole*, change, Gr.) In Entomology, a subclass of insects, including all such as undergo a metamorphosis.
- METABOLOS, met-ab'o-los, *s.* (Greek, changeable.) A genus of plants, natives of Java and of the Philippine Islands: Order, Cinchonaceae.
- METACARPAL, met-a-kar'pal, *a.* Belonging to the metacarpus.
- METACARPUS, met-a-kar'pus, *s.* (*meta*, with, and *karpos*, the wrist, Gr.) That part of the superior extremity which connects the wrist with the fingers; what is commonly known as the hand, but not including either the wrist or the fingers.
- METACENTRE, met-a-sen'ter, *s.* (*meta*, between, and *kentron*, a centre, Gr.) That point of a floating body in which, when the body is disturbed from the position of equilibrium, the vertical line, passing through the centre of buoyancy, meets the line which, when the body is at rest, passes through the centre of buoyancy and centre of gravity.
- METACETONE, me-tas'e-tone, *s.* (*meta*, Gr. and *acetone*.) A substance obtained by distilling an intimate mixture of one part of sugar with eight parts of finely-powdered quicklime. Formula, C_6H_8O ; acetone being $C_3H_6O_2$.

METACHRONISM—METALLOGRAPHY.

- METACHRONISM, me-tak'ro-nizm, *s.* (*meta*, beyond, and *chronos*, time, Gr.) An error in chronology; a mistake in the computation of time.
- METACISM, met'a-sizm, *s.* A defect in pronouncing the letter *M*.
- METACONDYLE, met-a-kon'dile, *s.* (*meta*, after, and *kondylos*, the knuckle, Gr.) The last phalanx of the fingers. The middle phalanges are called *condyli*, and the first (the metacarpal) the *procondyli*.
- METAGALLIC ACID, met-a-gal'lik as'id, *s.* An acid obtained when gallic acid is rapidly heated to 480° , and carbonic acid and water are evolved. Formula, $C_{12}O_8H_8$; equiv. = 99.
- METAGE, me'taje, *s.* Measurement of coal; price of measuring.
- METAGRAMMATISM, met-a-gram'ma-tizm, *s.* (*meta*, and *gramma*, a letter, Gr.) The transposition of the letters of a name into such a connection as to express some perfect sense applicable to the person named. Also written Anagrammatism.
- METAIHA, me-ta'ba, *s.* (the name in French Guiana.) A genus of plants: Order, Sapindaceae.
- METAL.—See Metals.
- METALASIA, met-a-la'she-a, *s.* (*meta*, and *lasso*, I change or alter, Gr.) A genus of Composite plants: Suborder, Tubuliflorae.
- METALDEHYDE, met-al'de-hide, *s.* (*meta*, and *aldehyde*.) When aldehyde is kept at the ordinary temperature, it is partially converted into crystals, which are termed *metaldehyde*.
- METALEPSIS, met-a-lep'sis, *s.* (Greek.) In Aristotle's Logic, the alteration of a term from being the subject of a hypothetical, to being the subject of a categorical proposition. In Rhetoric, the taking or assuming one thing instead of another.
- METALEPTIC, met-a-lep'tik, *a.* Relating to a metalepsis or participation; transitive; transverse.
- METALEPTICALLY, met-a-lep'te-kal-le, *ad.* By transposition.
- METALLIC, me-tal'lik, *a.* (*metallicus*, Lat.) Pertaining to metal; containing metal; consisting of metal; like a metal. *Metallic lustre*, in Mineralogy, a lustre or brilliancy resembling that of metals. *Metallic ore*, a metal existing in the state of an oxide, a salt, or united with a combustible. *Metallic oxide*, a metal combined with oxygen in any proportion, but not possessing the properties of an acid. *Metallic salts*, salts which have a metallic oxide as their base. *Metallic veins*, a mineral vein containing metallic ore.
- METALLICAL.—See Metallic.
- METALLIFEROUS, met-al-lif'er-us, *a.* (*metallum*, and *fero*, I bear, Lat.) Producing metals.
- METALLIFORM, me-tal'le-fawrm, *a.* Having the form of metal; like metal.
- METALLINE, met'al-line, *a.* Relating to metal; consisting of metal; impregnated with metal.
- METALLIST, met'al-list, *s.* A worker in metals; one skilled in metals.
- METALLIZATION, met-a-le-za'shun, *s.* A changing into a metal; a term particularly applied to ammonia, combined with mercury by electrical influence.
- METALLIZE, met'al-lize, *v. a.* To form into metal; to give to a substance its proper metallic properties.
- METALLOGRAPHY, met-al-log'ra-fe, *s.* (*metallum*, metal, and *grapho*, I describe, Gr.) A treatise on, or description of metals.

METALLOIDAL—METALS.

METALLOIDAL, met-al-loy'dal, *a.* Having the form or appearance of a metal.

METALLOIDS, met'al-loys, *s.* (*metallo*, a metal, and *eidos*, resemblance, Gr.) A name given to certain simple bodies—namely, sulphur, phosphorus, boron, carbon, and silicon.

METALLURGIC, met-al-lur'jik, *a.* Relating to metallurgy, or the art of working metals.

METALLURGIST, met'al-lur-jist, *s.* A worker in metals.

METALLURGY, met-tal'lur-ge, *s.* (*metallon*, a metal, and *ergon*, work, Gr.) The working of metals, so as to fit them for the useful purposes of life.

METALMAN, met'al-man, *s.* One whose occupation is to fashion metals into the various useful purposes required in society.

METALS, met'als, *s. pl.* (*metal*, Fr. from *metallum*, Lat.) A class of compact, heavy, opaque bodies, distinguished, in different degrees, by the following general properties:—Malleability, ductility, fusibility, tenacity, elasticity, and crystalline texture. The following is a table of the metals, arranged according to the order in which they have been discovered, with the names of the persons who discovered or first described them:—

1. Gold,.....	Known to the ancients. Gold and silver are termed <i>noble metals</i> : the former of these was considered as the metallic element; the rest were called <i>base metals</i> .
2. Silver,.....	
3. Iron,.....	
4. Copper,.....	
5. Mercury,.....	
6. Lead,.....	
7. Tin,.....	B. Valentine, ... 15th cent.
8. Antimony,.....	
9. Zinc,.....	Agricola,..... 1520.
10. Bismuth,.....	Paracelsus,..... 16th cent.
11. Arsenic,.....	Brandt,..... 1733.
12. Cobalt,.....	
13. Platinum,.....	Wood,..... 1741.
14. Nickel,.....	Cronstedt,..... 1751.
15. Manganese,.....	Scheele, &c., ... 1774.
16. Tungsten,.....	D'Elhuyart, ... 1781.
17. Tellurium,.....	Muller,..... 1782.
18. Molybdenum,.....	Hielm,..... 1782.
19. Uranium,.....	Klaproth,..... 1789.
20. Titanium,.....	Gregor,..... 1791.
21. Chromium,.....	Vauquelin,..... 1797.
22. Columbium,.....	Hatchett,..... 1802.
23. Palladium,.....	Wollaston,..... 1803.
24. Rhodium,.....	
25. Iridium,.....	Descotils, &c., ... 1803.
26. Osmium,.....	S. Tennant,..... 1803.

37. Zirconium,.....	
38. Aluminium,.....	Wohler,..... 1828.
39. Glucinium,.....	
40. Yttrium,.....	Berzelius,..... 1829.
41. Thorium,.....	
42. Magnesium,.....	Bussy, &c.,..... 1829.

These metals are distinguished into the following classes, viz.:—1. *Metallic bases of the alkalies*, viz.: potassium, sodium, and lithium. These

METAMORPHIC—METAPHORICAL.

powerfully attract oxygen; the oxides are *alkalies*; and the metallic bases, *alkalineigenous* metals. 2. *Metallic bases of the line earths*, viz., barium, strontium, calcium, magnesium. These also powerfully attract oxygen, and their oxides are termed *alkalies*. 3. *Metallic bases of the earths*, viz., aluminium, zirconium, glucinium, silicon, yttrium, thorium. The oxides of these metals are pure *earths*. 4. Metals yielding oxides are *neutral salifiable bases*, viz., gold, silver, copper, lead, iron, tin, platinum, palladium, nickel, cadmium, zinc, bismuth, antimony, and manganese. 5. Metals which are acted on by combination with oxygen, viz., tin, arsenic, chromium, molybdenum, tungsten, bismuth, and selenium. Of the oxides of little is known. 6. *Metals magnetic*, viz., nickel, and cobalt; chromium has also been affirmed to be magnetic. Metals are *native*, when found in an uncombined state; *mineralized*, when combined with other compounds of two or more metals, except iron, are called *alloys*, and possess the characteristic properties of pure metals; those of mere iron and other metals are called *amalgams*. The process of the oxidation of metals, when heated in air, was formerly called a *calc*, and the process of forming it *calcination*; when mixed with potash or chlorate of potash, and projected into a crucible, they are said to be *deflagrated*; the oxides are reduced to the metallic state, and said to suffer *reduction*. Metals are *reflectors of caloric*, and the worst radiator is *Hoblyn*. In Heraldry, there are but two metals used in coats of arms—namely, gold, or, and silver, argent. In Gunnery, when the mouth of a gun or ordnance, in disparting it, lies higher than the breech, it is said to be *over-metal*, or to be *metal*; *under metal*, is when the mouth of the gun is lower than the breech; *right metal*, is the term used when the piece lies truly level; *super-metal*, the surface or outside of a piece of metal.

METAMORPHIC, met-a-mawr'fik, *a.* Relating to or affected by metamorphosis. **METAMORPHOSIC**, met-a-mawr'fo-sik, *a.* and *morphe*, form, Gr.) Changing the form or transforming.

METAMORPHOSE, met-a-mawr'fo-se, *v. a.* To change the form or shape of anything; to transform. change the form of insects, as from the larva to the winged animal.

METAMORPHOSER, met-a-mawr'fo-sur, *s.* One who changes the shape of anything.

METAMORPHOSIS, met-a-mawr'fo-sis, *s.* The process of metamorphosis; change of shape; a change in the form of being; any change of form or shape.

METAMORPHOSISTS, met-a-mawr'fo-sists, *s.* Ecclesiastical History, a name given to a sect who affirm that the body of Christ ascended into heaven wholly deified.

METAMORPHOSTICAL, met-a-mawr'fo-sis-tikal, *a.* Relating to or affected by metamorphosis.

METAPHOR, met'a-fur, *s.* (*metaphora*, Gr.) A figure of speech, by which the name and properties of one object are ascribed to another; a similitude; a similitude reduced to a single word.

METAPHORICAL, met-a-for'e-kal, *a.* Relating to or affected by metaphor. **METAPHORIC**, met-a-for'ik, *a.* Relating to or affected by metaphor. **METAPHORICALLY**, met-a-for'e-kal-ly, *ad.* In a metaphorical manner; not according to the primitive meaning of the word.

METAPHORICALLY—METE.

METAPHORICALLY, met-a-for'e-kal-le, *ad.* Figuratively; not literally.

METAPHORIST, met'a-for-ist, *s.* One that makes or uses metaphors.

METAPHOSPHATES, met-a-fos'fayts, *s.* A genus of Salts, in which the phosphoric acid is combined with soda, baryta, oxide of silver, &c.

METAPHOSPHORIC ACID, me-a-fos-for'ik as'sid, *s.* The dry flaky acid obtained by burning phosphorus under a bell-glass of air or oxygen.

METAPHRASE, met'a-fraze, *s.* (*meta*, change, and *phrasis*, a speaking, Gr.) A verbal translation from one language into another; a close interpretation.

METAPHRAST, met'a-frast, *s.* A translator.

METAPHRASTIC, met-a-fras'tik, *a.* Close in interpretation; literal.

METAPHYSIC, met-a-fiz'ik, *a.* Relating to

METAPHYSICAL, met-a-fiz'e-kal, *s.* metaphysics; versed in metaphysics; supernatural; preternatural.—Obsolete in the last two senses.

Which fate and metaphysical aid doth seem
To have crown'd thee withal.—*Shaks.*

METAPHYSICALLY, met-a-fiz'e-kal-le, *ad.* In the manner of metaphysical science.

METAPHYSICIAN, met-a-fe-zish'un, *s.* One versed in metaphysics.

METAPHYSICS, met-a-fiz'iks, *s.* (*meta*, after, *physis*, nature, Gr.) The science of the principles and causes of all things existing, or that which regards the ultimate grounds of being, as distinguished from its phenomenal modifications. The science has been divided into six parts—ontology, cosmology, anthropophosy, psychology, pneumatology, and metaphysical theology.

METAPLASM, met-a-plazm, *s.* (*metaplasmos*, Gr.) In Grammar, a transmutation or change made in a word, by transposing or retrenching a syllable or letter.

METAPOSIS, met-a-po'sis, *s.* (Greek, change.) In Pathology, the degenerating of one disease into another.

METASTASIS, me-tas'ta-sis, *s.* (*meta*, and *stasis*, a standing, Gr.) The removal of a disease from one part to another, or such an alteration as is succeeded by a solution.

METASTELMA, met-a-stel'ma, *s.* (*meta*, instead, and *stelma*, a crown, Gr. the throat being, as it were, crowned by five exerted teeth instead of a corona.) A genus of West Indian plants: Order, Asclepiadaceæ.

METATARSAL, met-a-târ'sal, *a.* Belonging to the metatarsus.

METATARSUS, met-a-târ'sus, *s.* (*meta*, and *tarsos*, the sole of the foot, Gr.) The middle of the foot, or part between the ankle and the toes.

METATHESIS, met-ath'e-sis, *s.* (Greek, change.) In Rhetoric, a figure of speech, in which words are transposed so as to convey a suitable meaning; as, 'we should not live to eat, but eat to live.'

METATOME, met'a-tome, *s.* (*meta*, and *temno*, I cut, Gr.) In Architecture, the space between one dentel and another.

METATOPE.—See *Metope*.

METATORES, met-a-to'ris, *s. plu.* (Latin.) In Antiquity, officers in the Roman army, who were sent forward to mark out ground suitable for an encampment.

MEIZ, meet, *v. a.* (*metan*, Sax. *metan*, Dut. *me-*

METECORN—METEOROLOGICAL.

tior, Lat.) To measure; to ascertain quantity, dimensions, or capacity, by any rule or standard; —*s.* (*mitta*, Sax.) measure; limit; boundary.

METECORN, meet'kawrn, *s.* In Archæology, a certain measure or quantity of corn, formerly given by the lord of a manor as a reward for labour.

METEMPSYCHI, me-temp'se-ki, *s.* In Ecclesiastical History, a name given to a sect of heretics, who, in imitation of Pythagoras and Plato, believed in the transmigration of souls.

METEMPSYCHOSE, me-temp'se-kose, *v. a.* To translate from one body to another, as the soul.

METEMPSYCHOSIS, me-temp'se-ko'sis, *s.* (Greek.) The doctrine of the transmigration of souls from one body into another.

METEMPTOSIS, me-temp'to-sis, *s.* (*meta*, and *pipto*, I drop, Gr.) In Chronology, the solar equation necessary to prevent the new moon from happening a day too late, or the suppression of the bissextile one in 134 years.

METEOR, me'te-ur, *s.* A term applied by some authors to denote all the various phenomena of the atmosphere, while others apply it exclusively to denote those luminous bodies which appear at a considerable height above the earth. They sometimes proceed in this hemisphere from north to south with vast velocity, frequently breaking into several smaller ones, sometimes vanishing with a report, and sometimes not. Considering *meteor* in its extended sense, as including all atmospheric transitory phenomena, it is necessary to divide them into classes, according to their origin or nature. Thus winds, whirlwinds, &c. are *aerial* meteors; dews, fogs, rain, snow, and other depositions or disturbances of the water of the atmosphere, are called *aqueous* meteors. Many arise from the refraction or reflection of light from the aqueous particles suspended in the air—these are called *luminous* meteors; such are halo, mirage, rainbow, &c.; while those that present the appearance and phenomena of combustion are *igneous* meteors—such are falling stars, lightning, the aurora borealis, &c.

METEORIC, me-te-or'ik, *a.* Relating to meteors; consisting of meteors; proceeding from a meteor.

Meteoric iron, a mineral of a pale steel-grey colour, occurring ramose, and disseminated in meteoric stones or aerolites. Native or meteoric iron is composed of iron and nickel, the latter varying from one to nearly ten per cent. Pallus found a mass of native iron in Siberia, which weighed 1680 lbs., and which tradition stated had fallen from the atmosphere. Meteoric iron is unlike any of the ores we meet with on earth. Naturalists are not agreed as to the origin of these stones.—See *Aerolites*.

METEORITE, me'te-o-rite, *s.* A solid substance or body falling from the high regions of the atmosphere.

METEORIZE, me'te-o-rize, *v. n.* To ascend in evaporation.—Seldom used.

METEOROLITE, me'te-o-ro-lite, *s.* (*meteor*, and *lithos*, a stone, Gr.) A meteoric stone; a compound of earthy and metallic matter, which falls to the earth from an elevated point in the atmosphere.

METEOROLOGIC, me-te-o-ro-loj'ik, *a.* (*meteor*, *meteorologic*, me-te-ro-loj'e-kal, and *logos*, a discourse, Gr.) Relating to the doctrine of meteors.

MEZZOTINTO—MICHE.

MEZZOTINTO, met-zo-tin'to, *s.* (Italian.) A particular mode of engraving on copper. The sheet of copper is first scratched over and over in every direction, with an instrument made for the purpose, till the face of it be wholly covered with lines or scratches, so close to each other, that if an impression were taken from it, it would be one uniform blot or smut. This being done, the design is marked on it; after which the engraver proceeds with burnishers, scrapers, &c., to take out the furrows in those places where the lights are to be, leaving more or less black those parts that are to remain in shadow. It is the most expeditious mode of engraving.

MIASM, mi'azm, } *s.* (Greek, pollution or corruption.) A certain volatile deleterious principle, arising either from the bodies of the sick, from animal substances, or from the earth, and capable of exerting a morbid influence on those exposed to its action.

MIASMAL, mi-az'mal, *a.* Relating to miasma; impregnated with miasma.

MIASMATIC, mi-az-mat'ik, *a.* Partaking of the noxious qualities of pestilential effluvia.

MICA, mi'ka, *s.* (*mica*, shining, Gr.) A mineral, one of the ingredients of granite, gneiss, and mica slate. It occurs in regular or oblique rhombic prisms, divisible in thin flexible laminae. The varieties differ much in their composition. A species of black mica from Siberia, according to Klaproth, contained—potash, 10.0; silica, 42.5; alumina, 11.5; magnesia, 9.0; oxide of manganese, 2.0; oxide of iron, 22. According to Haüy, the large variety, called Muscovy-glass, which occurs in plates of more than a yard in diameter, in veins of granite and mica slate, in some parts of Russia, may be divided into laminae no thicker than $\frac{1}{300,000}$ th of an inch. It is used for the solar microscope, and, instead of glass, in the Russian ships of war, being less liable to be broken by the concussion of air during the discharge of heavy artillery.

MICACEOUS, mi-ka'shus, *a.* Containing mica, resembling mica. *Micaceous iron ore*, a variety of oxide of iron, occurring generally in amorphous masses, and composed of thin six-sided laminae; colour iron-black or steel-grey; opaque, with a metallic lustre and greasy feel. It is said to contain nearly 70 per cent. of iron.

MICAH, mi'ka, *s.* The book of Micah, a canonical book of the Old Testament, written by the prophet Micah, the sixth of the lesser Hebrew prophets.

MICA SCHIST, mi'ka shist, *s.* One of the oldest groups of stratified rocks known to geologists, and extensively distributed throughout the mountain regions of the globe, often in contact with granite, but more frequently superimposed upon, or interstratified with, gneiss and other primary rocks. It is properly a slate, consisting of mica and quartz. It is also called *mica slate*.—See Schist.

MICE, mise, *s.* Plural of Mouse.

MODULE, mod'ule, *s.* (French, from *modulus*, Lat.) A model or representation. In Architecture, a measure which may be taken at pleasure to regulate the proportions of an order, or the dispositions of the whole building; the diameter, or semi-diameter of the column at the bottom of the shaft, has usually been selected by architects as their *module*. Vignola chose twelve parts of the Tuscan and Doric, and eighteen of the other orders. The module of others is divided into thirty parts or minutes; some, on the other hand, take twenty parts for the Doric, and twenty-two and a half for the Ionic, Corinthian, &c. *Modulus of Elasticity*, a term in relation to elastic bodies, which expresses the weight of themselves continued which would draw them to a certain length, without destroying their elastic power;—*v. a.* to model; to shape; to modulate. —Obsolete as a verb.

MODUS, mo'dus, *s.* (Latin, *modus*.) A discharge from the payment of tithes, by custom or prescription, is said to be either *de modo decimandi*, (i. e. in the manner of tithing or paying tithes,) or *de non decimando*, (i. e. in paying no tithes.) A *modus decimandi*, commonly called by the simple name of *modus* only, is where there is by custom a particular manner of tithing allowed, different from the general manner of taking tithes in kind; and this is sometimes effected by a pecuniary compensation, as twopence an acre for the tithe of land; sometimes it is a compensation in work and labour, as that the parson shall have only the twelfth cock of hay, and not the tenth, in consideration of the owners making it for him, and the like; in short, any means whereby the general law of tithing is altered, and a new method of taking them is introduced, is called a *modus decimandi*, or special manner of tithing. A discharge from the payment of tithes

by a custom or prescription, *de non decimando*, arises either from some personal privileges which the party enjoys who is so discharged, or by real composition made in lieu of payment of tithes, or from some other like circumstance. Thus the king, by his prerogative, is discharged from all tithes; so a vicar is discharged from paying tithes to the rector, and the rector to the vicar. A real composition is made by an agreement between the owner of lands and the parson or vicar, with the consent of the ordinary and the patron, that such lands shall for the future be discharged from payment of tithes, in consideration of some land or other real recompense being given to the parson in lieu and satisfaction thereof.

MOHAMMEDANISM, mo-ham-me-dan-izm, *s.* The **MOHAMMEDISM**, mo-ham-med-izm, } religious system of Mohammed, designated also by Islam, or Salvation. It consists of two parts—Iman, or the dogmatical faith; and Din, practical religion. The first includes the belief in one eternal, omnipotent, most merciful, and all-wise God; the existence of angels; the doctrine of predestination; veneration to the prophets of the Old Testament, and to Jesus Christ as to one who approaches near to the presence of God—but not as the Son of God—and that Mohammed is the last and true prophet; immortality; the resurrection of the dead; that idolaters and unbelievers shall be hurled into hell, but that the pious Moslems shall be rewarded with everlasting happiness in a paradise, enlivened by heavenly virgins, shady groves, and delicious fruits. The Moslem's duties are, prayers at five stated times a-day, with the face directed towards Mecca; fasting during the month of Ramadhan; and alms, to which the fortieth part of a person's property must be appropriated, and which must be bestowed on foes, and on the brute creation,

as well as the faithful, when required; charity and benevolence are described as the virtues by which the Supreme Being is best worshipped, and, without the practice of which, neither fasting nor prayer can gain admittance into heaven. Attendance at mosque is enjoined on Fridays, and a holy pilgrimage to Mecca once in the course of a man's life. The deadly sins are, wilful murder, adultery, calumny, perjury, and false testimony; usury, gaming, and the use of wine and pork, are strictly forbidden.

- MORSUS DIABOLI**, mawr'sus de-ab'o-le, *s.* (Latin, devil's bite.) In Anatomy, a name applied to the jagged and torn-like outer ends of the Fallopian tubes.
- MORT**, mawrt, *s.* (French.) A tune sounded at the death of game; a salmon in his third year.
- MORTAL**, mawr'tal, *a.* (*mortalis*, Lat.) Subject to death; destined to death; deadly; destructive; procuring death; bringing death; human; belonging to man; condemned to be punished with death; not venial; extreme; violent;—(vulgar in the last two senses);—*s.* man; a human being; a being subject to death.
- MORTALITY**, mawr-tal'e-te, *s.* (*mortalitas*, Lat.) Subjection to death; state of a being subject to death; death; power of destruction; frequency of death; human nature.
- MORTALIZE**, mawr'tal-ize, *v. a.* To make mortal.
- MORTALLY**, mawr'tal-le, *ad.* Irrecoverably; in a manner that must cause death; extremely.
- MORTAR**, mawr'tur, *s.* (*mortier*, Fr. *mortarium*, Lat.) A cement used for building purposes, composed of lime, sharp coarse sand, and sometimes the hair of animals, all thoroughly mixed together with water, so as to form a half fluid, half solid mass. Also, a strong hollow instrument, usually made of marble, Wedgewood ware, or metal, in which hard or brittle substances are pulverised by percussion or grinding with another instrument, called a *pestle*. Mortars usually partake of the shape of an inverted bell or cup, but their form, capacity, and solidity, as well as the material of which they are made, vary with the object for

which they are designed. *Electrical mortar*, or *Electrical bomb*, a small apparatus, intended to show the mechanical effects of electricity, upon the same principle as Kinnersley's air thermometer. The bomb is of ivory, bone, or other non-conducting substance. A ball of light wood fits a semi-circular cavity at the mouth of the bomb, and a small chamber is made beneath it. Two wires (one at top, the other leading to the stand beneath,) pass into the cavity, and are there separated by a small interval. When a shock is passed through the wires, the air within the cavity is rarefied, its sudden expansion throwing out the ball. *Hydraulic mortar*, or *Roman cement*, a cement which acquires but little solidity in the air, but becomes extremely hard under water. The poorer kinds of limestone are burnt, ground, mixed with water and sand, and immediately applied to the work.

MORTER, mawr'tur, *s.* A lamp, or light.—Obsolete.

MORTGAGE, mawr'gay, *s.* (*mort*, dead, and *gage*, pledge, Fr.) In Law, a pawn of land or tenement, or anything immovable, laid or bound for money borrowed, to be the creditor's for ever, if the money be not paid at the day agreed upon; and the creditor holding land and tenement upon this bargain is called *tenant in mortgage*. A *mortgage* may be defined to be a debt by specialty, secured by a pledge of lands, of which the legal ownership is vested in the creditor, but of which in equity the debtor, and those claiming under him, remain the actual owners, until debarred by judicial sentence on their own *lashes*. It is a security founded on the common law, and perfected by a judicious and wise application of the principles of the civil law;—*v. a.* to grant an estate in fee as security for money lent or contracted, to be paid at a certain time; to pledge; to make over to a creditor as a security.

MORTGAGEE, mawr-gay-jé, *s.* The person to whom an estate is mortgaged.

MORTGAGER, mawr-gay-jur, *s.* The person who grants an estate as security for a debt, as above specified.

MORTIER, mor'te-er, or mor'te-ay, *s.* (French.) A cap of state worn by the first kings of France, the form of which is still preserved in the cap worn by the president of *la cour de Paris*.

MORTIFEROUS, mawr-tif'er-us, *a.* (*mors*, death, and *fero*, I bring, Lat.) Bringing or producing death; deadly; fatal; destructive.

MORTIFICATION, mawr-te-fe-ka'shun, *s.* (French.) In Pathology, a generic term denoting the death of any part of the body. The particular stages of mortification are designated in this country by the terms:—1. *Gangrene*, or the incipient stage. On the continent it denotes the complete form. 2. *Sphacelus*, or complete mortification. Some apply the term *gangrene* to the death of the superficial texture, and *sphacelus* to the death of the whole substance of an organ. 3. *Slough*, the technical term for the fibrous, senseless substance, resulting from *sphacelus*. 4. *Necrosis*, or death of the bones; the term *caries*, meaning ulceration of bone. 5. *Hospital gangrene*, or the combination of humid *gangrene* with phagedenic ulceration. 6. *Pustule maligne*, or *charbon* of the French; malignant pustule, or carbuncle, supposed by some to originate in horned cattle. 7. *Gangrenous erysipelism*, necrosis ustiliginosa seu epidemica, arising

from the use of spurred rye. Other designations of mortification are:—1. *Inflammatory, humid*, or *acute gangrene*, so called when it is preceded by inflammation. 2. *Dry, chronic*, and sometimes *idiopathic*, so termed when it is not preceded by any, or much, inflammation. The dry form, being frequently found to affect old people, has been also named *gangrana senilis*. In Scripture, the act of subduing the passions and appetites by prayer, abstinence, and self-denial; humiliation or slight vexation; the state of being humbled by anything that wounds or abuses pride; destruction of active qualities, applied to metals;—(obsolete in the last sense.) In Scottish Law, mortification is nearly synonymous with mortmain. By an act passed in 1587, land vested in the church was declared to be given for superstitious purposes, and to belong to the crown.

MORTIFIEDNESS, mawr'te-fide-nés, *s.* Humiliation; subjection of the passions.

MORTIFIER, mawr'te-fi-ur, *s.* He or that which mortifies.

MORTIFY, mawr'te-fi, *v. a.* (*mortifier*, Fr.) To destroy vital qualities; to destroy active powers or essential qualities; to subdue inordinate passions; to subdue or bring into subjection bodily appetite by self-denial, abstinence, &c.; to depress; to vex;—*v. n.* to lose vital heat and action, and suffer the dissolution or organic texture, as flesh; to corrupt or *gangrene*; to be subdued; to practise self-denial from religious motives.

MORTIFYING, mawr'te-fi-ing, *a.* Humiliating; tending to humble or abuse.

MORTISE, mawr'tis, *s.* (*mortaise*, Fr.) In Architecture, the junction of two pieces of wood or other material, the cavity cut in one piece being the receiving correspondent portion of the wood of the other, which is termed a *tenon*;—*v. a.* to cut or make a mortise in; to join timbers by a tenon and mortise.

MORTMAIN, mawr't'mane, *s.* In Law, an alienation of lands and tenements to any guild, corporation, or fraternity, and their successors, as bishops, parsons, vicars, &c. In *mortmain*, *mortua manu*, into a *dead hand*, as it were never to revert to the donor, or any temporal or common use.

MORTPAY, mawr't'pay, *s.* Dead pay; payment not made.—Obsolete.

MORTRESS, mawr'tres, *s.* A dish of meat of various kinds beaten together.—Obsolete.

MORTUARIES, mawr'tu-a-res, *s.* (*mortuaire*, Fr.) In Law, a sort of ecclesiastical heriot, being a customary gift claimed by and due to the minister in very many parishes on the death of his parishioners. They seem originally to have been, like lay-heriots, only a voluntary bequest to the church, being intended, as Lyndewode informs us, from a constitution of Archbishop Langham, as a kind of expiation and amends to the clergy for the personal tithes and other ecclesiastical duties which the laity in their lifetime might have neglected or forgotten to pay. For this purpose, after the lord's heriot or best good was taken out, the second best chattel was reserved to the church as a mortuary; and therefore, in the laws of King Canute, this mortuary is called *soul-acot*, or *symbolum anime*.

MORUS, mo'rus, *s.* (*morea*, the Greek name of the mulberry.) The Mulberry, a genus of plants: Order, Moraceæ.

MORVENITE, maw've-nite, *s.* (*Morven*, a place in the highlands of Scotland.) A name given by Dr. Thomson to a variety of mineral hematoma.

MOSAIC, mo-za'ik, *s.* (*mosaico*, Ital.) A mode of representing, by inlaying of small cubes of glass, marble, shells, wood, &c. It is distinguished from marquetry by being only applied properly to works of stone, metal, or glass. *Mosaic work*, in Architecture, the inlaying of pavements, walls, &c., with small dies of different coloured stones or glass, in regular figures, to represent historical objects. *Mosaic gold*, bisulphuret of tin, a yellow, flaky substance, sometimes employed in ornamental japan-work. The name is also given to a superior kind of brass, and to a yellow alloy of copper, zinc, and gold.

MOSAIC, mo-za'ik, } *a.* (from *Moses*.) Re-
MOSAICAL, mo-za'e-kal, } lating to the writings or laws of Moses.

MOSASAURUS, mos-a-saw'rus, *s.* The name given to a gigantic extinct aquatic Saurian, the remains of which are found in the Chalk formation. It is supposed to have been allied to the Monitors.

MOSCARIA, mos-ka're-a, *s.* A genus of Composite plants: Suborder, Tubuliflorae.

MOSCHATA, mos'ka-ta, *s.* (*moschos*, a sucker, or young shoot, Gr.) A genus of Actiniae, or Soft Zoantharia, which has some resemblance to Holothuria. It lives and floats freely in the sea.

MOSCHATEL, mos'ka-tel, *s.* The plant *Adoxa moschatellina*.

MOSCHIDÆ, mos'ke-de, *s.* (*moschus*, one of the genera.) Musk-deer, a family of Ruminants of the deer kind. Characters—feet bisulcate; no horns; no incisor teeth above, but eight beneath.

MOSCHOSMA, mos-kos'ma, *s.* (*moschos*, musk, Gr.) A genus of musk-scented herbs, with minute flowers: Order, Lamiaceae.

MOSCHUS, mos'kus, *s.* (Latin, musk, in reference to the males being provided, on the middle of the abdomen, with a large pouch secreting musk.) The Musk-deer, a genus of Ruminants: Type of the family Moschidæ.

MOSLEM, mos'lem, *s.* A Mohammedan or Mussulman.

MOSQUE, mosk, *s.* (*moschiad*, or *mesched*, Arabic.) A Mohammedan place of worship, the distinctive architectural marks of which are generally cupolas and minarets.

MOSQUITO, mos-kit'o, *s.* A name given to certain stinging flies or gnat-like insects, probably belonging to several genera, some of which seem to belong to the same genus as the common gnat. They are the source of much molestation in humid, warm countries.

Moss, mos, *s.* (*meos*, Sax. *moos*, Germ.) A cellular or vascular acrogenous plant, with the spore-cases either plunged in the substance of the frond, or enclosed in a cuplike hood. The Mosses form the Muscales or Muscal Alliance of Lindley, and embrace the Hepaticæ and the Musci—to the latter, however, is the term *moss* properly confined, and contains the Andracæ or Split Mosses, in which the spore opens by valves, with an operculum without elaters, and the Bryacæ or Urn-mosses, which have the spore-cases valvular, with an operculum without elaters. The first consists of branching, moss-like, reddish or brown plants, with imbricated leaves, either with or without ribs; the second, of erect or creeping, terrestrial or

aquatic cellular plants, having a distinct axis of growth, destitute of a vascular system, and covered with minute, imbricated, entire, or serrated leaves; (*mase*, Swed.) a bog; a place where peat is found; —*v. a.* to cover with moss.

MOSSGROWN, mos'grone, *a.* Covered or overgrown with moss.

MOSSINESS, mos'ss-ness, *s.* The state of being overgrown with moss.

MOSTROOPER, mos'troop-ur, *s.* A bandit; a robber. This name was formerly applied to the banditti who carried on their marauding depredations on the borders of Scotland and England, because they generally dwelt or encamped on the mosses.

MOSSY, mos'se, *a.* Overgrown with moss; covered with moss; abounding with moss, or bordered with moss.

MOST, moste, *a.* (*most*, Sax. *meest*, Dan. *Dut.*) Superlative of *More*. Consisting of the greatest number or quantity; greatest;—*ad.* in the greatest degree; *most* being used to express the superlative degree, it is used before any adjective, as *most wicked*, &c.;—*s.* (used as a substitute for a substantive when the substantive is omitted or understood;) the greatest number or part; *the most*, the greatest value, amount, or advantage, or the utmost in extent, degree, or effect; *at the most*, the greatest degree or quantity.

MOSTIC, mos'tik, *s.* (*mahlerstock*, Germ.) A painter's staff or stick, on which he rests his hand in painting.

MOSTLY, moste'le, *ad.* For the greatest part.

MOSTRA, mos'tra, *s.* (Italian.) In Music, a little mark at the end of each line, showing what note the next line begins with—the *guidon* of the French.

MOSTWHAT, moste'hwawt, *ad.* For the most part.—Obsolete.

MOTE, mote, *s.* (*mot*, Sax.) In Archaeology, a meeting; an assembly or court of judicature; a small particle; anything proverbially small.

MOTELLA, mo-tel'la, *s.* (*motos*, bent, Gr. from the first dorsal fin being composed of slender fleshy filaments, extending to the length of the pectorals.) A genus of fishes: Family, Gadidæ.

MOTET, mo'tet, *s.* (*motetta*, Ital.) In Music, a vocal composition set to sacred words, and used in the service of the Roman Catholic Church.

MOTH, moth, *s.* (Saxon.) The small insect *Phalena tenebra*, so destructive in its larva state to books and furniture; also, the name given to nocturnal butterflies. *Moth mullien*, the British plant *Verbascum battaria*, and the other species of the same genus, *i. e.* blattarioides, virgatum, and grandiflorum.

MOTHEAT, moth'ete, *v. a.* To eat or prey upon, as a moth preys upon a garment.

MOTHEATEN, moth'e-tin, *a.* Eaten or preyed upon by moths.

MOTHEN, moth'n, *a.* Full of moths.—Obsolete.

MOTHER, muth'ur, *s.* (*moder*, Sax. *mutter*, Germ. *mater*, Lat. *madre*, Span. Port. Ital.) A female parent, especially one of the human race; a woman who has borne a child; that which has produced anything; that which has preceded in time; the oldest or chief of anything; a familiar term of address or appellation of an old woman or matron; an appellation given to a woman who exercises care and tenderness towards another, or gives

parental advice; a thick, slimy substance con-
creted in liquors, particularly in vinegar; hysterical
passion;—(obsolete in the last sense;)

Oh, how this mother swells up tow'rd my heart!—*Shaks.*

Mother-water, the impregnated water which re-
mains when any saline solution has been evaporated,
so as to deposit crystals on cooling. *Mother-of-
pearl*, the hard, silvery, brilliant internal layer
of several kinds of shells, particularly of the oyster
tribe, which is often variegated with changing
purple and azure colours. These brilliant hues do
not depend upon the nature of the substance, but
upon its structure. The microscopic wrinkles or
furrows which run along the surface of every slice,
act upon the reflected light in such a way as to
produce this chromatic effect. *Mother-of-pearl* is
brittle and very delicate to work, but it may be
fashioned by saws, files, and drills, with the aid
sometimes of a corrosive acid. It is polished by
trocks, the peroxyde of iron, putty powder, &c.
Mother-spots, congenital spots and discolourations
of the skin;—*a.* natural; received by birth;
native; vernacular; received from parents or an-
cestors;—*r. n.* to gather concretion;—*v. a.* to
adopt as a son or daughter.

MOTHERHOOD, muth'ur-hüd, *s.* The state of being
a mother.

MOTHERING, muth'ur-ing, *a.* To go a mothering,
is to visit parents on Midlent Sunday, a custom
said to be derived from the ancient practice of
persons visiting their mother church on that day,
and making their offerings at the high altar: also
termed Midlenting.

MOTHER-IN-LAW, muth'ur-in-law, *s.* The mother
of a husband or wife.

MOTHERLAND, muth'ur-land, *s.* The land of one's
mother or parents.

MOTHERLESS, muth'ur-less, *a.* Destitute of a
mother.

MOTHERLY, muth'ur-le, *a.* Relating to a mother;
becoming a mother; tender; parental;—*ad.* in
the manner of a mother.

MOTHERWIT, muth'ur-wit, *s.* Native wit; com-
mon sense.

MOTHERY, muth'ur-e, *a.* Concreted; resembling
or partaking of the nature of a mother.

MOTHY, moth'e, *a.* Full of moths.

MOTIFIC, mo-tif'ik, *a.* (*motus*, and *facio*, I make,
Lat.) Producing or causing motion.

MOTION, mo'shun, *s.* (*motio*, Lat.) The act of
changing position in space; change of local posi-
tion; change of distance between bodies; animal
life and action; manner of moving the body; port;
gait; change of posture; action; military march
or movement; agitation; internal action; direc-
tion; tendency; impulse communicated; tendency
of the mind; thought impressed; action proceed-
ing from any cause, external or internal; propo-
sition made; proposition offered, especially a
proposition made in a deliberative assembly; a
puppet-show or puppet;—(obsolete in the last
sense.) *Motion in court*, in Law, an occasional
application of the court, by the parties or their
counsel, for the purpose of obtaining some rule or
order of court which becomes necessary in the
progress of a cause. In Music, the manner of
beating the measure so as to hasten or retard the
pronunciation of the words or notes. In Painting,
a change of place or position, which, from certain
attitudes, a figure seems to be making in its re-

presentation in a painting. It is implied from the
attitude which prepares the animal for the given
change, and differs from action,—which see.

Quantity of motion, in Mechanics, the product of
the mass or moving body by the velocity. In
Animal Physiology, this may be distinguished as—

1. The *Voluntary*, the spontaneous act of the will
of the individual; a function attached to the *brain*.
2. The *Excited*, of the *Reflex function*, as the
closure of the larynx on the contact of acrid
vapours; of the pharynx on that of the food, &c.,
a function of the *medulla*. 3. That of the *Irrita-
bility*, as the action of the heart, the intestinal
canal, &c., a function of the *muscular fibre*. In
Vegetable Physiology, as the vascular circula-
tion, which exists in plants as well as in animals;
and the muscular movement, which may be ob-
served—1. In the *Bud*, as it spreads its leaves.
2. In the *Flower-bud*, as it throws back its petals
and its calyx. 3. In the *Stamens*, when at the
period of fecundation they bend towards the pistil
which they surround. 4. In the corolla of the
Great Nightshade, when it closes itself against
the rays of the sun, and opens to the freshness of
the night air. 5. In the *Convolvulus*, which, on
the contrary, shuts its flowers in the evening, and
expands them again in the morning. 6. In the
Acacias, which fold up their leaves during the
night, and open them during the day; or—7. In
the *Mimosa pudica*, which recoils, as if by an
electric impulse, from the slightest touch;—or,
at a lower point in the scale—8. In those *Fun-
gosities*, which, when they are ripe, throw out
puffs of dust, or which are themselves projected
to a distance, like shells from a mortar. In what
do these motions differ from spontaneous move-
ments?—*Raspail*. *Absolute motion* is that which
is independent of any other motion, or friction, or
retarding power; in which general sense, however,
it never falls under our own observation. All
those motions which we call absolute, are, in fact,
only relative, being referred to the earth, which is
itself in motion. For convenience, however, we
consider a change of place on the earth's surface,
from some certain point of starting, as an *absolute*
motion. *Angular motion* is the motion of a body,
as referred to a centre about which it revolves.
This is the only case in which the parts of a body
are in motion, without the whole of it being so.
Accelerated and retarded motions are those which
are continually increasing or diminishing in velocity,
while *equable motion* continues uniform. *Com-
pound motion* is the result of two or more distinct
forces acting together. *Natural motion* is that
which arises from the effect of gravitation, or of the
centrifugal force. *Relative motion* is the altera-
tion of place between two objects in motion rela-
tively to each other. A *resultant motion* is that
which results from the different power of two
opposite forces; thus, a steam-engine may have a
power of six horses, but the friction of the various
parts may diminish this two horses; thus, the
resultant force or motion will be four horses.
The *laws of motion* are as follows, as delivered by
Sir I. Newton:—First, every body perseveres in
its state of rest, or uniform motion in a right line,
until a change is effected by the agency of some
external force. Second, any change effected in
the quiescence or motion of a body, is in the direc-
tion of the force impressed, and is proportional to

- it in quantity. Third, action and re-action are equal and in contrary directions;—*v. a.* to propose;—see *Move*;—*v. n.* to advise; to make proposal; to offer plans.—Seldom used as a verb.
- MOTIONER**, mo'shun-ur, *s.* A mover.—Obsolete.
- MOTIONLESS**, mo'shun-less, *a.* Wanting motion; being at rest.
- MOTIVE**, mo'tiv, *a.* Causing motion; having power to move, or tending to move;—*s.* (*motif*, Fr.) that which determines the choice, or excites to action; that which may or ought to excite to action; reason; cause. *Motive force*, momentum, or that force which tends to produce motion.
- MOTIVITY**, mo-tiv'e-te, *s.* The power of producing motion.
- MOTLEY**, mot'le, *a.* Variegated in colour; consisting of different colours; dappled.
- MOTMOT**, mot'mot, *s.* In Ornithology, a beautiful South American bird, about the size of a jay, with a long tail, the two middle feathers of which are destitute of vanes for about an inch, at a small distance from the extremity. They are very shy and timid, and if taken when old, invariably refuse all kinds of food. Their usual places of resort are the depths of large forests, and they build their nests in the ground.
- MOTOR**, mo'tor, *s.* (Latin, a mover.) A term applied by anatomists to certain muscles, also to two nerves of motion distributed on the muscles of the eye. These nerves exist in pairs, and are the third and fifth cerebral nerves of anatomical writers;—*a.* moving; imparting motion.
- MOTORY**, mo'tar-e, *a.* Giving motion.
- MOTTO**, mot'to, *s.* An Italian word, answering to the French *mot*, a word; is now employed to denote any word, or short sentence, which is put to the coats of arms of nobility and gentry, or that which is used as an emblem or device on any occasion.
- MOUGEOTIA**, moo-je-o'she-a, *s.* (in honour of J. B. Mougeot.) A genus of Algæ: Order, Confervaceæ.
- MOUGH**, mow, } *s.* (*mogthe*, Sax.) A moth.—
- MOUGHT**, mowt, } Obsolete.
- MOUGHT**, mowt. Used for *Might*, the *past* of the old verb *Mowe*, now converted into *May*.—Obsolete.
- MOULD**, molde, *s.* (*mold*, *molda*, Sax.) Fine soft earth, or earth easily pulverized, such as constitute soil; a substance like down, which forms on bodies which lie long in warm and damp air;—(*molde*, Span.) the matrix in which anything is cast and receives its form; cast; form; the suture or contexture of the skull; in ship-building and joiner-work, a thin piece of wood used as a pattern; among gold-beaters, pieces of vellum, or a like substance, laid over one another, between which the leaves of gold are laid for beating. In Anatomy, the interstice between the parietal and the frontal bones, otherwise called *fontanella*, the fontanel. In Horticulture, vegetable earth formed by the mixture of dung and other materials. In Mechanics, a form in which anything is cast, as the moulds in which glaziers cast their lead; also the piece of hard wood or iron hollowed at the edge, and used by masons for forming mouldings or cornices, &c. *Mould loft*, a large room in a dockyard, in which the several parts of the ship are drawn out in their proper dimensions;—*v. a.* to form into a particular shape; to shape to a model; to knead; to cause to contract mould; to cover with mould or soil;—*v. n.* to contract mould; to become mouldy.
- MOULDABLE**, molde'a-bl, *a.* That may be formed or moulded.
- MOULDER**, molde'dur, *s.* One who moulds or forms into a particular shape;—*v. n.* to turn to dust by natural decay; to crumble down; to waste away gradually;—*v. a.* to turn to dust; to crumble; to cause to waste.
- MOULDINESS**, mole'de-nes, *s.* The state of being mouldy. The term is likewise applied to all minute Fungi which appear in mosses upon organic bodies, some of the most common of which are that of *Ascopthora mucedo*, *Hydrophorea stercorea*, *Mucor mucedo*, *Eurotium herbararium*, *Cladosporium herbarum*.
- MOULDING**, mowld'ing, *s.* In Architecture, the ornamental contours or forms applied to the edges of the projecting or receding members of an order. The regular mouldings are—the fillet, listel, or annulet; the astragal, or bead; the torus; the scotia, or trochilus; the echinus ovola, or quarter round; the cyma reversed; inverted cyma, or ogee; and the cavetto, or hollow;—anything cast in a mould.
- MOULDWARP**, molde'wawrp, *s.* A mole.
- MOULDY**, mol'de, *a.* Overgrown with mould.
- MOULINET**, mo'lin-et, *s.* A kind of turnstile.
- MOULINIA**, moo-lin'se-a, *s.* (in honour of M. C. de Moulins of Bourdeaux.) A genus of plants: Order, Sapindaceæ.
- MOULT**, molte, *v. n.* (*moel*, Welsh.) To shed or cast the hair, feathers, skin, horns, &c., as an animal.
- MOULTING**, mole'ting, *s.* The act of shedding feathers, horns, &c.
- MOUNCH**, munsh, } *v. a.* To chew.—Obsolete.
- MAUNCH**, mawنش, } *v. a.* To chew.—Obsolete.
- A sailor's wife had chesnuts in her lap,
And mouncht, and mouncht, and mouncht.—Shaks.
- MOUND**, mownd, *s.* (*mund*, Sax.) Something raised as a defence or fortification, usually a bank of earth or stone; a bulwark; a rampart or fence;—*v. a.* to fortify with a mound. In Heraldry, (from *mundus*, the world, Lat.) a globe encircled, having a cross on the top.
- MOUNT**, mount, *s.* A mountain; a hill; an artificial hill raised in a garden or other place; a mound. In Fortification, a heap of earth, on which is a parapet to cover the cannon planted upon it. In Commerce, a quantity of plaster of Paris, equal to 3000 lbs. weight. *Mounts of Piety*, a name given to certain funds or establishments in Italy, where money is lent out on some small security;—*v. n.* to rise on high; to tower; to be built up to great elevation; to get on horseback to attain in value;—*v. a.* to raise aloft; to lift high; to ascend; to climb; to place on horseback; to furnish with horses; to embellish with ornaments. *To mount guard*, to do duty or watch at any particular post. *To mount*, the same as to carry when said of a ship, as 'she mounted twenty guns;' to furnish with horses, as a ment well or ill mounted, i. e. having good or horses. *Mount*, the order to mount the horse. *To mount a breach*, to run upon it for the purpose of attacking it. *To mount a piece*, to set it of ordnance upon the carriage, or to raise its muzzle higher.
- MOUNTABLE**, mownt'a-bl, *a.* That may be as-

MOUNTAIN, moun'tin, *s.* (*montagne*, Fr.) A vast protuberance of the earth; a large hill; anything proverbially huge;—*a.* relating to a mountain; found on mountains; growing or dwelling on a mountain. *Mountain-ash*, or *Roan-tree*, the well-known tree *Pyrus aucuparia*. The name is also given to other exotic species of the same genus. *Mountain-blue*, a species of blue malachite, or blue copper ore. Carbonate of copper occurs regularly crystallized in scopiform or stellular concretions, radiated, and also curved lamellar. It consists of copper, 66.0; carbonic acid, 18.0; oxygen, 8.0; water, 2.0: sp. gr. 3.20 to 3.60. *Mountain-cork*, an extremely light variety of asbestos. It has a fibrous structure, the fibres promiscuous and interwoven. Its constituents are—silica, 56.2; magnesia, 26.1; lime, 12.7; iron, 3.0; alumina, 2.0. *Mountain-damson*, the tall tree *Quassia simaruba*, a native of the Island of Jamaica. *Mountain-ebony*, the common name of the Leguminous plants of the genus *Bauhinia*: Suborder, Cassalpineae. *Mountain-limestone*, in Geology, the carboniferous limestone, a formation intermediate between the old red sandstone and the coal measures. Carboniferous limestone, however, as in the Scottish coal formation, is associated with seams of coal and the other rocks common to the fresh-water or upper series. *Mountain-milk*, a very soft spongy variety of the carbonate of lime. *Mountain-sorrel*, the plant *Oxyria acida*, a native of Britain. *Mountain-soop*, a variety of green earth of a brownish or blackish colour. It is massive, dull, smooth, and soapy to the touch, and adheres strongly to the tongue; it writes on paper. MULTIPLE, mul'te-pl, *a.* Containing many times; — *s.* In Arithmetic, a common multiple, of two or more numbers, contains each of them a certain number of times exactly: thus, 24 is a common multiple of 3 and 4. *Multiple point*, in Analytical Geometry, when two or more branches of a curve pass through the same point, it is called the *multiple point*. *Multiple values*, in Algebra, symbols which fulfil the algebraical conditions of a problem when different values are given them, as the roots of an equation, &c.

MULTIPLEX, mul'te-pleks, *a.* (Latin.) Manifold; having petals lying over each other in folds.

MULTIPLIABLE, mul-te-pli'a-bl, } *a.* That may
MULTIPLICABLE, mul'te-ple-ka-bl, } be multiplied.

MULTIPLIABLENESS, mul-te-pli'a-bl-nes, *s.* Capacity of being multiplied.

MULTIPLICAND, mul-te-ple-kan'd, *s.* (*multiplicandus*, Lat.) In Arithmetic, the number to be multiplied by another.

MULTIPLICATE, mul'te-ple-kate, *a.* Consisting of many, or more than one.

MULTIPLICATION, mul-te-ple-ka'shun, *s.* The act of multiplying or of increasing numbers; one of the principal rules in arithmetic and algebra, and consists in finding the amount of a given number or quantity, called the multiplicand, when repeated a certain number of times, expressed by the multiplier, and this amount is generally termed the product; also, the multiplier and multiplicand are commonly termed factors. Multiplication is either simple or compound: simple multiplication is when the proposed quantities are integers or whole numbers; compound multiplication implies that one of them is a compound quantity; that is, one consisting of several denominations, as pounds, shillings, and pence.

MULTIPLICATIVE, mul'te-ple-ka-tiv, *a.* Tending to multiply; having the power to multiply or increase numbers.

MULTIPLICATOR, mul-te-ple-ka'tur, *s.* The number by which another number is multiplied; a multiplier.

MULTIPLICIOUS, mul-te-plish'us, *a.* Manifold.—Obsolete.

MULTIPLICITY, mul-te-plis'e-te, *s.* State of being many.

MULTIPLIER, mul'te-pli-ur, *s.* One who increases numbers by multiplication; the number in arithmetic by which another is multiplied.

MULTIPLY, mul'te-pli, *v. a.* To increase in number; to make more by generation, accumulation, or addition; to perform the process of arithmetical

MULTIPOTENT—MUM.

multiplication;—*v. n.* to grow in number; to increase in extent; to extend; to spread.

MULTIPOTENT, mul-tip'o-tent, *a.* (*multus*, and *potens*, powerful, Lat.) Having manifold power, or power to do a variety of things.

MULTIPRESENCE, mul-te-prez'ens, *s.* The power or act of being present in more places than one at the same time.

MULTISCIOUS, mul-tish'us, *a.* Having a variety of knowledge.

MULTISILIQUOUS, mul-te-sil'o-kwus, *a.* (*multus*, and *siliqua*, a pod, Lat.) Having many pods or seed-vessels.

MULTISONOUS, mul-tis'o-nus, *a.* (*multus*, and *sonus*, a sound, Lat.) Having many sounds.

MULTISPIRAL, mul-te-spi'ral, *a.* (*multus*, many, and *spira*, a spire, Lat.) In Conchology, applied to those opercula of univalve shells which exhibit numerous and narrow spiral coils round a submedian centre.

MULTISTRATE, mul-te-stri'ate, *a.* In Zoology, marked with many streaks.

MULTISYLLABLE, mul-te-sil'la-bl, *s.* A word of many syllables; a polysyllable.

MULTITUDE, mul'te-tude, *s.* (French, from *multitudo*, Lat.) The state of being many; the state of being more than one; a number collectively; a sum of many; a great number, loosely and indefinitely; a crowd or throng; the populace.

MULTITUDINARY, mul-te-tu'din-ar-e, } *a.* Con-

MULTITUDINOUS, mul-te-tu'din-us, } sisting of a multitude or great number; having the appearance of a multitude; manifold.

MULTIVAGANT, mul-tiv'a-gant, } *a.* (*multivagus*,

MULTIVAGOUS, mul-tiv'a-gus, } Lat.) Wandering much.—Obsolete.

MULTIVALVE, mul'te-valv, *s.* (*multus*, and *valva*, valves, Lat.) A shell composed of more than two pieces, as in the Cirrhipeds.

MULTIVALVE, mul'te-valv, } *a.* Having

MULTIVALVULAR, mul-te-val'vu-lar, } many valves.

MULTIVERSANT, mul-te-ver'sant, *a.* (*multus*, and *verso*, I turn, Lat.) Protean; turning into many shapes; assuming many forms.

MULTIVIOUS, mul-tiv'e-us, *a.* (*multus*, and *via*, a way, Lat.) Having many ways; manifold.

MULTOCO, mul-tok'o, *s.* The code of laws of the Turkish Empire. It consists of the precepts contained in the Koran, the oral injunctions of Mahomet, and the decisions of the early caliphs and doctors.

MUMBLE-NEWS, mum'bl-nu-ze, *s.* A kind of talk-bearer.

MUMBLER, mum'bl-ur, *s.* One that speaks with a low inarticulate voice.

MUMBLINGLY, mum'bl-ing-le, *ad.* With a low inarticulate utterance.

MUMBUDGET, mum'bud-jit, *interj.* An expression denoting secrecy as well as silence, used in a contemptuous or ludicrous manner.

MUMCHANCE, mum'tshans, *s.* A game of hazard with dice; a fool.—Local.

MUMM, mum, *v. a.* (*mummer*, Fr.) To mask; to sport or make frolic in a mask or disguise.

MUMMER, mum'mur, *s.* One who masks himself and makes diversion in disguise; originally, one who gesticulated without speaking.

MUMMERY, mum'mur-e, *s.* (*momerie*, Fr.) Masking; frolicking in masks; diversion; contemptible amusement; farcical show; hypocritical disguise and parade to delude vulgar minds; buffoonery.

MUMMIFICATION, mum-me-fe-ka'shun, *s.* The act of making into a mummy.

MUMMIFORM, mum'me-fawrm, *a.* (*mumia*, a mummy, and *forma*, form, Lat.) Resembling a mummy, as in the case of certain nymphs of the Lepidoptera.

MUMMIFY, mum'me-fi, *v. a.* To make into a mummy.

MUMMY, mum'me, *s.* (*mumia*, Ital.) A dead human body preserved by the Egyptian art of embalming; the name of two substances prepared for medicinal use—the one said to be the dried flesh of human bodies embalmed with myrrh and spice; the other, a liquor running from such mummies when newly prepared, or when affected by great heat and damps. In Horticulture, a kind of wax composed of turpentine and common wax, used in the engrafting of trees.

MUMP, mump, *v. a.* (*mompen*, Dut.) To nibble; to bite quick; to chew with a continued motion; to talk low and quick; in cant phrase, to beg; to deceive; to cheat.

MUMPER, mump'ur, *s.* A beggar.

MUMPING, mump'ing, *s.* Foolish tricks; acts of mockery; begging tricks.

MUMPISH, mump'ish, *a.* Heavy; sullen; sour; dull.

MUMPS, mumps, *s.* In Pathology, inflammation of the parotid glands; silliness; silent displeasure.—Seldom used in the last two senses.

MUNCH, munsh, *v. n.* To chew eagerly by great mouthfuls;—*v. a.* to chew by great mouthfuls.—See Mounce.

MUNCHER, munsh'ur, *s.* One who munches.

MUND, mund. A Saxon word signifying peace, protection, patronage, and much used in old law terms, as in *mundbrech*. It is also retained in names, as in Edmund, or *cadmund*, Sax. meaning happy peace.

MUNDANE, mun'dane, *a.* (*mundanus*, Lat.) Belonging to the world.

MUNDANITY—MUNITE.

- MUNDANITY**, mun-dan'e-te, *s.* Attention to the things of the world.—Obsolete.
- MUNDATION**, mun-da'shun, *s.* (from *mundus*, clean, Lat.) The act of cleansing.—Obsolete.
- MUNDATORY**, mun'day-tur-e, *a.* Cleansing; having power to cleanse.—Seldom used.
- MUNDBRECH**, mund'bretsh, *s.* In Law, a breach of the king's peace, or an infringement of privilege; also, a breaking of fences or enclosures, which are in many places in England called *mounds*—hence the word.
- MUNDIA**, mun'de-a, *s.* (*mundus*, neat, Lat.) A genus of plants: Order, Polygalaceæ.
- MUNDIC**, mun'dik, *s.* A name given in Cornwall to iron pyrites.
- MUNDIFICANT**, mun-dif'e-kant, *a.* Cleansing;—*s.* a plaster or ointment used in healing and cleansing sores.—Not used.
- MUNDIFICATION**, mun-de-fe-ka'shun, *s.* (*mundus*, and *facio*, I make, Lat.) The act or operation of cleansing any body.
- MUNDIFICATIVE**, mun-dif'e-kay-tiv, *a.* Cleansing; having the power to cleanse;—*s.* a cleansing medicine.
- MUNDIFY**, mun'de-fi, *v. a.* To make clean; to cleanse.
- MUNDIVAGANT**, mun-div'a-gant, *a.* (*mundus*, the world, and *vago*, I wander, Lat.) Wandering through the world.
- MUNDUNGUS**, mun-dung'gus, *s.* Tobacco with an offensive smell.
- MUNDUS PATENS**, mun'dus pa'tens, *s.* A festival among the Romans, observed on the 24th August, 4th October, and 27th November. Hell was supposed to be open on those days; and, accordingly, men would not then enlist, engage in battle, put to sea, or marry.
- MUNERARY**, mu'ne-ra-re, *a.* (from *munus*, a gift, Lat.) Having the nature of a gift.—Obsolete.
- MUNERATE**.—See Remunerate.
- MUNERATION**.—See Remuneration.
- MUNGO**, mung'go, *s.* The root of Ophiorrhiza mangos, supposed to be a specific for the bite of the rattlesnake and of the Cobra di casa. In India and Ceylon, it is used as an antidote against the bite of a mad dog.
- MUNGREL**.—See Mongrel.

- To her came message of the murderment.—*Fairfax.*
- MURDEROUS**, mur'dur-us, *a.* Bloody; guilty of murder; sanguinary; premeditating murder; addicted to blood; cruel.

MURDEROUSLY—MURIATIC.

MURDEROUSLY, mur'dur-us-le, *ad.* In a murderous or cruel manner.

MURDRESSES, mur'dres-ses, *s.* In Fortification, a battlement in ancient fortified buildings, with interstices for firing through.

MURE, mure, *s.* (*murus*, Lat.) A wall:—(obsolete):—*v. a.* to enclose in walls; to wall.

MURENGERS, mu'rin-jurs, *s.* A name given to two officers in the city of Chester, chosen annually from the aldermen, to attend to the repair of the walls, and to receive a certain toll for that purpose.

MURENOIDS, mu're-noyds, } *s.* (*murana*, one of
MURENIDÆ, mu-ren'e-de, } the genera.) A family of Apodal fishes, including the true eels, Anguilla.

MUREX, mu'reks, *s.* (Latin.) A genus of carnivorous Gasteropods, the shells of which have the varices from three to five in each whorl; the inner lip smooth; the spire much shorter than the aperture; an internal groove at the upper angle of the aperture; canal long; shell armed with acute cylindrical spines, mostly arranged in three varices: Type of the family Muricidæ.

MUREXAN, mu-rek-san, *s.* (*murex*, a shell, Lat.) The purpuric acid produced by the decomposition of murexide. Formula, $C_6 N_2 H_4 O_5$: equiv. = 109.02.

MUREXIDE, mu-rek'side, *s.* The purpurate of ammonia, which crystallizes in short four-sided prisms, two faces of which, like the upper wings of the cantharides, reflect a green metallic lustre. The crystals are transparent, and by transmitted light are of a garnet-red colour. Formula, $C_{12} N_5 H_6 O_8$: equiv. = 197.19.

MURICITE, mu're-a-site, *s.* An anhydrous sulphate of lime, containing a little common salt.

MURIATED, mu're-ay-ted, *a.* Combined with muriatic acid; put in brine.

MURIATES, mu're-ayts, *s.* A genus of salts, formed by the union of muriatic acid and salifiable bases. Metallic muriates contain either an excess or deficiency of acid: in the former case, the salt is called an oxymuriate; in the latter, a submuriate. The muriates, when in a state of dryness, are chlorides, consisting of chlorine and the metal. *Muriate of ammonia*, generally called sal ammoniac, and formerly imported from Egypt, where it is procured by sublimation from the soot of the camel's dung. *Muriate of lime*, formerly known by the names of marine selenite, calcareous marine salt, muria, calx salita, fixed sal ammoniac, &c. When deliquescent, it has been called oil of lime; and Homberg found that, on being reduced by heat to a vitreous mass, it emitted a phosphoric light on being struck by a hard body, and in that state it was called Homberg's phosphorus. *Muriate of iron*, formerly known as ferrum salitum, oleum martis per deliquium, &c. *Muriate of potash*, formerly known by the names of febrifuge salt of Sylvius, digestive salt, regenerated sea salt, &c. *Muriate of soda*, or common salt, found in large masses, or in rocks under the earth. In the solid form it is called sal gem, or rock salt; and that which is obtained by evaporation from salt water, is called bay salt.

MURIATIC, mu-re-at'ik, *a.* Having the nature of brine or salt water; relating to sea salt. *Heavy muriatic ether*, a liquid obtained from the distillation of the oil of vitriol, chloride of sodium,

MURIATIFEROUS—MURMURING.

hyperoxide of manganese, and alcohol. It varies much in composition.

MURIATIFEROUS, mu-re-a-tifer-us, *a.* Producing muriatic substances or salt.

MURICAJA, mu-re-ka'ja, *s.* (the Brazilian name of many species of Passion-flower, especially those with edible fruit.) A genus of plants; Order, Passifloraceæ.

MURICALSITE, mu-re-kal'site, *s.* The calcareo-carbonate of magnesia, or dolomite.

MURICANTHUS, mu-re-kan'thus, *s.* (*murex*, and *akanthos*, a spine, Gr.) A genus of shells, belonging to the Muricinae, or Murexes, the shell of which has numerous foliated varices; the spire short, and the margin of the outer lip with a prominent tooth near the base—the *Centronotus* of former conchologists.

MURICARIA, mu-re-ka're-a, *s.* (*muricatus*, full of prickles, Lat. on account of the prickly nature of the pods.) A genus of plants: Order, Cruciferae.

MURICATED, mu're-kay-ted, *a.* (*muricatus*, Lat.) Formed with sharp points; full of sharp points or prickles. In Botany, having the surface covered with sharp points, or armed with prickles.

MURICEA, mu-rish'e-a, *s.* (*murex*, Lat.) A genus of Polyptaria, in which the bark is provided with projecting mammillæ, and covered with imbricated and rough scales: Family, Corticati.

MURICIA, mu-rish'e-a, *s.* (*muricatus*, muricated, Lat. in reference to the warted berries.) A genus of plants: Order, Cucurbitaceæ.

MURICIDÆ, mu-ris'e-de, *s.* (*murex*, one of the genera.) The Murexes and Whelks, a family of carnivorous Gasteropods of the tribe Zoophaga, the shells of which have the pillar never plated; spiral; the base narrowed, and either truncate or slightly produced.

MURICIDEA, mu-re-sid'e-a, *s.* (*murex*, and *eidos*, resemblance, Gr.) A genus of the Muricinae, in which the spire of the shell is as long or longer than the body whorl; the varices numerous, and no internal channel at the top of the aperture: Family, Muricidæ.

MURICINÆ, mu-ris'e-ne, *s.* Murexes, a subfamily of the Muricidæ, in which the spire is as long as the aperture; exterior rough; the whorls marked with varices; the aperture wide.

MURIDÆ, mu're-de, *s.* (*mus*, one of the genera.) A family of Rodents, of which the genus *Mus* is the type.

MURINE, mu'rine, *a.* (*murinus*, Lat.) Relating to a mouse, or to mice.

MURINES, mu're-nes, or mu'reens, *s.* A tribe of Rodents, of which the genus *Mus* is the type. It contains the families Muridæ, Arvicolidæ, and Sciuridæ.

MURK, murk, *s.* (*morker*, Swed.) Darkness.

MURKY, mur'ke, *a.* (*mork*, Swed.) Dark; obscure; gloomy.

MURMUR, mur'mur, *s.* (Latin.) A low shrill noise; a complaint half-suppressed, or uttered in a low muttering voice;—*v. n.* (*murmuro*, Lat.) to give a low shrill sound; to grumble; to complain; to utter complaints in a low, half-articulated voice; to utter sullen discontent.

MURMURER, mur'mur-ur, *s.* One who murmurs; one who repines and complains sullenly; a grumbler.

MURMURING, mur'mur-ing, *s.* A low sound; a continued murmur; a confused noise; complaint half-suppressed.

MURMURINGLY—MUSCHEL-KALK.

MUSCICAPA—MUSE.

MURMURINGLY, mur'mur-ing-le, *ad.* With a low sound; with complaints.

MURMUROUS, mur'mur-us, *a.* Exciting murmur or complaint.

MURNIVAL, mur'ne-val, *s.* (*mornifle*, Fr.) Four cards of a sort.—Obsolete.

MURR, mur, *s.* A catarrh.—Obsolete.

MURRAIN, mur'rin, *s.* (*morrina*, Span.) An infectious and fatal disease among cattle;—*a.* infected with the murrain.—Obsolete as an adjective.

MURRAYA, mur-ra'ya, *s.* (in honour of John Andrew Murray, a Swedish botanist.) A genus of plants: Order, Anrntaceae.

MURREY, mur're, *a.* Of a dark-red colour.

MURRHINE, mur'rine, *a.* (*murrhina*, a vase, Lat.) An epithet given by the ancients to certain species of vases, said to come from the East, and to have been manufactured from some precious stone found in Parthia; but probably they were nothing else than porcelain, the nature of the manufacture of which was then unknown in the western world.

MURRIOR, mur're-un, *s.* (*morriam*, Port.) A helmet; a casque; armour for the head.

MURRY, mur're, *s.* In Heraldry, termed likewise *sanguine*, a dark-red colour, expressed in engraving by opposite diagonal lines crossing each other. It is reckoned a dishonourable colour.

MURTH OF CORN, murth'ov kawrn, *s.* Plenty of grain.

MURTIA, mur'she-a, *s.* A surname of Venus, because she presided over the Myrtle, and as such was held as the goddess of Idleness and Cowardice.

MURZA, mur'za, *s.* A title of hereditary nobility in Tartary.

MUS, mus, *s.* (Latin, a mouse.) A genus of Rodents, including mice and rats.

MUSA, mu'sa, *s.* (in honour of Antonius Musa, the brother of Euphorbus, and the freedman of Augustus, or rather Maus, the Arabic name of the plant.) Plantain-tree, a genus of plants: Order, Musaceae.

MUSACEAE, mu-za'se-e, } *s.* (*musa*, one of the } genera.) A natural order of stemless, or nearly stemless plants, with leaves sheathing at the base, and forming a kind of spurious stem, often very large; their limbs separated from the taper petiole by a round tumour, and having fine parallel veins diverging regularly from the mid-rib towards the margin; flowers spathaceous; perianth six-parted, adherent, petaloid, in two distinct rows, more or less irregular; stamens six; anthers linear and two-celled; ovary inferior, three-celled, and many-seeded; fruit a three-celled capsule.

MUSARD, mu'zard, *s.* (French.) A dreamer; one who is apt to be absent in mind.

MUSCA, mus'ka, *s.* (Latin, a fly.) A genus of Dipterous insects, of which *Musca domestica*, or common house-fly, is the type.

MUSCADEL, mus'ka-del, } *a.* (*moscatello*, Ital. }
MUSCADINE, mus'ka-dine, } *moscatel*, Port. and }
MUSCAT, mus'kat, } Span. *muscat*, Fr.) }
MUSCATEL, mus'ka-tel, } An appellation given to a kind of rich wine, and to the sweet grape from which it is made; also, a sweet pear.

MUSCARIA, mus-ka're-a, *s.* (*moschos*, musk, Gr.) Grape hyacinth, a genus of plants: Order, Liliaceae.

MUSCHEL-KALK, mush'el-kalk, *s.* (German, shell-limestone.) In Geology, a limestone deposit, belonging to the new red sandstone system.

MUSCICAPA, mus-sik'a-pa, *s.* (*musca*, a fly, and *capio*, I take, Lat.) The Fly-catchers, a genus of birds: Type of the family Muscipidae.

MUSCIPIDAE, mus-se-kap'e-de, *s.* (*muscipapa*, one of the genera.) Fly-catchers, a family of perching birds, embracing the Black-caps, Water-chats, Fly-catchers, Broad-bills, &c.

MUSCIPINAE, mus-so-kap'e-ne, *s.* A subfamily of the Muscipidae, or Fly-catchers.

MUSCIDAE, mus'se-de, *s.* A family of Dipterous insects, of which the common house-fly, *Musca*, is the type.

MUSCIFORMES, mus-se-fawr'mes, *s.* (*musca*, a fly, and *forma*, a form, Lat.) The Crane-flies, the name of a tribe of the Tipulidae, comprehending such as have a stout body and short legs, resembling the common fly.

MUSCIPETA, mus-sip'e-ta, *s.* (*musco*, a fly, and *peto*, I attack, Lat.) A genus of birds, belonging to the Muscipinae, or Fly-catchers: Family, Muscipinae.

MUSCLE, mus'sl, *s.* (*musculus*, from *mus*, a mouse, Lat. from its resemblance to a dead mouse.) In Anatomy, a reddish, vascular, and highly-contractile organ, whereby the movements of the animal body are chiefly executed. *Muscle-band*, a shale of the Coal formation, generally ferruginous or calcareous, containing embedded unios, or other shells of the same family. In Conchology,—see *Mytilus*.

MUSCOLD, mus'koyd, *a.* (*moschos*, moss, and *eidōs*, likeness, Gr.) Mosslike; resembling moss.

MUSCOLOGY, mus-kol'o-je, *s.* (*muscus*, a moss, Lat.) That part of Botany which treats of mosses.

MUSCOSITY, mus-kos'e-te, *s.* Mossiness.

MUSCOVADO, mus-ko-va'do, *s.* In Commerce, unrefined sugar; the raw material from which loaf and lump sugar are procured by refining.

MUSCOVY-GLASS.—See *Mica*.

MUSCULAR, mus'ku-lar, *a.* Relating to a muscle; performed by a muscle; strong; brawny; vigorous. *Musculi pectinati*, (*pecten*, a comb, Lat.) in Anatomy, the muscular fasciculi within the auricles of the heart, from their being arranged like the teeth of a comb.

MUSCULARITY, mus-ku-lar'e-te, *s.* The state of being muscular.

MUSCULITE, mus'ku-lite, *s.* A petrified muscle or shell.

MUSCULO-CATANEUS, mus'ku-lo-ka-ta'ne-us, *a.* In Anatomy, applied to two nerves: first, the *nervus musculo-cataneus externus*, which, perforating the corneo-branchialis, is distributed in the other muscles of the arm, and integuments of the fore-arm and hand; and, second, to that which, supplied by the peroneal, gives branches to the muscles of the anterior and exterior regions of the leg.

MUSCULOUS, mus'ku-lus, *a.* (*musculosus*, Lat.) Full of muscles; brawny; pertaining to a muscle.

MUSCULUS, mus'kul-us, *s.* In Antiquity, a military machine, made use of by the Romans to protect soldiers whilst they approached and undermined the walls of besieged places, or filled the ditches.

MUSES, mu'zes, *s.* (*mousai*, Gr. *musæ*, Lat.) In the Greek or Roman Mythology, nymphs or inferior divinities, supposed to preside over the arts of poetry and music. The following is a list of them, with the allegorical meaning of their names:—Clio, from *cleio*, 'to celebrate glorious deeds,' is represented with a scroll in her hand, and also sometimes with a 'scrinium,' to keep MSS. in, by her side. She has been styled the Muse of history. Calliope, 'fine voice,' is represented with tablets and a style; sometimes with a trumpet in her hand; in some instances, as at Herculaneum, with a scroll like Clio. She was the epic Muse. Melpomene, 'the singer,' wears a royal diadem round her head, and a wreath of vine leaves, with cothurni on her feet; a mask in one hand, and a club in the other. She was the Muse of tragedy. Thalia, 'the joyous,' the Muse of comedy, is also crowned with vine leaves, has a crook in one hand, and a grotesque mask in the other. Euterpe, 'the pleasing,' carries a double flute. She presided over music. Terpsichore, 'dance-loving,' carried a lyre, and presided over lyric poetry and dance. Erato, 'the lovely,' carries also a lyre. She was the Muse of elegy and amatory song. Polyhymnia, 'of many songs,' is represented wrapped up in her cloak, and buried in meditation, with the forefinger of her right hand across her mouth, in token of reserve and caution. She was the Muse of religious song, allegories, and mythical strains. Urania, 'the heavenly,' has the globe and compasses in her hands, which are the emblems of her calling, astronomy. The favourite haunts of the Muses were, Mount Parnassus in Phocis, Helicon in Boeotia, Pierius, Pindus, and Olympus, in Thesaly, &c. The swan, the nightingale, and the grasshopper were sacred to them. The Roman poets called the Muses *Camena*, an Etruscan name—for it appears that the Etruscans had also their Muses (*Micali*)—and also *Pierides*.

- MYRIAMETER**, mir-e-a-me'ter, *s.* (*myrias*, and *metron*, a measure, Gr.) A French measure, equal to ten thousand meters. It is the equivalent of two leagues of the old measure.
- MYRIANITIS**, mir-e-a-ni'tes, *s.* (*myrias*, a myriad, Gr.) A genus of fossil Annelides, from the lower Silurian strata of Lampeter, in South Wales.
- MYRIANTHEIA**, mir-e-an-the'e-a, *s.* (*myrias*, a myriad, and *anthos*, a flower, Gr. from the flowers being numerous.) A genus of plants: Order, Homaliaceae.
- MYRIARCH**, mir'e-ark, *s.* (*myrias*, and *archos*, a ruler, Gr.) A captain or commander of ten thousand men.
- MYRIARE**, mir'e-are, *s.* (French, from *myrias*, ten thousand, Gr.) A French superficial measure of 10,000 acres.
- MYRIASPORA**, mir-e-as'po-ra, *s.* (*myrias*, a myriad, and *spora*, a seed, Gr. in reference to the innumerable seeds contained in the fruit.) A genus of plants: Order, Melastomaceae.
- MYRICA**, mir'e-ka, *s.* (*myrike*, the Greek synonyme of the Tamarisk.) Candleberry Myrtle, a genus of plants: Type of the order Myricaceae.
- MYRICACEAE**, mir-e-ka'se-e, *s.* (*myrica*, one of the genera.) An order of Exogenous plants, belonging to the Amental Alliance of Lindley. It consists of small trees or leafy shrubs, covered with resinous glands and dots, with simple alternate leaves; flowers amentous and naked; stamens two to eight, and generally on the axil of a scale-like bract; anthers two or four-celled; ovary one-celled; stigmas two; fruit drupaceous. The plants of this order are called Galeworts by Lindley.
- MYRICARIA**, mir-e-ka're-a, *s.* (*myrike*, from *myro*, I run, Gr. from growing on the banks of running streams.) A genus of plants: Order, Tamaricaceae.
- MYRICINE**, mir'e-sine, *s.* That portion of wax left undissolved when boiled in alcohol. It is so called from its being afforded by the wax of the plant *Myrica cerifera*.
- MYRINA**, mir-i'na, *s.* A genus of Lepidopterous insects: Family, Diurna.

MYRIOCOCCUM—MYRMILLONS.

- MYRIOCOCCUM**, mir-e-o-kok'kum, *s.* (*myrias*, countless, and *kokkos*, a little capsule, Gr.) A genus of Fungi: Tribe or order, Gasteromycetes.
- MYRIOLITER**, mir-e-o-li'ter, *s.* A French measure of capacity, equal to ten thousand litres, or 610,280 cubic inches.
- MYRIOPHYLLITES**, mir-e-o-fil-li'tes, *s.* (*myrias*, and *phyllon*, a leaf, Gr.) A genus of fossil plants from the Coal formation.
- MYRIOPHYLLUM**, mir-e-o-fil'lum, *s.* (*myrias*, innumerable, and *phyllon*, a leaf, Gr. in reference to the numerous divisions of the leaves.) Water-milfoil, a genus of plants: Order, Haloragaceae.
- MYRIOPODA**, mir-e-op'o-da, *s.* (*myrias*, a myriad, and *podas*, mir'e-o-pods,) and *pous*, a foot, Gr.) A class of the Articulata, including such as have an indeterminate number of jointed feet, equalling that of the articulations of the body.
- MYRIORAMA**, mir-e-o-ra'ma, *s.* (*myrias*, and *horao*, I view, Gr.) Views of objects in numbers indefinite.
- MYRIOSPERMINE**, mir-e-o-sper'mine, *s.* A name given by Richter to a soluble oil contained in the oil of balsam of Peru.
- MYRIPRISTES**, mir-e-pris'tes, *s.* (*myria*, and *pristes*, a saw, Gr.) A genus of fishes: Family, Percidae.
- MYRISTICA**, mi-ris'te-ka, *s.* (*myristikos*, fit for anointing, Gr.) A genus of Mollusca, belonging to the Pyralinae, the shell of which is subpyriform; the spire strong and spiny, or tuberculated, nearly as long as the base; the inner lip vitreous and thin; the outer with an ascending canal; the base channel wide: Family, Turbellinellidae. In Botany, (*myrra*, myrrh, Gr. on account of the odour of the fruit.) Nutmeg, a genus of plants: Type of the order Myristicaceae.
- MYRISTICACEAE**, mir-is-te-ka'se-e, *s.* An order of Exogenous plants, consisting of tropical trees, often yielding a red juice; leaves alternate, without stipules and coriaceous; flowers in racemes, glomerules, or panicles, and unisexual; calyx coriaceous, mostly downy outside; trifold, rarely quadrifid.
- MYRMECODA**, mir-mek'o-da, *s.* (*myrmex*, an ant, and *eidōs*, resemblance, Gr.) A genus of Aculeate Hymenopterous insects: Family, Heterogyna.
- MYRMECODIA**, mir-me-ko'de-a, *s.* (*myrmex*, *myrmikos*, an ant or emmet, Gr.) A genus of plants: Order, Cinchonaceae.
- MYRMELEON**, mir-me'le-on, *s.* A genus of Neuropterous insects: Type of the family Myrmeleonidae.
- MYRMELEONIDAE**, mir-me-le-o'ne-de, *s.* (*myrmex*, and *leon*, a lion, Gr.) Ant-lions, a family of Neuropterous insects, belonging to the Subulicorneae of Cuvier. The tarsi are five-jointed; the head not prolonged in the form of a rostrum or snout; and the antennae gradually enlarged, or having a globular termination.
- MYRMICA**, mir'me-ka, *s.* (*myrmex*, *myrmikos*, the ant, Gr.) A genus of Aculeate Hymenopterous insects: Family, Heterogyna.
- MYRMIDON**, mir'me-dun, *s.* In Antiquity, the Myrmidons are said to have been a people inhabiting the borders of Thessaly, who accompanied Achilles to the war against Troy; hence the name came to signify a desperate soldier or ruffian.

- arms were a sword, head-piece, and shield. On the top of the head-piece they wore a ship embossed, called *mormoros*, whence the name has been supposed to be derived.
- MYROBALAN**, mir-ob'a-lan, *s.* (*myros*, an ointment, and *balanos*, a nut, Gr. because formerly used in the preparation of unguents.) The name given to certain fruits from India; also, the *Prunus cerasifera*, or Myrobalan plumb, a native of North America. Myrobalans are used by the Hindoos in calico-printing and medicine.
- MYRODIA**, mir-o'de-a, *s.* (*myron*, myrrh, and *eidōs*, resemblance, Gr.) A genus of plants. Order, Bombacæ.
- MYROPOLIST**, mi-rop'o-list, *s.* (*myron*, ointment, and *poleo*, I sell, Gr.) One that sells unguents.—Seldom used.
- MYROSPERMUM**, mir-o-sper'mum, *s.* (*myron*, myrrh, and *sperma*, seed, Gr. the seeds and cells yielding a balsam that has a strong smell.) A genus of Leguminous plants: Suborder, Papilionacæ.
- MYROXILINE**, mir-oks'e-line, *s.* A name given by Richter to the insoluble oil contained in the oil of Balsam of Peru.
- MYROXYLON**, mir-oks'e-lon, *s.* (*myron*, myrrh, and *xylos*, wood, Gr. in reference to the sweetness of the wood.) A Linnean genus of plants, forming a section of *Myrosperrum*.
- MYRRH**, mir, *s.* (*myrrha*, Lat.) A gum resin, celebrated from the earliest ages for its aromatic and fragrant properties, is the product of a small tree (*Balsamodendron myrrha*) found in Nubia and Arabia Felix. Several kinds are distinguished. The best, *myrrh in tears*, is when good of a yellow or reddish-yellow colour, light, brittle, pellucid, and sometimes shining; fracture vitreous or conchoidal, of a bitter aromatic taste and peculiar smell: sp. gr. 1.36. It is mostly imported from the Levant. The East Indian is in large opaque pieces, generally covered with a brownish-white powder. *Myrrh in sorts*, is the name given to a variety of inferior and adulterated kinds. This gum-resin is at present used as a stimulating medicine, and as an ingredient in tooth-powders. *Myrrh-seed*, or *White-balsam*, the plant *Myrosperrum*.
- MYRRHIS**, mir'ris, *s.* (*myron*, perfume, Gr. or *myrrha*, myrrh, Lat. from the smell of the plants.) Cicely, or Great Chervil, a genus of Umbelliferous plants: Suborder, Campylopermeæ.
- MYRSINACEÆ**, mir-sin-a'se-e, *s.* (*myrsine*, one of the genera.) An order of plants, chiefly natives of Asia and America, within the 39th degree of latitude. It consists of trees, shrubs, or subshrubs; calyx permanent, four or five-lobed; stamens four or five; ovary one-celled; style one.
- MYRSINE**, mir-si'ne, *s.* (Greek name of myrrh.) A genus of plants: Type of the order Myrsinacæ.
- MYRSIPHYLLUM**, mir-se-fil'lum, *s.* (*myrsine*, a myrtle, and *phyllon*, a leaf, Gr.) A genus of plants: Order, Smilacæ.
- MYRTACEÆ**, mir-ta'se-e, *s.* (*myrtus*, one of the genera.) A natural order of Exogenous plants, consisting of trees or shrubs, with opposite or alternate leaves, usually with transparent dots, and a vein running parallel with their margin; calyx four or five-cleft; petals four or five; stamens twice their number, or indefinite; filaments distinct; ovary inferior; stigma simple. The Myrtle-blossoms of Lindley.
- MYRTEA**, mir'te-a, *s.* A name given by Dr. Turton to a genus of bivalve Mollusca, founded on the *Venus spinifera* of other conchologists.
- MYRTIFORM**, mir'te-fawrm, *a.* Resembling the leafy myrtle. In Anatomy, a term applied to the carunculae myrtiformes, which remain after the laceration of the hymen, so called from their supposed resemblance to the myrtle.
- MYRTLE**, mir'tl, *s.* The common name of the plants of the genus *Myrtus*.
- MYRTLE-BLOOMS**.—See Myrtacæ.
- MYRTUS**, mir'tus, *s.* (*myrtos*, myrtle, from *myron*, perfume, Gr.) Myrtle, a genus of plants: Type of the order Myrtacæ.
- MYSCA**, mis'ka, (*mys*, a muscle, Gr.) A genus of Mollusca, the shell of which is elongated and oblong-ovate; cardinal teeth compressed and crenated; the outer sharp, and almost parallel with the anterior margin.
- MYSELF**, me-self', *pron.* A compound of *my* and *self*; the emphatic and reciprocal form of *I*. In the objective case, the reciprocal of *I*, as 'I will defend myself.'
- MYSIS**, mis'is, *s.* (Greek, a closing of the lips.) The opossum shrimps, a genus of Crustaceans: Family, Stomatopoda.
- MYSTACINÆE**, mis-ta-sin'e-e, *s.* (*mystax*, mustache, Gr.) A family of the Infusoria belonging to the tribe Trichodo. It includes those infusorial animalculæ, which have superficial cilia, or fine-haired processes, disposed in groups.
- MYSTAGOGICAL**, mis-ta-goj'e-kal, *a.* Relating to the interpretation of mysteries.
- MYSTAGOGUE**, mis'ta-gog, *s.* (*mysterion*, a mystery, and *agogos*, a guide, Gr.) One who interprets mysteries; one who keeps church relics, and shows them to strangers.

- NAPERY**, na'pur-e, *s.* (*nappe*, Fr.) Linen for the table; table-cloths in general.
- NAPHTHA**, naf'tha, *s.* A limpid bitumen which exudes from the earth in certain parts of Asia, as also in small quantities near the village Amiano, in the state of Parma. Native naphtha is composed of three liquids, namely,—naphtha, C₁₄ H₁₈, naphthene, C₁₆ H₁₆, and naphthole, C₂₄ H₂₂.
- NAPHTHALAMIDE**, naf'thal'a-mide, *s.* A product obtained when anhydrous naphthalic acid is sublimed. Formula, C₁₆ H₄ O₅ NH₂.
- NAPHTHALIC**, naf'thal'ik, *a.* Pertaining to naphthaline.
- NAPHTHALIC ACID**, naf'thal'ik as'sid, *s.* A crystalline compound, now termed Phthalic acid. Formula, C₁₆ H₄ O₆ 2HO.
- NAPHTHALIMIDE**, naf'thal'e-mide, *s.* A compound obtained when naphthalamide is heated to 250°, and loses water. Formula, C₁₆ H₄ O₄ HN.
- NAPHTHALINE**, naf'tha-line, *s.* A substance formed during the destructive distillation of pit coal for the production of gas. It is obtained by re-distilling the coal tar. It is a white crystalline substance, and of a peculiar aromatic odour; extremely volatile, fusing at 176°. By the action of nitric acid on the chlorinized compounds of naphthaline, Laverent obtained the following compounds:—Oxichloronaphthalose, C₂₀ H₄ Cl₂ O₂ + HO. Chloronaphthalosic acid, C₂₀ H₄ ClO₃ + O₃. Naphthalosic acid, one-half, C₁₆ H₄ O₄ + O₂. Oxichloronaphthalenone, C₁₈ H₄ Cl₃ O.
- NAPIMOGA**, nap-e-mo'ga, *s.* (its name in Guiana.) A genus of trees, natives of Guiana: Order, Homalium.
- NAPKIN**, nap'kin, *s.* (*nape*, cloth, Fr.) A cloth used for wiping the hands; a handkerchief.
- NAPLESS**, nap'les, *a.* Without nap; threadbare.
- NAPLES YELLOW**, nap'ls yel'lo, *s.* A celebrated pigment, formerly made by a secret process at Naples, and used not only in oil painting, but as an enamel colour. It is said to be a mixture of the oxides of antimony, lead, and zinc.
- NAPOLITE**, na'po-lite, *s.* A blue mineral from Vesuvius.
- NAPPAL**, nap'pal, *s.* Soap rock.
- NAPFINENESS**, nap'pe-nes, *s.* The quality of having a nap; abundance of nap, as on cloth; the quality of being sleepy.
- NAPPY**, nap'pe, *a.* Frothy, as *nappy* beer; full of down.
- NAP TAKING**, nap'tay-king, *a.* Taking naps;—*s.* a taking by surprise; unexpected onset when one is unprepared.
- NARAVELLA**, nar-a-ve'le-a, *s.* (*narawal*, its name in Ceylon.) A genus of plants: Order, Ranunculaceae.
- NARCEA**.—See Narceine.
- NARCEINE**, nar's'e-ine, *s.* (*narke*, torpor, Gr.) A vegeto-alkaline base obtained in opium. Formula, C₂₈ H₂₀ NO₁₂; or, according to Palletier, C₃₂ H₂₄ NO₁₆.

- NEPHELIN, } nef'e-lin, *s.* (*nephele*, Gr.) A mineral found mixed with other substances.
- NEPHELINE, } nef'e-line, *s.* (*nephele*, Gr.) A mineral found mixed with other substances.
- NEPHELE, nef'e-le, *s.* (*nephele*, a cloud, Gr.) A genus of Annelides, belonging to the family Abbranchiatæ astigeræ of Cuvier.
- NEPHELIUM, ne-fil'e-um, *s.* (one of the names of the burdock, by the ancients; the present genus has rough fruit, which has some resemblance to the burdock.) A genus of plants: Order, Sapindaceae.
- NEPHEW, nev'u, *s.* (*neveu*, Fr. *nepos*, Lat.) The son of a brother or sister; a grandson; also, a descendant.—Obsolete in the last two senses.
- NEPHON, ne'fon, *s.* (*niphocis*, snowy, Gr.) A genus of fishes, Family, Percidae.
- NEPHRALGIA, nef-rai'je-a, *s.* (*nephros*, the kidney, and *algos*, pain, Gr.) Pain in the kidney.
- NEPHRELCOSIS, nef-rel-ko'sis, *s.* (*nephros*, the kidney, and *elkosis*, ulceration, Gr.) Ulceration of the liver.
- NEPHRELMINTHIC, nef-rel-min'thik, *a.* (*nephros*, a kidney, and *elminthos*, a worm, Gr.) In Pathology, a term applied to diseases, which, as in a species of asciduria, result from the presence of worms in the kidney.
- NEPHREMPHRAXIS, nef-rem-frak'sis, *s.* (*nephros*, the kidney and *emphraxia*, obstruction, Gr.) Obstruction of the vessels of the liver.
- NEPHRITE, nef'rite, *s.* A mineral of which there are two kinds, common and axestone nephrite.
- NEPHRITIC, ne-frit'ik, } *a.* Relating to the kidneys, or organs of urine; affected with the stone or gravel; relieving disorders of the kidneys in general.
- NEPHRITIC, ne-frit'ik, *s.* A medicine adapted to

NEPHRITIS—NEREIDES.

- relieve or cure diseases of the kidneys, particularly the gravel or stone in the bladder.
- NEPHRITIS, nef-ri'tes, *s.* (*nephros*, a kidney.) Inflammation of the kidney.
- NEPHROCELE, nef-ro-se'le, *s.* (*nephros*, the kidney, and *cele*, hernia, Gr.) Hernia of the kidney.
- NEPHROGRAPHY, nef-ro-gra'fe, *s.* (*nephros*, a kidney, and *grapho*, I describe, Gr.) A description of the kidneys.
- NEPHROID, nef'royd, *a.* (*nephros*, a kidney, and *eidos*, resemblance, Gr.) Kidney-shaped.
- NEPHROLITHIASIS, nef-ro-lith-i'a-sis, (*nephros*, and *lithiasis*, stone disease, Gr.) Disease resulting from the presence of a stone, or urinary concretion in the kidney.
- NEPHROLITHOTOMY, nef-ro-lith-ot'o-me, *s.* (*nephros*, a kidney, *lithos*, and *tome*, an incision, Gr.) The operation of extracting a urinary calculus from the kidney.
- NEPHROLOGY, nef-ro'l'o-je, *s.* (*nephros*, a kidney, and *logos*, a discourse, Gr.) A discourse on the kidneys.
- NEPHROPS, nef'rops, *s.* (*nephros*, a kidney, and *ops*, resemblance, Gr.) A genus of Decapod Crustaceans: Family, Macroura.
- NEPHROTOMA, nef-rot'o-ma, *s.* (*nephros*, a kidney, and *tome*, a section, Gr.) A genus of Dipterous insects: Family, Nemocera.
- NEPHROTOMY, nef-rot'o-me, *s.* (*nephros*, a kidney, and *tome*, I cut, Gr.) The operation of extracting a stone from the kidneys.
- NEPHTHYS, nef'this, *s.* A genus of Annelides: Order, Dorsibranchiata.
- NEPOTISM, nep'o-tizm, *s.* (*nepotisme*, Fr.) Fondness for nephews; undue attachment to relatives; favouritism shown to nephews and other relations.
- NEPTEA, nep-te'a, *s.* (*Neptunus*, Neptune, Lat.) A genus of Alcyoniform Zoophytes, established by Blainville.
- NEPTUNE, nep'tune, *s.* (*Neptunus*, Lat.) In Mythology, the god of the Sea; the son of Saturn and Ops, and brother to Jupiter. As god of the Sea, he was considered entitled to more power than any other god, except Jupiter. His worship was established in almost every place of the earth. He was generally represented sitting in a chariot made of a shell, and drawn by dolphins or sea-horses, or as drawn by winged horses and holding a trident in his hand.
- NEPTUNIAN, nep-tu'ne-an, *a.* Pertaining to the ocean, or Neptune. *Neptunian theory*, in Geology, the theory of Werner, which refers the formation of all rocks and strata to an aqueous origin.
- NEPTUNIAN, nep-tu'ne-an, } *s.* One who adopts the theory, that the whole earth was at one time covered with water, and that the various substances of which it is composed, were formed from aqueous solution.
- NEPTUNIST, nep-tu-nist, } *s.* the theory, that the whole earth was at one time covered with water, and that the various substances of which it is composed, were formed from aqueous solution.
- NEREIDES, ne're-ides, *s.* (Greek.) In Mythology, nymphs of the sea, daughters of Nereus and Doris. They were fifty, according to the greater number of mythologists, and were implored as the rest of the deities. They had altars chiefly on the coasts of the sea, where milk, oil, honey, and often the flesh of goats, were offered up. Their duty was to attend upon the more powerful deities of the sea, and to be subservient to the will of Neptune. They are represented as young and handsome virgins, sitting on dolphins, and holding Neptune's trident in their hand, or some-

times garlands of flowers. They were particularly fond of halcyons, and as they had the power of ruffling or calming the waters, they were always addressed by sailors, who would implore their protection that they might grant them a favourable voyage and a prosperous return.

NEREUS, ne're-us, *s.* (Greek.) In Mythology, a deity of the sea, son of Oceanus and Terra. He married Doris, by whom he had fifty daughters, called the Nereides. Nereus was generally represented as an old man, with a long flowing beard, and hair of an azure colour. The chief place of his residence was in the Aegean sea, where he was surrounded by his daughters, who often danced in chorusses round him. He had the gift of prophecy, and informed those that consulted him, with the different fates that attended them. The word Nereus is often taken for the sea itself. Nereus is sometimes called the most ancient of all the gods.

NERIES, ne're-is, *s.* (*Nereus*, a Grecian deity.) A genus of Annelides: Order, Dorsibranchiata.

NERITA, ne-rí'ta, *s.* (the name of a shell-fish in Pliny.) A genus of Mollusca, belonging to the Neritimæ, or Nerits, in which the shell is solid, and the inner-lip toothed or granulated: Family, Naticidae.

NERITINA, ner-e-tí'na, *s.* A genus of Mollusca, the shell of which resembles Nerita, but the outer-lip is thin and smooth; the inner one rather convex and crenated, and the surface smooth. It is a fresh water Mollusc.

NERITINÆ, ner'e-te-ne, *s.* The Nerits, a family of the Naticidae, the shells of which are globose; spire very small; pilla oblique; inner-lip very broad, depressed, more or less flattened, and generally toothed; aperture semicircular.

NERITOPSIS, ner-e-top'sis, *s.* (*Nerita* and *opsis*, appearance, Gr.) A genus of the Nerits, in which the aperture of the shell is sub-orbicular; pillar lip thickened above and below; with a wide notch in the middle: Family, Naticidae.

NERIUM, ne're-um, *s.* (*neros*, hurried, Gr. habetate, of species.) A genus of herbaceous plants: Order, Apocynaceæ.

NEROCILA, ner-os'e-la, *s.* A genus of Crustaceans: Order, Isopoda.

NEROLI, ne-ro-li, *s.* A name given by perfumers to the essential oil of orange flowers.

NERTERA, ner-te'ra, *s.* (*nerteros*, inferior, Gr. in allusion to the plant creeping on the ground.) A genus of creeping herbaceous plants: Order, Cinchonaceæ.

NERVE, nerv, *s.* (*nervus*, Lat. *nerv*, Fr.) An organ of sensation and motion in animals; a sinew or tendon; strength; firmness of body; fortitude; firmness of mind; courage. Nerves, in Physiology, are white cords arising from the brain or spinal marrow, and distributed to every part of the system. 1. The *cerebral nerves*, or those arising from the brain, are thus named according to the enumeration of Willis:—The first pair, or olfactory nerve, expanding upon the membrane of the nose; the second pair, or optic nerve, terminating in the retina of the eye; the third pair, or motores oculorum, distributed to the muscles of the eye; the fourth pair, or trochleares, distributed to the superior oblique muscle of the eye; the fifth pair, trigemini, or trifacial nerve, the grand sensitive nerve of the head and face. This

nerve consists of the large, or ganglionic portion, or trifacial, the sentient and organic nerve of the face; the minor, or a ganglionic portion, or masticatory, the nerve of motion in the temporal, masseter, buccinator, pterygoids, &c.; the sixth pair, or abducentes, distributed to the external rectus muscle of the eye; the seventh pair includes the portio mollis, or auditory; and the portio dura, or facial, the nerve of motion and expression, the respiratory of the face of Sir C. Bell; the eighth pair, or grand respiratory nerve, comprises the glosso-pharyngeal, the par vagum, and the spinal accessory; the ninth pair, or lingual nerve, the muscular nerve of the tongue, the hypoglossal, sub-lingual, or gustatory nerve. 2. The *spinal nerves*, or those arising from the spinal marrow, are distinguished into the cervical nerves—nine pairs; the first of these is enumerated by Willis as the tenth nerve of the head, and called sub-occipital, from its situation; the four last cervical, and the first dorsal nerves, furnish the axillary plexus. The dorsal nerves—twelve pairs; the lumbar nerves—five pairs; the sacral nerves—six pairs. 3. The *respiratory nerves*, which arise from the medulla oblongata, are—the fourth, or pathetici; the portio dura of the seventh, or facial; the glosso-pharyngeal nerve; the par vagum, and the nervus ad par vagum accessorius; the phrenic nerve; the external respiratory; the fifth, and certain spinal nerves, with the par vagum, should be distinguished as exciters of respiration, the rest being motors. 4. The *sympathetic nerve* is a collection of ganglia and branches connected with the sixth nerve, the videan portion of the fifth, the portio dura, the eighth, ninth, and all the spinal nerves. It is, in fact, a collection of branches from almost every nerve in the frame, which join it at the adjacent ganglia;—*v. a.* to give strength or vigour; to arm with force.

NERVED, nerv'd, *a.* In Botany, having vessels simple and unbranched extending from the base to the tip.

NERVELESS, nerv'les, *a.* Destitute of strength; weak.

NERVINE, ner'vine, *s.* A medicine used in nervous affections;—*a.* that has the quality of relieving in disorders of the nerves.

NERVOUS, ner'vus, *a.* (*nervosus*, Lat.) Strong; vigorous; relating to the nerves; seated in or affecting the nerves; having the nerves affected; hypochondriac; possessing or manifesting vigour of mind; characterized by strength in sentiment or style.

NERVOUSLY, ner'vus-le, *ad.* With strength or vigour.

NERVOUSNESS, ner'vus-ness, *s.* Strength; force; vigour; the state of being composed of nerves.

NERVURE, ner-vure', *s.* (French.) In Entomology, a corneous tube for expanding the wing and keeping it tense, and to afford protection to the air-vessels. In Botany, the vein of a leaf.

NERVY, ner've, *a.* Strong; vigorous.—Seldom used.

NESSEA, ne-se'a, *s.* (the name of a sea-nymph.) A genus of herbaceous plants, with blue flowers. Order, Lythraceæ.

NESCIDEA, nes-sid'e-a, *s.* (*nescio*, I am ignorant, Lat. the fruit being unknown, the genus is very doubtful.) A genus of plants, consisting of gl

- brous shrubs, natives of the Mauritius: Order, Cinchonaceæ.
- NESCIENCE**, nesh'e-ens, *s.* (*nesciens*, Lat.) Ignorance; want of knowledge.
- NESH**, nesh, *a.* (*nese*, Sax.) Soft; tender; easily hurt.—Obsolete.
For love his herte is tendre and nesh.—Chaucer.
- NESIA**, nes'e-a, *s.* (*nesis*, piling up, Gr.) A genus of articulated Corallines.
- NESLIA**, nes'le-n, *s.* (meaning not explained.) A genus of Cruciferous plants: Suborder, Sapindaceæ.
- NESS**, nes. A termination added to an adjective to change it into a substantive, denoting state or quality, as in *poisonous*, *poisonousness*, &c.; also, the termination of many names of places where there is a headland or promontory.
- NESSUS**, nes'sus, *s.* In Mythology, a celebrated centaur, son of Ixion and the cloud. He offered violence to Dejanira, whom Hercules had entrusted to his care, with orders to carry her across the river Evenus. Hercules saw the distress of his wife from the opposite shore of the river, and immediately he shot a poisoned arrow, which struck the centaur to the heart. Nessus, as he expired, gave his tunic to Dejanira, assuring her that it had the power of calling a husband away from unlawful loves. Dejanira received it with pleasure, and this mournful present afterwards caused the death of Hercules.
- NEST**, nest, *s.* (Saxon, German, and Dutch.) The bed formed by birds for incubation and feeding their young; any place where animals are produced; an abode; place of residence; a receptacle, generally in an ill sense; a warm, close habitation, usually in contempt; a number of boxes, cases, or the like, inserted in each other;—*v. n.* to build and occupy a nest.

- NETTING**, net'ting, *s.* A piece of network; a complication of ropes fastened across each other.
- NETTLE**, net'tl, *s.* The English name of plants of the genus *Urtica*, whose prickles fret the skin, and occasion very painful sensations;—*v. a.* to sting; to irritate; to provoke. *Nettle-rash*, an eruption of the skin, which has much of the appearance as when stung with nettles.
- NETTLER**, net'tl-ur, *s.* One who provokes, stings, or irritates.
- NETWORK**, net'wurk, *s.* Anything reticulated or decussated at equal distances, with interstices between the intersections; a complication of threads, twine, or cords, united at certain distances.
- NEURADA**, nu-ra'da, *s.* (*neuron*, a nerve, Gr. in reference to the plaisted nerved leaves.) A genus of plants: Order, Rosaceæ.
- NEURALGIA**, nu-ral'je-a, *s.* (*neuron*, a nerve, and *algos*, pain, Gr.) Nerve-ache, the *tic douloureux* of the French writers, a painful affection of the nerves.
- NEURASTHENY**, nu-ras'the-ne, *s.* (*neuron*, a nerve, a priv. and *sthenos*, strength, Gr.) Nervous debility.
- NEURILEMMA**, nu-re-lem'ma, *s.* (*neuron*, a nerve, and *lemma*, bark or covering, Gr.) The membrane which invests the substance of the nerves, and forms for each filament a distinct sheath.
- NEURINE**, nu'rine, *s.* The substance which constitutes the nerve.
- NEURITIS**, nu-ri'tis, *s.* Inflammation of the nerves.
- NEUROCARPUM**, nu-ro-kar'pum, *s.* (*neuron*, a nerve, and *karpus*, fruit, Gr. in reference to the valves of the pod being each furnished with a long longitudinal nerve.) A genus of Leguminous plants: Suborder, Papilionaceæ.
- NEURODYNIA**, nu-ro-din'e-a, *s.* (*neuron*, a nerve, and *odyne*, pain, Gr.) Same as Neuralgia.
- NEUROGRAPHY**, nu-ro-gra-fe, *s.* (*neuron*, a nerve, and *grapho*, I describe, Gr.) A description of the nerves.
- NEUROLIMITES**, nu-ro-le-mi'tes, *s.* Inflammation of the neurilemma.
- NEUROLOGICAL**, nu-ro-loj'e-kal, *a.* Relating to neurology, or to the doctrine of the nervous system.
- NEUROLOGIST**, nu-ro-lo-jist, *s.* One who describes the nerves of animals.
- NEUROLOGY**, nu-ro-lo-je, *s.* (*neuron*, a nerve, and *logos*, a discourse, Gr.) The doctrine of the nerves; a dissertation on the nervous system.
- NEUROLOMA**, nu-ro-lo'ma, *s.* (*neuron*, a nerve, and *loma*, a fringe, Gr.) A genus of Cruciferous plants: Suborder, Orthospermæ.
- NEUROMA**, nu-ro'ma, *s.* (*neuron*, Gr.) A tumor formed in or upon a nervous trunk.
- NEUROPELTIS**, nu-ro-pel'tis, *s.* (*neuron*, a nerve, and *pelle*, a buckler, Gr. in reference to the nerved

NEUROPTERA—NEUTRALIZER.

bractea which props the fruit.) A genus of plants: Order, Convolvulaceæ.

NEUROPTERA, nu-ropt'er-a, } *s.* An order of
NEUROPTERANS, nu-ropt'er-ans, } four-winged
mandibulate insects, including those which have
the nerves of the wings so disposed as to form a
kind of more or less regular network.

NEUROPTERAL, nu-ropt'er-al, *a.* Belonging to the
Neuroptera.

NEUROSIS, nu-ro'sis, *s.* (*neuron*, a nerve, *Gr.*) A
morbid affection of the nervous system.

NEUROSPAST, nu-ro-spast, *s.* (*neurospastor*, *Gr.*)
A puppet; a figure put in motion.

NEUROSPERMA, nu-ro-sper'ma, *s.* (*neuron*, a nerve,
and *sperma*, a seed, *Gr.* in reference to the seeds
which are reticulated with anastomosing nerves.)
A genus of plants, natives of Kentucky: Order,
Cucurbitaceæ.

NEUROTIC, nu-rot'ik, *a.* Pertaining to the nervous
system; useful in disorders of the nerves; seated
in the nerves;—*s.* a disease having its seat in the
nerves; a medicine useful in nervous disorders.

NEUROTOMICAL, nu-ro-tom'e-kal, *a.* Relating to
the anatomy or dissection of nerves.

NEUROTOMIST, nu-rot'o-mist, *s.* One who dissects
the nerves.

NEUROTOMY, nu-rot'o-me, *s.* (*neuron*, a nerve, and
tome, a section, *Gr.*) Dissection of the nerves.

trick or unexpected turn;—(obsolete in the last
four senses;)—(*knicken*, Germ.) to notch or make
an incision in a horse's tail, to make him carry it
higher.

NICKAR-TREE.—See Guilandina.

NICKEL, nik'il, *s.* A white metal—ductile, mal-
leable, attracted by the magnet, and which like
iron may be rendered magnetic: sp. gr. 9.0. It
occurs in all meteoric iron. It occurs also as a
sulphuret, arseniuret, sulpho-arseniuret, silicate,
and arseniate. *Nickel-glance*, or *sulpho arseniu-
ret of nickel*, occurs massive, with a granular
structure and uneven fracture; opaque, and of a
pale lead-grey colour: sp. gr. 6.129.

NICKER, nik'ur, *s.* One who watches an oppor-
tunity to pilfer, or practice some knavish artifice.

give a name of reproach; to call by an opprobri-
ous appellation.

NICOLAITAN, nik-o-la'e-tan, *s.* One of a sect of
heretics mentioned in the Revelations, chap. ii. v. 5.

NICOLSONIA, nik-ol-so'ne-a, *s.* (in honour of M.
Nicol-on, author of *Essai sur l'Histoire de St.
Domingue*.) A genus of Leguminous plants:
Suborder, Papilionaceae.

NICOTIAN, ne-ko'shan, *a.* (from Nicot, who first
introduced it into France, A.D. 1560.) Pertain-
ing to or denoting tobacco;—*s.* tobacco.—Obso-
lete as a substantive.

Your *nicotian* is good too.—Ben Jonson.

NICOTIANA, ni-ko-te-a'na, *s.* (in honour of Jean
Nicot of Nismes, in Languedoc.) A genus of
plants: Order, Solanaceae.

NICOTIANINE, ne-ko'sha-nine, *s.* The principle
which gives the characteristic odour to tobacco.
It is a fatty substance obtained in minute quan-
tity by distilling tobacco leaves with water.

NICOTINE—NIGELLA.

NICOTINE, nik'o-tine, *s.* An alkali which exists in the different species of tobacco. Formula, C₁₀H₈N. Symb. N. Sp. gr. 1.048.

NICTATE, nik'tate, *v. n.* (*nicto*, Lat.) To wink.

NICTATION, nik-ta'shun, *s.* The act of winking.

NICTITATING, nik-te-ta'ting, *a.* Winking, applied to a thin membrane, which protects the eyes of birds, without entirely obstructing their sight—called the *nictitating membrane*.

NITRIC ACID, ni'trik as-sid, *s.* An acid of great importance in Chemistry and the arts. Formula, O₅N: equiv. = 54. *Nitric oxide*, dextoxide or benoxide of nitrogen. Formula, O₂N: equiv. = 30.

NIDE, nide, *s.* (*nidur*, a nest, Lat.) In Falconry, a flock of pheasants.

NIDDI, nid-du-e, *s.* Among the Hebrews, a sort of minor excommunication, which usually continued about a month.

NIDGET, nid'jet, *s.* A coward; a dastard.—Obsolete.

NIDIFICATE, nid'e-fe-kate, *v. n.* (*nidifico*, Lat.) To make a nest.

NIDIFICATION, nid-e-fe'ca-shun, *s.* (*nidus*, a nest, Lat.) The process of constructing a nest.

NIDING, nid'ing, *s.* (*nithing*, Sax.) A coward; a despicable fellow; a dastard.

NIDOROSITY, ni-do-ros'e-te, *s.* Eructation with the taste of undigested roast meat.

NIDOROUS, ni'do-rus, *a.* Resembling the smell or taste of roasted meat.

NIDOUR, ni'dur, *s.* (*nidor*, Lat.) Sweet; savour.

NIDULANT, nid'u-lant, *a.* In Botany, nestling; lying close in pulp or cotton, within a berry or pericarp.

NIDULARIA, nid-u-la're-a, *s.* (*nidus*, a nest, Lat. having the appearance of a bird's nest with eggs.) A genus of Fungi: Order, Gasteromycetes.

NIDULATE, nid'u-late, *v. n.* (*nidulor*, Lat.) To build a nest.—Obsolete.

NIDULATION, nid-u-la'shun, *s.* The time of remaining in the nest, as of a bird.

NIDUS, ni'dus, *s.* (Latin.) A nest; a repository for the eggs of birds, insects, &c.

NIEBURHIA, ne-bu're-a, *s.* (in honour of Carsten Nieburh, a traveller in Arabia.) A genus of plants: Order, Capparidaceae.

NIECE, nees, *s.* (French.) The daughter of a brother or sister.

NIELLO, ne-el'lo, *s.* A method of engraving resembling damask work, practised by the Romans and modern Italians.

NIENT, ni'ent, *a.* *Nient comprise*, in Law, an exception taken to a petition as unjust, because the thing desired is not contained in that act or deed on which the petition is grounded. As if one petitions the court to be put into possession of a house which was formerly among other lands, which have been adjudged to him; and the adverse party pleads that this petition should not be granted, because although he had a judgment for certain lands and houses, yet the house which he petitions to be put into possession of, is not contained among those for which he has judgment.

NIEREMBERGIA, ne-rem-ber'je-a, *s.* (in honour of John E. Nieremberg, a Spanish Jesuit.) A genus of plants: Order, Solanaceae.

NIFLE, ni'fl, *s.* A trifle.—Obsolete.

NIGELLA, ni-jel'la, *s.* (*niger*, black, Lat., from the

NIGGARD—NIGHTLY

colour of the seeds.) Fennel-flower, a genus of plants: Order, Ranunculaceae.

NIGGARD, nig'gurd, *s.* (*knicker*, Germ.) A miser; a parsimonious covetously inclined person;—*v. a.* to stint; to supply sparingly.—Obsolete as a verb.

NIGGARDISH, nig'gurd-ish, *s.* Niggardliness; avarice.—Obsolete.

NIGGARDISH, nig'gurd-ish, *a.* Having a strong disposition to parsimoniousness.

NIGGARDLINESS, nig'gurd-le-ness, *s.* Sordid parsimony; intense avarice; covetousness.

NIGGARDLY, nig'gurd-le, *a.* Avariciousness; sordidly parsimonious; sparing; weary; meanly covetous;—*ad.* sparingly; parsimoniously.

NIGGARDNESS, nig'gurd-ness, *s.*—Same as Niggardliness.

NIGGARDSHIP, nig'gurd-ship, *s.* Avarice.—Obsolete.

NIGGARBY, nig'gurd-e, *s.* Niggardliness.—Obsolete.

NIGGLE, nig'gl, *v. a.* To play with; to trifle with.—Obsolete.

Take heed daughter.
You *niggle* not with your conscience.—*Massinger*.

NIGH, ni, *a.* (*neagh*, *neagh*, Sax. *nahe*, Germ.) Near; not distant or remote in time or place; allied closely by blood; easy to be obtained or learned; ready to support, to forgive, or to aid and defend; close in fellowship; intimate in relation;—*ad.* not at a great distance, either in time or place, or course of events; to a place near; almost;—*v. a.* to come near to; to touch;—*v. n.* to approach; to advance; to draw near.—Obsolete as a verb.

NIGHTLY, ni'le, *ad.* Nearly; within a little.

NIGHNESS, ni'nes, *s.* Nearness; proximity.

NIGHT, nite, *s.* (*nicht*, Sax. *nahts*, Goth. *nacht*, Germ.) That part of the natural day when the sun is beneath the horizon, or the time from sunset to sunrise; the time after the close of life; death; state or time of ignorance or obscurity; adversity; a state of affliction and distress; a state of concealment from the eye or the mind; unintelligibility; to night, in this night.

NOTE.—Night is frequently prefixed to other terms to qualify them, as in the following. The reader is referred to their appropriate places in the Dictionary for their respective etymologies and definitions:—Nightangling, nightbird, nightborn, nightbrawler, nightcap, nightcrow, nightdew, nightdress, night-fouled, nightgown, nightingale, nightingale, night-robber, nightshining, ni hshriek, nightspell, night-tripping, nightvision, nightwaking, nightwalk, night-walking, nightwanderer, nightwandering, night-warbling.

NIGHTDOG, nite'dog, *s.* A dog trained to hunt in the night, used by deer-stealers.

NIGHTFALL, nite'fawl, *s.* The close of the day; evening.

NIGHTFARING, nite'fay-ring, *a.* Travelling in the night.

NIGHTFIRE, nite'fire, *s.* Ignis fatuus; Will-with-a-wisp; Jack-with-a-lantern; fire burning in the night.

NIGHTINGALE, ni'tin-gale, *s.* The English name of the birds of the genus *Philomela*.

NIGHTISH, nite'ish, *a.* Pertaining to night, or attached to the night.

NIGHTLESS, nite'les, *a.* Having no night.

NIGHTLY, nite'le, *a.* Done by night; acting by night; happening by night;—*ad.* by night; every night.

NIGHTMAN—NIKA.

NIGHTMAN, nite'man, *s.* One who removes ordure from streets or cities in the night.

NIGHTRAIL, nite'rale, *s.* (night and *regl*, or *braggle*, a garment, Sax.) A loose cover thrown over the dress at night.—*Obsolete*.

NIGHTRAVEN, nite'ray-vn, *s.* A bird supposed to be of evil omen, that cries loud in the night.

NIGHTPRIMROSE, nite-prim'roze, *s.* The plant (*Oenothera biennis* is so called, because its flowers usually open between six and seven o'clock in the evenings.

NIGHTRULLE, nite'rool, *s.* A tumult or frolic in the night.—*Seldom used*.

How now, mad spirit?
What nightshade now about this haunted grove?—*Shaks.*

NIGHTSHADE.—See *Solanum*.

NIGHTWALKER, nite'wawk-ur, *s.* One that walks in his sleep; a somnambulist; one who roves in the night upon evil designs.

NIGHTWARD, nite'wawrd, *a.* Approaching towards night.

NIGHTWATCH, nite'watch, *s.* A watch or guard in the night; a period of the night distinguished by a change of the watch. Among the Romans the nightwatches were four in number, of three hours each, the first beginning at six in the evening. The Jews originally divided the night into three watches, but afterwards adopted the Roman division of four.

NIGRESCENT, ni-gres'ent, *a.* (*nigresco*, Lat.) Growing black; changing to a black colour; approaching to blackness.

NIGRIFICATION, nig-re-fe-ka'shun, *s.* (*niger*, black, and *facio*, I make, Lat.) The act of making black.—*Obsolete*.

NIGRIN, ni'grin, *s.* An oxide of titanium, containing about 14 per cent. of iron, found in Ceylon and in Transylvania. It resembles Menaccanite in colour, lustre, and appearance of the fractured surfaces.

NIGRITELLA, ni-gri-tel'la, *s.* (*niger*, black, Lat. from the colour of the flowers.) A genus of plants: Order, Orchidaceae.

NIHILS, ni'hils, *s. pl.* In Law, are issues which the sheriff answers, that is opposed concerning debts illerivable, are nothing worth, by reason of the insufficiency of the parties from whom they are due. *Nihil capiat per breve*, or *per billam*, is the judgment given against the plaintiff in an action, either in bar of his action or in abatement of his writ or bill, &c. *Nihil* or *nil debit*, is a common plea to an action of debt upon simple contract. *Nihil* or *nil dicit*, is a failing by the defendant to put in answer to the plaintiff's plea by the day assigned. *Nihil* or *nil habuit in tenementis*, is a plea of an estoppel, and the plaintiff cannot reply generally *quod habuit in tenementis*, &c., that for the replication he ought to show what estate he had; but after verdict it is good.

NIBILISM, ni'he-lizm, *s.* Nothingness; a state of being nothing.

NIBILITY, ni-hil'e-te, *s.* of being nothing.

NIKA, ni'ka, *s.* (*nikas*, I conquer, Gr.) A genus of Decapod Crustaceans: Family, Macroura.

NILAUS—NINETEEN.

NILAUS, ni-la'us, *s.* A genus of birds belonging to the True Shrikes: Family, Laniadae.

NILIO, ni'le-o, *s.* (*nilus*, a channel, Lat.) A genus of Coleopterous insects: Family, Taxicornes.

NILL, nil, *v. a.* (*nillan*, Sax.) Not to will; to refuse; to reject;

Certes, said he, I will thine offer'd grace.—*Spenser*.

—*v. n.* to be unwilling;—*s.* the shining sparks of brass in trying and melting the ore.

NILOMETER, ni-lom'e-tur, *s.* An instrument used by the ancient Egyptians to measure the height of the waters of the Nile, during the periodical inundation.

NIM, nim, *v. a.* (*neman*, *niman*, Sax.) To take; to steal.—*Obsolete*.

They'll question Mars, and by his look
Detect who 'twas that nim'd a cloak.—*Butler*.

NIMA, ni'ma, *s.* (name of the tree in Nepal.) A genus of East Indian trees: Order, Simarubaceae.

NIMBIFEROUS, nim-bif'ur-us, *a.* Producing storms.

NIMBLE, nim'bl, *a.* Quick; active; lively; ready; speedy; expeditious.

NIMBLEFOOTED, nim'bl-foted, *a.* Swift in movement; light of foot.

NIMBLENESS, nim'bl-nes, *s.* Quickness; activity; lightness and agility in motion; celerity; swiftness.

NIMBLESS.—See *Nimbleness*.

NIMBLEWITTED, nim'bl-wit-tid, *a.* Sprightly and ready in conception; ready to speak or answer.

NIMBLY, nim'ble, *ad.* Quickly; speedily; actively.

NIMBUS, nim'bus, *s.* In Meteorology, the rain-cloud. In Painting and Sculpture, a circular disk shed round the heads of divinities, saints, and sovereigns.

NIMETULATHIES, nim-e-tu'la-thitse, *s.* A class of Turkish monks, so called from their founder Nimetulah, famous for the peculiarity of his doctrines and the austerity of his life.

NIMIETY, nim-e'e-te, *s.* (*nimietas*, Lat.) The state of being too much.—*Obsolete*.

They become, though never so good, by their nimiety, fastidious.—*Instruct. for Oratory*.

NIMIOUS, nim'e-us, *a.* Excessive.

NIMMER, nim'mur, *s.* (*niman*, Sax.) A thief; a pilferer.—*Obsolete*.

Blank schemes to discover nimmers.—*Butler*.

NINCOMPOOP, nin'kom-poop, *s.* (supposed to be from, *non compos*, of unsound mind, Lat.) A fool; a trifler; a silly person.

NINE, nine, *a.* (*neum*, Gerin. *nium*, Goth.) Denoting the number composed of eight and one;—*s.* one added to eight; one less than ten.

NINEFOLD, nine'fold, *a.* Nine times; anything nine times repeated.

NINEHOLES, nine'holz, *s.* A game into which a pellet is to be bowled, in one of nine holes made on even ground.

NINEPENNY, nine'pens, *s.* A silver coin of the value of ninepence.

NINEPINS, nine'pinz, *s.* A play where pieces of wood are set up on the ground, at which a bowl is to be thrown, for the purpose of knocking them down.

NINESCORE, nine'skore, *a.* Implying nine times twenty;—*s.* the number of nine times twenty.

NINETEEN, nine'teen, *a.* (*nigantyne*, Sax.) In addition, nine and ten; one less than twenty.

NINETEENTH, nine'teenth, *a.* The ordinal of nineteen.

NINETIETH, nine'te-eth, *a.* The ordinal of ninety.

NINETY, nine'te, *a.* Nine times ten.

NINNY, nin'ne, *s.* (*nino*, Span.) A person of a silly mind; a fool; a simpleton.

NINNY-HAMMER, nin'ne-ham-mur, *s.* A simpleton.

NINTH, ninthe, *a.* (*nigetha*, Sax.) That which precedes the tenth; the first after the eighth; the ordinal of nine;—*s.* in Music, an interval consisting of a discord retarding the 8th, but may be resolved into either the 6th or the 3d; and though this is the octave of the 2d, yet it is essentially different in harmony both as to treatment and effect. There are two kinds, the major 9th, composed of six tones and two semitones, and the minor 9th, composed of six tones and three semitones.

NIOBATES, ni'o-bayts, *s.* A genus of salts, formed by the union of niobic acid with salifiable bases.

NIOME, ni'o-be, *s.* In Mythology, the daughter of Tantalus and one of the Pleiades, married to Amphion, king of Thebes. Proud of her numerous and flourishing offspring, she is fabled to have provoked the anger of Apollo and Diana, who slew them all. She was afterwards changed by Jupiter into a rock, from which a rivulet, fed by her tears, continually pours. One of the finest specimens of ancient sculpture is that of Niobe and her children, in the tribune at Florence.

NIOMIC ACID, ni'o-bik as'id, *s.* An acid obtained when niobium is burned in the open air.

NIOLUM, ni'o-be-um, *s.* (*Niobe*.) A metal found in the tantalite of Bavaria.

NIOTA, ni'o-ta, *s.* (*karia njotti*, the name of one of the species in Malabar.) A genus of plants: Order, Malpighiaceae.

NIP, nip, *v. a.* (*knippen*, Dutch, *knipa*, Swed.) To pinch off with the nails; to bite with the teeth; to cut off by any slight means; to blast; to destroy before full growth; to pinch, as frost; to vex; to bite; to satirize; to ridicule; to taunt sarcastically;—*s.* a pinch with the nails or teeth; a small cut; a blast; a sarcasm.

NIPADITES, nip-a-di'tes, *s.* A name given by Mr. Bowerbank to a genus of fossil fruits from the Isle of Sheppy.

NIPPER, nip'pur, *s.* A foretooth of a horse. In Rope-making, an instrument used for contracting or enlarging the yarn when it is tarred.

NIPPERKIN, nip'pur-kin, *s.* A small cup.

NIPPERS, nip'purz, *s.* Small pincers; in a ship, small ropes used in fastening the messenger to the cable.

NIPPINGLY, nip'ping-ly, *ad.* With bitter sarcasm.

NIPPLE, nip'pl, *s.* (*nyple*, Sax.) A teat; a dug; the spungy protuberance by which milk is drawn from the breasts of females.

NIPPLE-WORT.—See *Lapsana*.

NIRBISHIA, nir-bi'she-a, *s.* (*Nirbishi* or *Nirbikki*, the aboriginal name of one of the species.) A genus of plants, natives of Nepal: Order, Ranunculaceae.

NISA, ni'sa, *s.* (meaning unknown.) A genus of plants; natives of Madagascar.

NISAN, ni-san, *s.* The name of the Jewish month, answering to our March.

NISI PRIUS, ni'se pri'us, *s.* In Law, a commission directed to the judges and clerk of assize, empowering them to try all questions of fact, issuing

out of the courts at Westminster, that are then ripe for trial by jury. The original of which name is this: all causes commenced in the courts of Westminster Hall, are, by the course of the courts, appointed to be tried on a day fixed in some Easter or Michaelmas term, by a jury returned from the county wherein the cause of action arises; but with this proviso, '*Nisi Prius* justiciorum ad assisas capiendis venerint; that is, 'unless before' the day prefixed, the judges of assize come into the county in question, which they always do in the vacation preceding each Easter and Michaelmas term, and there try the cause; and then, upon the return of the verdict given by the jury to the court above, the judges there give judgment for the party for whom the verdict is found.

NISLEE, nis-le', *s.* In Heraldry, an epithet for a cross.

NISSOLIA, nis-so'le-a, *s.* (in honour of William Nissol, a French botanist.) A genus of Leguminous plants: Suborder, Papilionaceae.

NIT, nit, *s.* (*knitu*, Sax.) The egg of a louse or other small insect.

NITELA, ni-tel'a, *s.* (Latin, neatness.) A genus of Hymenopterous insects: Family, Fossorae.

NITENCY, ni'ten-se, *s.* (*niteo*, to shine, Lat.) Lustre; clear brightness;—(*nitro*, I strive, Lat.) endeavour; effort; spring to expand itself.—Seldom used.

NITID, ni'tid, *a.* Lustrous; shining; spruce; fine.—Seldom used.

NITIDELLA, ni-te-del'la, *s.* A genus of shells, formed by Sevaenson, from the *Columbella nitida* of Lamarck.

NITIDULA, ni-tid-ul-a, *s.* (*nitidus*, clean, Lat.) A genus of Coleopterous insects: Type of the tribe Nitidularia.

NITIDULABLE, ni-tid-u-la're-a, *s.* A tribe of Coleopterous insects, of which nitidula is the type. The species are found on flowers, mushrooms, putrid meat, and under the bark of trees: Family, Clavicornes.

NITHING, nith'ing, *s.* (Saxon.) A poltroon; a dastard; a coward.—Seldom used.

NITRAREACEAE, ni-tra-ri-a'se-e, *s.* (*nitraria*, the only genus.) A natural order of Exogenous plants, consisting of shrubs with deciduous, succulent, alternate leaves, or flowers, in cymes or solitary; calyx fleshy and five-toothed; corolla of five petals; stamens fifteen; ovarium superior; fruit, a drupe.

NITRARIA, ni-tra're-a, *s.* (from its being found near the nitre works in Siberia.) A genus of plants, constituting the natural order Nitrareaceae.

NITRATED, ni'tray-ted, *a.* Combined with nitre.

NITRATES, ni'trayts, *s.* A genus of salts, in which the nitric acid is combined with salifiable bases. *Nitrate of silver*, in Chemistry, is prepared by saturating pure nitric acid with pure silver, evaporating the solution, and crystallizing the nitrate. When swallowed, it is a very powerful poison; but it may be readily counteracted by the administration of a dose of sea-salt, which converts the corrosive nitrate into the inert chloride of silver. Properly prepared, it forms an excellent indelible ink for writing on linen with a pen.

NITRE, ni'tur, *s.* (*nitrum*, Lat.) A salt, called also

NITRIC—NITROSACCHARATES.

saltpetre. In the modern nomenclature of Chemistry, it is termed nitrate of potassa.

NITRIC, ni'trik, *a.* Impregnated with nitre.

NITRIFICATION, ni-tre-fe-ka'shun, *s.* The process of forming or converting into nitre.

NITRIFY, ni'tre-fi, *v. a.* (*nitre* and *facio*, I make, Lat.) To form into nitre.

NITRITES, ni'trites, *s.* A genus of salts, composed of nitrous acid, with salifiable bases.

NITROBENZIDE, ni-tro-ben'zide, *s.* An artificial liquid of a light yellow colour, sweet taste and peculiar odour, between that of oil of cinnamon and of bitter almonds. It is composed of hydrogen, 4.06; carbon, 58.54; oxygen, 26.02; nitrogen, 11.38: sp. gr. 1.209.

NITROBENZULE, ni-tro-ben'zule, *s.* In Chemistry, the insoluble residue of the preparation called Azobenzule. The formula of which is $C_{12}H_{15}N_3$.

NITROGEN, ni'tro-jen, *s.* (*nitron*, nitre, and *gennao*, I produce, Gr.) A simple gaseous body which forms a constituent part of nitric acid, and which, from being unrespirable, and incapable of supporting animal life, has likewise been called azote, (from *a*, priv. and *zoe*, life, Gr.) It is generally obtained by burning a piece of phosphorus in a jar, full of air, inverted over water. It is colourless, inodorous, and tasteless,—is not absorbed by water, and produces no effect on vegetable colours. It is rather lighter than common air, its equiv. is 14. It combines with oxygen in five proportions, giving the formulae to the nitrous oxide of NO; nitric oxide, NO₂; hyponitrous acid, NO₃; nitrous acid, NO₄; nitric acid, NO₅.

NITROGENOUS, ni-tro-j'e-nus, *a.* Pertaining to nitrogen.

NITROLEUCATES, ni-tro-lu'kays, *s.* A genus of salts, formed by the union of nitroleucic acid and salifiable bases.

NITROLEUCIC ACID, ni-tro-lu'sik as'sid, *s.* A compound prepared by heating leucine with nitric acid.

NITROHEMATIC ACID, ni-tro-he-mat'ik as'sid, *s.* (*nitron*, and *haima*, blood, Gr.) An acid prepared by mixing carboxic or nitropicric acid with proto-sulphuric acid of iron, and digesting the mixture with hydrate of barytes and water. With bases it forms peculiar salts, nitrohemates, the solutions of which are of a deep blood-red colour.

NITRO-HYDROCHLORIC ACID, ni-tro-hi-dro-klo'rik as'sid, *s.* The mixture of nitric and muriatic acid (hydrochloric), formerly called *aqua regia*, from its solvent power over gold, the king of the metals.

NITRO-MAGNESITE, ni-tro-mag'ne-site, *s.* The nitrate of magnesia, a mineral of a white colour, found generally in a deliquescent state mixed with nitre and nitrate of lime, on old walls and in limestone caves.

NITROMETER, ni-trom'e-tur, *s.* (*nitron*, and *metron*, a measure, Gr.) An instrument used in ascertaining the quality of nitre.

NITROMURIATIC ACID.—See Nitrohydrochloric Acid.

NITRONAPHTHALESE, ni-tro-naf'tha-les, *s.* A substance prepared by boiling naphthaline in nitric acid. Formula, $H_7C_{10}O_4N$; equiv. 173. The other compounds are—nitronaphtalene, $C_{10}H_8 + 2NO_4$; nitronaphtalene, $C_{10}H_8 + 3NO_5$; and nitronaphtalene acid, $C_{16}H_5NO_{12}2HO$.

NITROSACCHARATES, ni-tro-sak'ka-pa-rays, *s.* A

NITROSACCHARIC—NOBLENES.

genus of salts, in which nitrosaccharic acid is united with salifiable bases.

NITROSACCHARIC ACID, ni-tro-sak'ka-rik as'sid, *s.* An artificial compound forming flat prisms, which are colourless, transparent, and striated.

NITROSITY, ni-tros'e-te, *s.* Quality of nitre.—Obsolete.

NITROSULPHURIC ACID, ni-tro-sul-fu'rik as'sid, *s.* An acid resulting from one part of nitre with eight or ten parts of sulphuric acid.

NITROUS, ni'trous, *a.* Pertaining to nitre; partaking of the qualities of nitre, or resembling it.

NITRY, ni'tre, *a.* Nitrous; pertaining to nitre; producing nitre.

NITTER, ni'ttur, *s.* The Horse-bee that deposits nits on horses.

NITTILY, ni'te-le, *ad.* Lousily.—Obsolete.

NITTY, ni'te, *a.* Full of nits; abounding with nits.

NIVAL, ni'val, *a.* (*nivalis*, Lat.) Abounding with snow.

NIVEOUS, niv'e-us, *a.* Resembling snow; partaking of the qualities of snow.

O.

O—OAK.

O, is the fifteenth letter, and the fourth vowel, in the English alphabet. Its shape seems to have been taken from the circular configuration of the lips in uttering the sound. In English it has a long sound, as in, *drove, tone, roll, droll*, a short sound, as in, *got, knot, plod, rod*; and the sound of oo, or the Italian u and French ou, as in *more, prove*. This sound is shortened in words ending in a close articulation, as in *book, foot*. As a numeral, O was sometimes used by the ancients for 11, and with a dash over it, O, for 11,000. Among the Irish, O prefixed to the name of a family, denotes progeny, or is a character of dignity, as a O'Carroll. O, is often used as an exclamation, expressing a wish, as 'O! were he present.' O. S. stands for old style. In Music, the C circle or double O or semicircle, is a note which we call a semibreve, and the Italians *circolo*. It is used by them to mark what they call *tempo perfetto*, and what we call treble time.

ORNAMENTALLY, awr'na-men'tal-le, *ad.* In such a manner as to add embellishment.

ORNATE, awr'nate, *a.* (*ornatus*, Lat.) Adorned; decorated; beautiful;—*v. a.* (*orno*, Lat.) to adorn.

ORNATELY, awr'nate-le, *ad.* With decoration.

ORNATENESS, awr'nate-ness, *s.* State of being adorned.

ORNATURE, awr'na-ture, *s.* Decoration.—Obsolete.

A mushroom for all your other ornatures.—*Ben Jonson*.

ORNEODES—ORNITHORHYNCHUS.

ORNEODES, awr-ne'o-des, *s.* (Greek, a fickle person.) A genus of Lepidopterous insects: Family, *Noctuidae*.

ORNICHTHYS, awr-nik'this, *s.* (*ornis*, a bird, and *ichthys*, a fish, Gr.) A genus of American fishes, in which the pectoral fins are very large; the spines on the head small; caudal fin rounded; lateral line smooth; ventral fins small: Family, *Triglidae*.

ORNISCOPICS, awr-nis-kop'iks, *s.* (*ornis*, a bird, and *skepeo*, I view, Gr.) Divination by the observation of fowls.

ORNISCOPIST, awr-nis-ko-pist, *s.* One who examines the flight of birds, in order to foretell future events by their manner of flight.—Seldom used.

ORNITHICNITE, awr-ne-thik'nite, *s.* (*ornis*, a bird, and *ichnos*, a trace, Gr.) Palaeontology, the name given to the impression of a bird's foot on strata. These occurred first on the New Red Sandstone formation.

ORNITHIDIUM, awr-ne-thid'e-um, *s.* (*ornis*, a bird, Gr. the upper lip of the stigma being like a bird's beak.) A genus of plants: Order, *Orchidaceae*.

ORNITHOCEPHALUS, awr-ne-tho-sef'a-lus, *s.* (*ornis*, a bird, and *kephale*, the head, Gr.) The name proposed by Sommering for the *Pterodactylus* of Cuvier.—See *Pterodactyle*.

ORNITHOGALEM, awr-ne-thog'a-lum, *s.* (*ornis*, a bird, and *gala*, milk, Gr.) Star of Bethlehem, a genus of plants: Order, *Liliaceae*.

ORNITHOGLOSSUM, awr-ne-tho-glos'um, *s.* (*ornis*, a bird, and *glossa*, a tongue, Gr.) Bird's-tongue, a genus of plants: Order, *Melanthaceae*.

ORNITHOLITE, awr-nith'o-lite, *s.* (*ornis*, a bird, and *lithos*, a stone, Gr.) The fossil remains of a bird in a petrified state.

ORNITHOLOGICAL, awr-ne-tho-lj'e-kal, *a.* Pertaining to ornithology.

ORNITHOLOGIST, awr-ne-thol'o-jist, *s.* One skilled in the natural history of fowls, and who understands their structure, habits, and uses; one who describes birds.

ORNITHOLOGY, awr-ne-thol'o-je, *s.* (*ornis*, a bird, and *logos*, a discourse, Gr.) That branch of natural history which treats of the structure, form, habits, and classification of birds. Linnaeus gives six orders—the Accipitres, or birds of prey; the Picæ; the Anseres, or swimming-birds; the Grallæ, or waders; the Gallinæ; and the Passeres. Swainson adopts the following orders—Raptores, birds of prey; Insessores, perchers; Scansores, climbers; Rassores, scratchers; Grallatores, waders; Notatores, swimmers.

ORNITHOMANCY, awr-nith-o-maa'w, *s.* (*ornis*, a bird, and *manteia*, divination, Gr.) Divination by the flight of birds.

ORNITHOMYIA, awr-ne-tho-mi'e-a, *s.* (*ornis*, a bird, and *myia*, a fly, Gr.) A genus of Dipterous insects: Family, *Pupipara*.

ORNITHON, awr-ne-thon, *s.* (Greek.) A building for the keeping of fowls.

ORNITHOPUS, awr-nith'o-pus, *s.* (*ornis*, a bird, and *pous*, a foot, Gr. in reference to the legumes being like the claws of a bird, and disposed of in a similar manner.) Bird's-foot, a genus of Leguminous plants: Suborder, *Papilionaceae*.

ORNITHORHYNCHUS, awr-ne-tho-ring'kus, *s.* (*ornis*, a bird, and *rhynchos*, a snout, Gr.) A singular

aquatic quadruped, a native of New Holland. It is furnished with a bill resembling that of a duck or spoon. It is a genus of the Monotremata of Cuvier.

ORNITROPE, awr-nit'-ro-pe, *s.* (*ornis*, a bird, and *trophe*, nourishment, Gr. the fruit being eat by small birds.) A genus of plants: Order, Sapindaceæ.

ORNUS, awr'-nus, *s.* (*oren*, Heb. *ornus*, Lat.) The Flowery-ash, or Manna-ash, a genus of plants: Order, Oleaceæ.

OROBANCHACEÆ, o-ro-bang-ka'se-e, *s.* (*orobanche*, one of the genera.) A natural order of Exogenous plants, consisting of parasitical, leafless, rather fleshy, scaly herbs, with terminal, solitary, spicate, or ramose flowers; calyx divided and permanent; corolla tubular, hypogynous, irregular, permanent; stamens four; anthers usually spurred at the base; ovary one-celled; stigma two-lobed or undivided; capsule one-celled, two-valved, and many-seeded.

OROBANCHE, o-ro-bang-ke, *s.* (*orobos*, a vetch, and *ancho*, I strangle, Gr. because it is supposed to strangle and kill the plants on which it grows.) Broomrape, a genus of plants: Type of the order Orobanchaceæ.

OROBUS, o-ro'-bus, *s.* (the name of a plant mentioned by Theophrastus and Dioscorides, from *oro*, I excite, and *bous*, an ox, Gr.) A genus of Leguminous plants: Suborder, Papilionaceæ.

OROGRAPHY, o-ro-gra'-fe, *s.* (*oros*, a mountain, and *grapho*, I write, Gr.) Description of mountains as to height, scenery, &c.

OROLOGICAL, or-o-loj'e-kal, *a.* Relating to a description of mountains.

OROLOGIST, o-rol'-o-jist, *s.* A describer of mountains.

OROLOGY, o-rol'-o-je, *s.* (*oros*, a mountain, and *logos*, a discourse, Gr.) Description of mountains as to their geological structure, relations, &c.

OROMODES, o-ro-mos'-des, *s.* In the Persian Mythology, the good principle, the opponent of Ahrimanes.

ORONTIACEÆ, o-ron-she-s'e-e, *s.* (*orontium*, one of the genera.) A genus of herbaceous Endogenous plants, with broad, entire, or deeply-divided leaves, occasionally sword-shaped; flowers on a simple spadix, furnished with a spathe, green, white, or purple; calyx and corolla absent, or consisting of four to eight scales; stamens of the same number, hypogynous or perigynous; anthers two-celled; ovary free; fruit a berry.

ORONTIUM, o-ron-she-un, *s.* (Greek name of a plant, so named, it is supposed, from growing on the banks of the Orontes.) Floating-arum, a genus of plants: Type of the natural order Orontiaceæ.

OROPHEA, o-ro'-fe-a, *s.* (*orophe*, the top, Gr. in allusion to the cohesion of the inner petals at the apex.) A genus of plants: Order, Anonaceæ.

ORPHAN, awr'-fan, *s.* (*orphanos*, Gr. *orfano*, Ital.) A child who is bereaved of father or mother, or of both;—*a.* bereaved of parents.

ORTHODOXNESS, awr'tho-doks-nes, *s.* The state of being sound in the faith, or of according with the doctrines of Scripture.

ORTHODOXY, awr'tho-dok-se, *s.* (*orthodoxia*, Gr.) Soundness of faith; belief in the genuine doctrines taught in the Scriptures; consonance to genuine Scriptural doctrines.

ORTHODROMIC, awr'tho-drom'ik, *a.* Pertaining to orthodromy.

ORTHODROMICS, awr'tho-drom'iks, *s.* (*orthos*, straight, and *dromio*, I run, Gr.) The art of sailing on the arc of a great circle.

ORTHODROMY, awr'tho-drom-e, *s.* (*orthos*, and *dromos*, a course, Gr.) The sailing in a straight course.

ORTHOEPICAL, awr'tho-ep'e-kal, *a.* Pertaining to orthoepy.

ORTHOEPIST, awr'tho-e-pist, *s.* One who pronounces words correctly, or one who is well skilled in pronunciation.

ORTHOEPY, awr'tho-e-pe, *s.* (*orthos*, right, and *epos*, a word, Gr.) That part of grammar which treats of the manner of uttering words, or of pronunciation in its limited sense.

ORTHOGON, awr'tho-gon, *s.* (*orthos*, right, and *gonia*, an angle, Gr.) A rectangular figure.

ORTHOGONAL, awr'tho-g'o-nal, *a.* (Greek.) Rectangular; right-angled.

ORTHOGONIUS, awr'tho-go'ne-us, *s.* (*orthos*, straight, and *gonia*, an angle, Gr.) A genus of Coleopterous insects: Family, Carabidae.

ORTHOGORISCUS, awr'tho-g'o-ris'kus, *s.* (*orthogoriskos*, a sucking pig, Gr.) A genus of fishes belonging to the subfamily Cephalinae, in which the body is nearly orbicular, the skin rough, but without spines or compartments: Family, Blastidae.

ORTHOGRAPHER, awr'tho-gra'fur, *s.* One who spells words according to the rules of grammar.

ORTHOGRAPHIC, awr'tho-graf'ik, *a.* Rightly

ORTHOGRAPHICAL, awr'tho-graf'e-kal, *a.* spelled; written with the proper letters; relating to the spelling of words. *Orthographic* or *Orthographical projection of the sphere*, in Prospective, a delineation of the sphere upon a plane that cuts it in the middle, the eye being supposed to be placed vertically at a convenient distance from it.

ORTHOGRAPHICALLY, awr'tho-graf'e-kal-le, *ad.* According to the rules of spelling; in the manner of orthographic projection.

ORTHOGRAPHY, awr'tho-gra'fe, *s.* (*orthos*, and *grapho*, I write, Gr.) That part of grammar which treats of the nature and properties of letters, and of the art of writing words correctly; the practice of spelling or writing words with the proper letters. In Geometry, the art of delineating the fore right plane or side of any object, and of expressing the elevations of each part; so called because it determines things by perpendicular lines falling on the geometrical plane. In Architecture, the elevation of a building, showing all their parts in their true proportion. In Perspective, the fore right side of any plane. In Fortification, the profile or representation of a work in all its parts, as they would appear if perpendicularly cut from top to bottom.

ORTHOLOGY, awr'tho-lo'je, *s.* (*orthos*, and *logos*, a discourse, Gr.) The right description of things.

ORTHOMETRY, awr'tho-m'e-tre, *s.* (*orthos*, and

metron, a measure, Gr.) The art or practice of constructing verse correctly; the laws of correct versification.

ORTHONOTUS, awr'tho-no'tus, *s.* (*orthos*, straight, and *notos*, the back, Gr.) A genus of Hemipterous insects: Family, Caprini of Swainson, belonging to his circle Reduviidae.

ORTHONYX, awr'tho-niks, *s.* (*orthos*, straight, and *onyx*, a claw, Gr.) A genus of birds, belonging to the Buphaginae of Swainson.

ORTHOPLCEÆ, awr'tho-pl'o'se-e, *s.* (*orthos*, upright, and *ploke*, a folding together, Gr. from the cotyledons being folded together.) A suborder of Cruciferous plants, embracing such species as have the cotyledons incumbent and folded together, or plaited lengthwise through their middle, and enveloping the radicle in the recess; the style generally enlarged, with a cell and seed at its base; seeds generally globose, never marginate.

ORTHOPNEA, awr'tho-p'ne'a, *s.* (*orthos*, straight, and *pneo*, I breathe, Gr.) A diseased state of the lungs, in which respiration can only be performed when the patient is in an upright position.

ORTHOPTERA, awr'tho-pt'er-a, *s.* (*orthos*, straight, and *pteron*, a wing, Gr.) An order of insects, including all those species which have the wings, when at rest, in straight longitudinal folds.

ORTHOSIPHON, awr'tho-si'fon, *s.* (*orthos*, straight, and *siphon*, a tube, Gr. in reference to the straight tube of the corolla.) A genus of perennial herbs or undershrubs: Order, Lamiaceae.

ORTHOSPERME, awr'tho-sper'me, *s.* (*orthos*, straight, and *sperma*, a seed, Gr.) A suborder of the Umbelliferae, distinguished by the albumen being flat or flattish inside, and neither convolute nor involute.

ORTHOSTATE, awr'tho-sta'te, *s.* In ancient Architecture, a name given to pilasters, buttresses, or supporters of a building.

ORTHOSTEMON, awr'tho-ste'mon, *s.* (*orthos*, straight, and *stemon*, a stamen, Gr. the stamens being equal.) A genus of plants: Order, Gentianaeeae.

ORTHOTOMOS, awr'tho-to'mus, *s.* (*orthos*, straight, and *tome*, an incision, Gr.) A genus of birds: Family, Sylviidae.

ORTHOTRICHUM, awr'tho't're-kum, *s.* (*orthos*, straight, and *thrix*, hair, Gr. from the straight direction of the teeth of the peristome.) A genus of urn mosses: Order, Brynceae.

ORTHOTROPOUS, awr'tho't-ro-pus, *a.* (*orthos*, and *trepo*, I turn, Gr.) In Botany, erect on the embryo of a plant.

ORTHOTYPOUS, awr'tho't'e-pus, *a.* (*orthos*, and *typos*, form, Gr.) In Mineralogy, having a particular cleavage.

ORTHROSANTHES, awr'tho-san'thes, *s.* (*orthros*, morning, and *anthos*, a flower, Gr.) A genus of plants: Order, Iridaceae.

ORTIVE, awr'tiv, *a.* (*ortus*, rising, Lat.) *Ortice amplitude*, in Astronomy, the arc of the horizon intercepted between the point where a star rises and the east point.

ORTOCHILE, or-to-ki'le, *s.* (*orto*, from *ornymi*, I stir up, and *chellox*, the lip, Gr.) A genus of Dipterous insects: Family, Tanyosoma.

ORTS, awr'ts, *s.* Refuse; things left or thrown away. Thou son of crums and orts.—*Ben Jonson.*

ORTYGIS, awr-tij'is, *s.* (*ortyx*, the quail, Gr.) A genus of birds: Family, Tetraonidae.

ORTYX, awr'tiks, *s.* (Greek, the quail.) A genus of birds: Family, Tetraonidae.

ORUS, } o'rus, *s.* In Egyptian Mythology, the son of
Horus, } Isis and Osiris, answering to the Greek Apollo. In Egyptian paintings, he is frequently represented as sitting on the lap of Isis.

ORVIETAN, awr-ve-e'tan, *s.* (*orvietano*, Ital.) An antidote or counter-poison.

ORYAL, awr'y'al, *s.* In Archaeology, a cloister or arched room in a monastery.

ORYCTERUS, o-rik'ter-us, *s.* (*orykter*, a digger, Gr.) A genus of Ruminants of the Antelope family.

ORYCTES, o-rik'tes, *s.* (*orykter*, a digger, Gr.) A genus of Coleopterous insects, belonging to the subfamily Dynastinae: Family, Scarabaeidae.

ORYCTOGNOSTIC, or-ik-tog-nos'tik, *a.* Relating to Orctognosy.

ORYCTOGNOSTY, o-rik-tog'no-se, *s.* (*oryktos*, fossil, and *gnosis*, knowledge, Gr.) Mineralogy, or, more properly, that branch of mineralogy which has for its object the arrangement and classification of minerals.

ORYCTOGRAPHY, or-ik-tog'ra-fe, *s.* (*oryktos*, fossil, and *graphe*, I write, Gr.) A description of fossil organic remains; palaeontology.

ORYCTOLOGY, o-rik-tol'o-je, *s.* (*oryktos*, fossil, and *logos*, a discourse, Gr.) That part of Geology which treats of fossil remains.

ORYSSUS, o-ris'sus, *s.* (*orysso*, I dig, Gr.) A genus of Hymenopterous insects: Family, Securifera.

ORYZA, o-ri'za, *s.* (Greek.) Rice, a genus of plants, forming one of the highly useful cereal grasses: Order, Graminaeae.

ORYZOPSIS, o-ri-zop'sis, *s.* (*oryza*, rice, and *opsis*, appearance, Gr.) A genus of plants: Order, Graminaeae.

Os, os, *s.* (Latin, a bone.)—See Bone.

Os, os, *s.* (*os*, *oris*, a mouth, Lat.) In Anatomy, an opening of parts either external or internal. *Os uterum*, or the orifice of the uterus. *Os externum*, the entrance to the vagina, so named to distinguish it from the *os internum*, or orifice of the uterus.

OSBECKIA, os-bek'e-a, *s.* (in honour of the Rev. Peter Osbeck, a Swedish naturalist.) A genus of herbaceous plants: Order, Melastomaceae.

OSCEOPHYMA, os-se-o-fi'ma, *s.* (*osche*, the scrotum, and *phyma*, a swelling, Gr.) In Pathology, a tumour of the scrotum.

OSCHEOCELE, os-ke-o-se'le, *s.* (*osche*, the scrotum, and *cele*, a tumour, Gr.) In Pathology, a scrotal rupture, a tumour of the scrotum from an accumulation of water.

OSCHITIS, os-ki'tes, } *s.* (*osche*, the scro-
OSCHROTITIS, os-ke-o-ti'tes, } tum, Gr.) In-
flammation of the scrotum.

OSCHOPHORIA, os-ko-f'o-re-a, *s.* (*oschai*, boughs hung with grapes, and *pherein*, to carry, Gr.) A celebrated festival observed by the Athenians. It was instituted by Theseus.

OSCI, os'so, *s.* A people of ancient Italy, seemingly identical with the Ausonians or Aurunci, and who inhabited the southern part of the peninsula.

OSCILLATE, os'il-late, *v. n.* (*oscillo*, Lat.) To swing; to move backward and forward; to vibrate.

OSCILLATION, os-sil-la'shun, *s.* (*oscillatio*, Lat.) Swinging. The term is particularly applied to the motion of a pendulum. *Axis of oscillation*, a right line passing through the point of suspension, parallel to the horizon. *Centre of oscillation*, that point in a pendulum in which its whole moving force is concentrated, and at which, if it meet with resistance, it instantly stops without vibration or strain of the other parts.

OSCILLATORIA, os-sil-la-to're-a, *s.* A genus of Algae, so named from their oscillatory motion: Order, Confervaceae.

OSCILLATORY, os'sil-lay-tur-e, *a.* Moving backward and forward like a pendulum; swinging.

OSCINES, os-si'nes, *s.* A genus of Dipterous insects: Family, Muscides. Also, an epithet among the Romans for those birds whose notes were regarded as omens and predictions.

OSCITANCY, os'se-tan-se, *s.* (*oscito*, I yawn, Lat.) The act of yawning; unusual sleepiness; drowsiness; dulness.

OSCITANT, os'se-tant, *a.* Yawning; gaping; sleepy; drowsy; dull; sluggish.

OSCITANTLY, os'se-tant-le, *ad.* Carelessly.

OSCITATE, os'se-tate, *v. n.* To yawn; to gape.

OSCITATION, os-se-ta'shun, *s.* The act of yawning or gaping.

OSCUANT, os'ku-lant, *a.* Kissing.

OSCUATION, os-ku-la'shun, *s.* (*osculatio*, a kissing, Lat.) In Geometry, the contact between any curve and a circle, which has the same curvature as the given curve at the point of contact.

OSCUULATORIUS, os-ku-la-to're-us, *s.* (*osculatio*, a kissing, Lat.) In Anatomy, the sphincter muscle of the lips, so called because by it the act of kissing is performed.

OSCUATORY, os'ku-la-tur-e, *a.* An osculatory circle in Geometry, is a circle having the same curvature with any curve at any given point;—*s.* in Church History, a tablet or board with the picture of Christ or the Virgin, &c., which is kissed by the priest, and then delivered to the people for the same purpose.

OSHAC, o'shak, *s.* The Gum ammoniac plant; the *Dorema ammoniacum*.

OSIERHOLT, o'zher-holte, *s.* (*osier*, and *holt*, a wood, Sax.) A place where osiers are cultivated.

OSIRIS, o-si'ris, *s.* One of the chief Egyptian divinities, the brother and husband of Isis, and, together with her, the greatest benefactor of Egypt.

OSMAZOME, oz-ma'zome, *s.* (*osme*, smell, and *zomos*, broth, Gr.) A brownish-yellow animal substance, obtained by digesting cold water on muscular fibre, and then treating it with pure alcohol. When the alcohol is dissipated by a gentle heat, the osmazome is obtained. It gives the peculiar flavour to boiled meat and soup—hence the name.

OSMERUS, os-me'rus, *s.* (*osmeres*, smelling, Gr.) A genus of fishes: Family, Salmonidae.

OSMIA—OSSEOUS.

OSMIA, os'me-a, *s.* (*osme*, smell, Gr.) A genus of Hymenopterous insects: Family, Anthophila.

OSMIC, os'mik, *a.* Relating to osmium;—*s.* *osmic acid*, a volatile, acid, and poisonous acid, obtained from the union of oxygen with osmium.

OSMIO-CHLORIDES, os'me-o-klo'rides, *s.* Compounds of osmium with hydrochloric acid.

OSMITES, os-mi'tes, *s.* (*osme*, a smell, Gr. from one of the species having a strong smell of camphor.) A genus of Composite plants: Suborder, Tubuliflorae.

OSMIUM, os'me-um, *s.* (*osme*, smell, Gr. from its peculiar pungent odour.) A metal discovered by M. Tennant, in 1803, of no use hitherto in the arts.

OSMORHIZA, os-mo-rh'za, *s.* (*osme*, smell, and *rhiza*, a root, Gr. the roots being sweet-scented.) A genus of American perennial umbelliferous herbs: Suborder, Campylospermae.

OSMUNDA, os-mun'da, *s.* (*osmunder*, one of the names of Thor, a Celtic deity.) A genus of Ferns: Order, Polypodiaceae.

OSMUNDACEAE, os-mun-da'se-e, } *s.* A family of
OSMUNDEAE, os-mun-de'e, } the Polypodiaceae, distinguished by spore-cases, dorsal or panicle, stalked, with a broad dorsal incomplete ring opening vertically: spores oblong or roundish.

OSMYLUS, os-mi'lus, *s.* (*osmylos*, the great name of a strongly-scented sea polypus, from *osme*, smell, Gr.) A genus of Hemipterous insects: Family, Cicadidae.

OSNABURG, oz'na-burg, *s.* A sort of coarse linen, first imported from Osnaburg in Germany.

OSORIUS, o-so're-us, *s.* (*os*, *oris*, a mouth, Lat.) A genus of Coleopterous insects: Family, Brachelytra.

OSPHRESIOLOGY, os-fre-se-o'l'o-je, *s.* (*osphresis*, the sense of smelling, and *logos*, a discourse, Gr.) A treatise on the sense of smell, or, more properly, on odours.

OSPHROMENUS, os-fro-me'nus, *s.* (*osphrainomai*, I smell or scent, Gr.) A genus of fishes, in which the body is broadly ovate, and the caudal fin rounded, one of the rays forming a long filament: Family, Spirobranchidae.

OSPHYTES, os-fe-y'tis, } *s.* (*osphys*, the loins, Gr.)
OSPHYTES, os-fi'tis, } Inflammation of the parts in and about the coxo-femoral articulation, or of the cellular membrane of the loins.

OSPKEY, os'pray, *s.* (*ossifraga*, Lat.) A bird of the eagle tribe, the *Falco ossifragus* of Linnaeus. It is about the size of a turkey, and lives chiefly on fish.

- PECKLED**.—See *Speckled*.
- PECOPTERIS**, *pe-kop'ter-is*, *s.* (*peptos*, a comb, and

PECORA—PECTIS.

- pterys*, a fern, Gr.) A genus of fossil Ferns, found in the Coal formation.
- PECORA**, *pek'o-ra*, *s.* (*pecora*, cattle, Lat.) The name given by Linnaeus to his fifth order of Mammalia: thus characterized—no upper incisors; six or eight lower incisors, very remote from the molars; feet hoofed; mammae inguinal. It includes the camels, moschidae, the deers, goats, sheep, and oxen.
- PECTEN**, *pek'ten*, *s.* (Latin, a comb.) A genus of *Cochifera*, in which the shell is inequivalve or subequivalve. In Comparative Anatomy, the vascular membrane, extending in the eyes of birds from the back of the retina through the vitreous humour, to, or near to, the crystalline lens, where it most frequently terminates in a point. It is also called the *marupium*. *Pectinatum tectum*, comb roof; in Architecture, a roof of a comb-like shape, contrived so as to throw rain water in two directions. *Pecten veneris*, Venus's Comb, Needle Chervil, or Common Shepherd's Needle, the plant *Scandix pecten veneris*, a British umbelliferous annual herbaceous plant.
- PECTIC ACID**, *pek'tik as'id*, *s.* An acid obtained when pectin is added to carbonate of potash.
- PECTIN**, *pek'tin*, *s.* A substance obtained from many fruits, by carefully expressing their juice, and evaporating it at a temperature not above 212°. It is also procured by adding alcohol to recently expressed currant or gooseberry juice: in a few hours a gelatinous substance separates, which is to be washed with weak alcohol, and then dried. In this state it resembles isinglass in appearance, and when immersed in cold water it swells like starch. Formula, C₁₁ H₇ O₁₀.
- PECTINÆUS**, *pek-te-næ'us*, } *s.* In Anatomy, a
PECTINALIS, *pek-te-na'lis*, } flat muscle situated obliquely between the pubes and the little trochanter, at the upper and anterior part of the thigh, so named from its arising at the pecten or pubes.
- PECTINAL**, *pek'te-nal*, *a.* (from *pecten*, a comb, Lat.) Relating to a comb; resembling a comb;—*s.* a fish whose bones resemble the teeth of a comb.
- PECTINARIA**, *pek-tin-a're-a*, *s.* (*pecten*, a comb, Lat.) A genus of plants, natives of the Cape of Good Hope: Order, *Asclepiadaceae*. Also, a genus of *Annelides*: Family, *Amphitridæ*.
- PECTINATE**, *pek'te-nate*, } *a.* Having resem-

- PECTINATION**, *pek-te-na'shun*, *s.* The state of being pectinated.
- PECTINIBRANCHIATA**, *pek-tin-e-brang-ke-a'ta*, }
PECTINIBRANCHIATES, *pek-tin-e-brang-ke-ayts*, }
s. (*pecten*, a comb, and *branchia*, gills, Lat.) Cuvier's sixth order of *Gasteropoda*. It comprehends nearly the whole of the spiral univalves, and many shells simply conical. It is so named from the respiratory organs of the animals consisting of branchiae composed of laminae, united in the form of combs, which are concealed in a dorsal cavity widely opened above the head.
- PECTINIBRANCHIATE**, *pek-tin-e-brang-ke-ate*, *a.* Relating to the *Pectinibranchiata*; having pectinated gills.
- PECTINITE**, *pek'te-nite*, *s.* A fossil pecten or scallop.
- PECTIS**, *pek'tis*, *s.* (*pecten*, a comb, Lat. to which

PECTOLITE—PECULIAR.

the teeth of the pappus may be compared.) A genus of Composite plants: Suborder, Tubulifloræ.

PECTOLITE, pek'to-lite, *s.* (*pektos*, a comb, and *lithos*, a stone, Gr.) A mineral of a greyish colour, occurring in spherical masses, which have a columnar structure, and consist of delicate flat needles diverging from a centre. Its constituents are—silica, 51.30; lime, 33.77; soda, 8.26; potash, 1.57; alumina and oxide of iron, 0.90; water, 8.89: sp. gr. 2.69. Hardness = 4.5. It is found on Natrolite on Monte Baldo, in South Tyrol.

PECTOPHYTON, pek-to-fi'ton, *s.* (*pektos*, compact, and *phyton*, a plant, Gr.) A genus of herbaceous umbelliferous plants, natives of Quito: Suborder, Orthospermeæ.

PECTORAL, pek'to-ral, *a.* (from *pectus*, the breast, Lat.) Relating to the breast;—*s.* a sacerdotal habit or vest, which was worn by the Jewish high-priest. It consisted of embroidered stuff, about a span square, and was worn on the breast, set with twelve precious stones, arranged in four rows, and containing the names of the twelve tribes.
